ServiceNow® - CSA Practice Questions - SecExams.com

SecExams - Focus Only on What's Needed to Pass! - [secexams.com]

Question #1

A Service Catalog may include which of the following components?

- A) Order Guides, Exchange Rates, Calendars
- B) Order Guides, Catalog Items, and Interceptors
- C) Catalog Items, Asset Contracts, Task Surveys
- D) Record Producers, Order Guides, and Catalog Items (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

Correct Answer : D I was able to score 86% on my CSA Exam after just three weeks of preparation and all the credit goes to this dump for guiding me. <https://t.ly/zwPEg>

I passed CSA today. sec exams was very helpful; most of my questions were on here, perhaps reworded a little. my advice, read the comments and verify with chatgpt, which answered everything correctly in my view. good luck everyone.

Selected Answer: D

D is correct

The overall catalog is made up of a collection of discrete catalog items. The basic Service Catalog item types include: Standard catalog items Record producers: giving alternative ways of adding information such as Incidents via the service catalog. Order guides: to group multiple catalog items in one request. Content Items: catalog items which provide information instead of goods or services. https://docs.servicenow.com/bundle/utah-servicenow-platform/page/product/service-catalog-management/concept/c_IntroductionToCatalogItems.html

Selected Answer: D

Record Producers - allows users to create records such as incidents or requests directly from the catalog. Order guides - it allows users to create tasks or requests from service catalog. Guides users to fill all necessary information to order. Catalog Items: It represent individual services or products that users can request from the Service Catalog. item typically includes details about the service, such as a description, price, and any associated fulfillment process.

Question #2

Which one of the following statements applies to a set of fields when they are coalesced during an import?

A) If a match is found using the coalesce fields, the existing record is updated with the information being imported (Correct Answer)

- B) If a match is not found using the coalesce fields, the system does not create a Transform Map
- C) If a match is found using the coalesce fields, the system creates a new record
- D) If a match is not found using the coalesce fields, the existing record is updated with the information being imported

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

If an existing record with a matching value in the target table is found, that record is updated. If no matching record is found, then a new record is created in the target table.
https://docs.servicenow.com/bundle/utah-integrate-applications/page/administer/import-sets/concept/c_ImportSetCoalesce.html

Selected Answer: A

A is correct

A is correct

Selected Answer: A

A is correct

A is correct answer

Question #3

As it relates to ServiceNow reporting, which of the following statements describes what a metric can do?

- A) A metric is a report gauge used on homepages to display real-time data
- B) A metric is a time measurement used to report the effectiveness of workflows and SLAs
- C) A metric is used to measure and evaluate the effectiveness of IT service management processes (Correct Answer)**
- D) A metric is a comparative measurement used to report the effectiveness of flows and SLAs.

Explanation

Correct Answer:

C

Community Discussion

C is Correct

Selected Answer: C

C is correct. A metric is created to evaluate fields changes in tasks.

c. a metric is used to measure and evaluate IT service

Selected Answer: C

the definition in SN Docs https://docs.servicenow.com/en-US/bundle/sandiego-platform-administration/page/use/reporting/concept/c_MetricDefinitionSupport.html

Selected Answer: C

C is correct answer

Question #4

The display sequence is controlled in a Service Catalog Item using which of the following?

- A) The Default Value field in the Catalog Item form
- B) The Sequence field in the Catalog Item form
- C) The Order field in the Variable form (Correct Answer)**
- D) The Choice field in the Variable form

Explanation

Correct Answer:

C

Community Discussion

C: Correct https://docs.servicenow.com/bundle/sandiego-servicenow-platform/page/product/service-catalog-management/concept/c_DefineVariableSetLayout.html#d1331070e66

correct

C is Correct

Selected Answer: C

C is correct

Selected Answer: C

C is correct

Question #5

Reports can be created from which different places in the platform? (Choose two.)

A) List column heading (Correct Answer)

B) Metrics module

C) Statistics module

D) View / Run module (Correct Answer)

Explanation

Correct Answer:

AD

Community Discussion

Selected Answer: AD

The correct answers are A and D as per SN fundamental book in Module 5: enable productivity.

A and D are correct.

Selected Answer: AD

A and d

Selected Answer: AD

A and D is correct

Selected Answer: AD

A and D are correct

Question #6

Knowledge Base Search results can be sorted by which of the following?
(Choose three.)

A) Most recent update (Correct Answer)

B) Popularity

C) Relevancy (Correct Answer)

D) Manager assignment

E) Number of views (Correct Answer)

Explanation

Correct Answer:

ACE

Community Discussion

correct

Sort the items in a knowledge base or search results list using the Sort by options at the top of the list. Views: sorts by number of article views. Newest: sorts by the date created or updated. Alphabetical: sorts alphabetically by the article Short description field. Relevancy: sorts by relevance to the search term.

ACE popularity relevancy number of views

Selected Answer: ACE

Is correct answer

Selected Answer: ACE

A C E is correct

Question #7

What is the path an Administrator could take to view the fulfillment stage task list for an order placed by a user?

- A) RITM (Number)>REQ (Number)>PROCUREMENT (Number)
- B) REQ (Number)>RITM (Number)>PROCUREMENT (Number)
- C) REQ (Number)>RITM (Number)>TASK (Number) (Correct Answer)**
- D) FULFILLMENT (Number)>RITM (Number)>TASK (Number)

Explanation

Correct Answer:

C

Community Discussion

REQ contains RITMs and RITM contains TASKs

Selected Answer: C

Question #9

What is generated from the Service Catalog once a user places an order for an item or service?

- A) A change request
- B) An Order Guide
- C) A request (Correct Answer)**
- D) An SLA

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

C is correct

Selected Answer: C

C is correct

Selected Answer: C

Is correct answer

C is the correct answer. Request is generated from Service Catalog once a user places an order for an item or service? The order could be placed in Production Environment or Service Portal (to produce a record).

Selected Answer: C

C is correct

Question #10

From the User menu, which actions can a user select? (Choose three.)

- A) Send Notifications
- B) Log Out ServiceNow (Correct Answer)**
- C) Elevate Roles (Correct Answer)**
- D) Impersonate Users (Correct Answer)**
- E) Order from Service Catalog
- F) Approve Records

Explanation

Correct Answer:

BCD

Community Discussion

badly worded...a *user cant select any! a user with both admin and security roles can select the three answers they're seeking.

Confusing question as I thought it is asking about a generic ITIL user not an administrator.

This is a tricky question. You can modify how you get notifications through User menu => Preferences => Notifications. B,C,D is correct.

This is a tricky question. You can modify how you get notifications through User menu => Preferences => Notifications. B,C,D is correct.

Selected Answer: BCD

B C D is correct

Question #11

Buttons, form links, and context menu items are all examples of what type of functionality?

- A) Business Rule
- B) UI Action (Correct Answer)**
- C) Client Script
- D) UI Policy

Explanation

Correct Answer:

B

Community Discussion

correct

Question #13

Table Access Control rules are processed in the following order:

- A) any table name (wildcard), parent table name, table name
- B) table name, parent table name, any table name (wildcard) (Correct Answer)**
- C) parent table name, table name, any table name (wildcard)
- D) any table name (wildcard), table name, parent table name

Explanation

Correct Answer:

B

Community Discussion

able ACL rules are processed in the following order: Match the table name. For example, incident. Match the parent table name. For example, task. Match any table name (*). For example, *.

most specific to most generously

B Record ACL rules consist of table and field names. The table name is the table that you want to secure. If other tables extend from this table, then the table is considered a parent table. ACL rules for parent tables apply to any table that extends the parent table. The field name is the field that you want to secure. Some fields are part of multiple tables because of table extension. ACL rules for fields in a parent table apply to any table that extends the parent table.

Selected Answer: B

B is correct

Selected Answer: B

B is correct

Question #14

What is the platform name for the User table?

- A) u_users
- B) sys_users
- C) x_users
- D) sys_user (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

It should be D sys_user, no sys_users in SNOW

Answer is D: sys_user.

Selected Answer: D

The Answer is D

Selected Answer: D

it's D

100% [sys_user]

Question #15

A REQ number in the Service Catalog represents`!

A) the order number. (Correct Answer)

B) the stage.

C) the task to complete.

D) the individual item in the order.

Question #16

Which would NOT appear in the History section of the Application Navigator?

A) Records

B) UI Pages (Correct Answer)

C) Lists

D) Forms

Explanation

Correct Answer:

B

Community Discussion

Records are not tracked

Correct. UI pages and other non-standard interfaces not tracked

Selected Answer: B

B is correct

LOL :D

LOL :D

Question #17

Which one of the following statements is a recommendation from ServiceNow about Update Sets?

A) Avoid using the Default Update set as an Update Set for moving customizations from instance to instance (Correct Answer)

B) Before moving customizations from instance to instance with Update Sets, ensure that both instances are different versions

C) Use the Baseline Update Set to store the contents of items after they are changed the first time

D) Once an Update Set is closed as *Complete*, change it back to *In Progress* until it is applied to another instance

Explanation

Correct Answer:

A

Community Discussion

correct

Why is A Correct?

A seems correct

A is the correct answer D. is not the correct answer because: Mark an update set as Complete only when it is ready to migrate. Once an update set is complete, do not change it back to In progress. Instead, create another update set for the rest of the changes, and be sure to commit them together in the order that they were created

Selected Answer: A

A is correct

Question #18

Which of the following is used to initiate a flow?

A) A Trigger (Correct Answer)

B) Core Action

C) A spoke

D) An Event

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

A is the correct answer

correct

A. The trigger specifies the conditions that start running the flow. When the trigger conditions are met, the system starts running the flow. <https://docs.servicenow.com/bundle/sandiego-application-development/page/administer/flow-designer/reference/flow-triggers.html>

Selected Answer: A

A is correct

Selected Answer: A

A is correct

Question #19

For Administrators creating new Service Catalog items, what is a characteristic they should know about Service Catalog variables?

- A) Service Catalog variables can only be used in Record Producers
- B) Service Catalog variables can only be used in Order Guides
- C) Service Catalog variables cannot affect the order price
- D) Service Catalog variables are global by default (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

Beacuse it can be security issue. You should protect variables with sensitive data.

Beacuse it can be security issue. You should protect variables with sensitive data.

Beacuse it can be security issue. You should protect variables with sensitive data.

Beacuse it can be security issue. You should protect variables with sensitive data.

Selected Answer: C

In general, Service Catalog variables do not directly affect the order price. Service Catalog variables are primarily used for collecting user input and customizing the behavior of catalog items or processes. The order price is typically determined by factors such as the pricing rules, configuration items, or pricing models associated with the catalog items or services being ordered.

Question #20

Which one of the following statements is true about Column Context Menus?

A) It displays actions such as creating quick reports, configuring the list, and exporting data (Correct Answer)

B) It displays actions related to filtering options, assigning tags, and search

C) It displays actions related to viewing and filtering the entire list

D) It displays actions such as view form, view related task, and add relationship

Explanation

D is correct

Selected Answer: D

D is correct

Question #23

Which one of the following statements describes the contents of the Configuration Management Database (CMDB)?

A) The CMDB contains data about tangible and intangible business assets (Correct Answer)

B) The CMDB contains the Business Rules that direct the intangible, configurable assets used by a company

C) The CMDB archives all Service Management PaaS equipment metadata and usage statistics

D) The CMDB contains ITIL process data pertaining to configuration items

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

A is the correct answer.

A is the correct answer

The configurations are stored in a configuration management database (ServiceNow CMDB) which consists of entities, called Configuration Items (CI), that are part of your environment. A CI may be: A physical entity, such as a computer or router A logical entity, such as an instance of a database Conceptual, such as a Requisition Service <https://docs.servicenow.com/bundle/sandiego-servicenow-platform/page/product/configuration-management/concept/cnfig-mgmt-and-cmdb.html>

The answer should be A. The answer D suggests CMDB contains process data of CI. I believe CMDB only has non-process data of physical/logical/conceptual entities.

The answer should be A. The answer D suggests CMDB contains process data of CI. I believe CMDB only has non-process data of physical/logical/conceptual entities.

Question #24

In what order should filter elements be specified?

A) Field, Operator, then Value (Correct Answer)

- B) Field, Operator, then Condition
- C) Operator, Condition, then Value
- D) Value, Operator, then Field

Explanation

Correct Answer:

Question #25

Which statement is true about business rules?

- A) A business rule must run before a database action occurs
- B) A business rule can be a piece of Javascript (Correct Answer)**
- C) A business rule must not run before a database action occurs
- D) A business rule monitors fields on a form

Explanation

Correct Answer:

B

Community Discussion

B is the correct answer, BR can be set to run BEFORE OR AFTER the database action has occurred. BR don't depends from form action. Other actions may have an impact on the table. BR stdby, but WHEN the operation is to be performed is set.

As stated by many, business rules can run BEFORE or AFTER the database action. So the only logical answer is B.

As stated by many, business rules can run BEFORE or AFTER the database action. So the only logical answer is B.

Selected Answer: B

The wording of the answer is very important. A and C seem to have been correct if the MUST is not in the wording.

Selected Answer: B

Business Rules can run before or after an action therefore the answer can only be B

Question #26

Which of the following are a type of client scripts supported in ServiceNow?
(Choose four.)

A) onSubmit (Correct Answer)

B) onUpdate

C) onCellEdit (Correct Answer)

D) onLoad (Correct Answer)

E) onEdit

F) onChange (Correct Answer)

G) onSave

Explanation

Correct Answer:

ACDF

Community Discussion

ACDF CORRECT onSubmit when a form is submitted. onLoad execute script logic when forms are loaded onCellEdit Client Script is for lists rather than form onChange when a particular field's value changes https://developer.servicenow.com/dev.do#!/learn/courses/quebec/app_store_learnv2_scripting_quebec_scripting_in_servicenow/app_store_learnv2_scripting_quebec_client_side_scripting/app_store_learnv2_scripting_quebec_client_script_types

ACDF Client Scripts are a specific kind of client-side script, which execute on forms (or in the case of onCellEdit Client Scripts, on the list view) of a record. Client Scripts come in four basic types: onLoad, onChange, onSubmit, and onCellEdit. Each type runs under different conditions, and often has a different use than the others.

Question #29

Which tool is used to have conversations with logged-in users in real-time?

A) Connect Chat (Correct Answer)

- B) Now Messenger
- C) User Presence
- D) Comments

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

A is correct but this question is deprecated since connect chat no longer exists. Now we have sidebar discussions, which is not the same.

Selected Answer: A

From the ServiceNow website: Connect Chat is a real-time messaging tool that enables users to chat with individuals and groups, quickly share files, and collaborate on any record by connecting with the right people instantly. https://docs.servicenow.com/en-US/bundle/tokyo-servicenow-platform/page/use/collaboration/concept/c_Collaboration.html Also asked chatgpt: Connect Chat is a real-time communication tool in the Tokyo release of ServiceNow, which was released in 2018. It is a feature of ServiceNow's collaboration module, which is designed to improve communication and collaboration between users within the platform. User Presence: The user presence feature in Tokyo release is integrated with the Connect Chat tool, allowing users to see the status of their colleagues directly in the chat interface. When a user is available, their presence status is indicated with a green dot next to their name. When they are busy, the dot is orange, and when they are away, the dot is gray.

Question #38

What information does the System Dictionary contain?

- A) The human-readable labels and language settings
- B) The definition for each table and column (Correct Answer)**
- C) The information on how tables relate to each other
- D) The language dictionary used for spell checking

Explanation

Correct Answer:

B

Community Discussion

Not related to this question, though.

Not related to this question, though.

Selected Answer: B

B is the accurate answer

correct

Selected Answer: B

The system dictionary is a table, called Dictionary Entry [sys_dictionary], that contains details for each table and the definition for every column on each table in an instance.

https://docs.servicenow.com/bundle/vancouver-platform-administration/page/administer/data-dictionary-tables/concept/c_SystemDictionary.html

Question #39

When working on a form, what is the difference between Insert and Update operations?

- A) Insert creates a new record and Update saves changes, both remain on the form
- B) Insert creates a new record and Update saves changes, both exit the form (Correct Answer)**
- C) Insert saves changes and exits the form, Update saves changes and remains on the form
- D) Insert saves changes and remains on the form, Update saves changes and exits the form

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

From the actual ServiceNow fundamentals course transcript: ""Some records—for example, surveys and catalog items—allow you to copy records through Insert and Insert and Stay. Check for these options on the form context menu if you want to create a copy of the current record. Insert copies the record and redisplay the list. Insert and Stay copies the record and keeps it open so that you can work on the new copy immediately." Kristen: Tell me about it! If I want to make a copy of the record and close the form, I make my changes, and then just select Insert. I'm good to go. So simple! " The suggested answer is WRONG and should be changed, unless they are deliberately trying to get people to fail the test.

The correct answer is B, Insert, Insert and Stay, update, save

Correct answer is B. it would be D if the question included "Insert & Stay" instead of "Insert"

Question #40

How is the Event Log different from the Event Registry?

A) Event Log contains generated Events, the Event Registry is a table of Event definitions (Correct Answer)

- B) Event Log is formatted in the Log style, the Event Registry displays different fields
- C) Event Log lists Events that were triggered by integrations, the Event Registry lists the Events that were triggered during the day (24-hour period)
- D) Event Log is the same as the Event Registry

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

A is partially correct. Event Registry is a feature that allows ServiceNow to capture events from external systems, such as servers, applications, and network devices. The Event Registry provides a way to collect and analyze events from multiple sources in a single location, allowing organizations to identify patterns and trends in their IT infrastructure. The Event Registry can be configured to trigger notifications, alerts, and other actions based on specific events, enabling organizations to proactively manage their IT environment.

Selected Answer: A

<https://docs.servicenow.com/bundle/sandiego-platform-administration/page/administer/platform-events/event-logs-2.html> https://docs.servicenow.com/bundle/sandiego-platform-administration/page/administer/platform-events/concept/c_EventRegistry.html

Question #41

What is a Dictionary Override?

- A) A Dictionary Override is an incoming customer update in an Update Set which applies to the same objects as a newer local customer update
- B) A Dictionary Override is the addition, modification, or removal of anything that could have an effect on IT services
- C) A Dictionary Override is a task within a flow that requests an action before the flow can continue

D) A Dictionary Override sets field properties in extended tables (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

dictionary overrides can be used to set field properties in extended tables in ServiceNow. An extended table is a custom database table that is created by extending an existing base table in the platform. When you create an extended table, you can specify which fields from the base table you want to include in the new table, as well as any additional fields that are specific to the extended table. You can use dictionary overrides to modify the properties of fields in an extended table in much the same way as you would for fields in a base table. For example, you might use a dictionary override to change the label or description of a field, or to specify a default value or a custom picker for that field. It is important to note that dictionary overrides apply to the specific field that they are defined for, and do not affect other fields in the same table or in related tables. So if

you want to modify the properties of multiple fields in an extended table, you will need to create separate dictionary overrides for each field.

correct

Selected Answer: D

D is correct.

A Dictionary Override is a feature of the ServiceNow platform, which is used for IT service management. It allows customers to update or modify the metadata (dictionary) of a specific table in a ServiceNow instance, even if that table has been customized by the instance owner. This allows for greater flexibility in customization and ensures that customer updates can be easily managed and tracked. In simple terms, a Dictionary Override occurs when a customer updates the metadata of a table in a ServiceNow instance that has already been customized by the instance owner. The customer update is stored separately from the instance owner's customization, and can be easily identified and managed.

Selected Answer: D

Dictionary overrides provide the ability to define a field on an extended table differently from the field on the parent table. For example, for a field on the Task [task] table, a dictionary override can change the default value on the Incident [incident] table without affecting the default value on Task [task] or on Change [change]

SecExams

Question #42

Which group of permissions is used to control Application and Module access?

- A) Access Control Rules
- B) UI Policies
- C) Roles (Correct Answer)**
- D) Assignment Rules

Explanation

Correct Answer:

C

Community Discussion

C. Roles are used to control application and module access in most systems that use role-based access control (RBAC) as a security model. Roles are assigned to users or groups and define the permissions and access levels that they have within the system. By defining roles with specific permissions, access to applications and modules can be restricted to only those users who need it, while preventing unauthorized access. Access Control Rules, UI Policies, and Assignment Rules are used for other purposes within the system, such as enforcing data security or automating tasks.

correct

correct https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/roles/concept/c_Roles.html

Correct. In ServiceNow, roles are used to limit and control access to features in applications and modules

Question #43

What is a Record Producer?

- A) A Record Producer is a type of Catalog Item that is used for Requests, not Services
- B) A Record Producer creates user records
- C) A Record Producer is a type of Catalog Item that provides easy ordering by bundling requests
- D) A Record Producer is a type of a Catalog Item that allows users to create task-based records from the Service Catalog (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

correct https://docs.servicenow.com/bundle/rome-servicenow-platform/page/product/service-catalog-management/concept/c_RecordProducer.html

correct answer is D. A Record Producer is a type of Catalog Item that allows users to create task-based records from the Service Catalog. In the context of IT service management and ServiceNow platform, a Record Producer is a type of Catalog Item that enables users to create new records of a specified table and task-based records from the Service Catalog interface. It is a form-based interface that presents users with fields and options to fill in, which then generates a new record in the designated table with the entered information. Record Producers are often used to facilitate user self-service and automate the creation of records for various types of requests, such as incidents, change requests, or service requests. They can also be used to bundle multiple requests into a single, easy-to-use interface, making it simpler for users to order multiple services or items at once.

Selected Answer: D

D is correct

Selected Answer: D

D is correct

correct

Question #44

Create Incident, Password Reset, and Report outage: what do these services in the Service Catalog have in common?

A) They direct the user to a record producer (Correct Answer)

- B) They direct the user to a catalog property
- C) They direct the user to a catalog UI policy
- D) They direct the user to a catalog client script

Explanation

Correct Answer:

A

Community Discussion

Correct answer is A. They direct the user to a record producer. The three services in the Service Catalog - Incident, Password Reset, and Report Outage - have in common that they all direct the user to a record producer. A record producer is a form that allows users to create a new record, such as an incident or a password reset request, in the ServiceNow platform. When a user requests any of these services, they are directed to a record producer where they can fill out the required information and submit the request. While the specific details of each record producer may vary depending on the service being requested, the commonality between them is that they all serve as the starting point for creating a new record in the ServiceNow platform.

correct

A is correct

Selected Answer: A

A is the correct answer

Question #45

What is the Import Set Table?

- A) A table where data will be placed, post-transformation
- B) A table that determines relationships
- C) A staging area for imported records (Correct Answer)**
- D) A repository for Update Set information

Explanation

Correct Answer:

C

Community Discussion

Correct answer is C. Import Set Table is a staging area for imported records in ServiceNow. It is used to import data from various sources into ServiceNow tables. Import Set Tables provide a temporary holding area for records imported from a data source such as a CSV file, an Excel file, or a database table. Once the records are imported into the Import Set Table, they can be transformed and then moved to the appropriate ServiceNow table. The Import Set Table is typically used in conjunction with Transform Maps, which define how the imported data is transformed and mapped to ServiceNow tables

correct https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/import-sets/concept/c_ImportSetsKeyConcepts.html

correct

Selected Answer: C

C is correct.

C is correct

Question #46

What is a characteristic of importing data into ServiceNow?

- A) An existing Transform Map can be used one time on the same import set
- B) Coalesce fields are used only after running Transform
- C) Any user can manage and set up import sets

D) An existing Transform Map can be used multiple times on the same import set (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

D seems to be correct from the list of available options

Correct answer is D. An existing Transform Map can be used multiple times on the same import set is a characteristic of importing data into ServiceNow. Transform Maps are used to map data from an import set to fields in a ServiceNow table. Once a Transform Map is created, it can be used multiple times on the same import set or on different import sets that have the same data structure. This makes it easier to import data into ServiceNow, especially if you need to import the same type of data on a regular basis.

D is correct

D is correct

Selected Answer: D

D is correct.

Question #47

What module in the Service Catalog application does an Administrator access to begin creating a new item?

- A) Maintain Categories
- B) Maintain Items (Correct Answer)**
- C) Content Items
- D) Items

Explanation

Correct Answer:

B

Community Discussion

Admin can define individual catalog items using Service Catalog > Catalog Definition > Maintain Item application. You can create, edit, and copy catalog items. Maintain items is an application module that list few types of request items like catalog item, record producer, standard change templates, software catalog, hardware catalog etc. All of these are extended from the base sc_cat_item table and used for request fulfillment from your service catalog. They do create new records ie request or RITM from catalog items or a task based record from a record producer or a change from standard template.

Selected Answer: B

B - Service Catalog > Catalog Definitions > Maintain Items

Correct

B IS RIGHT

The module that an Administrator would access to begin creating a new item in the Service Catalog application would be "B. Maintain Items".

Question #48

Which of the following allows a user to edit field values in a list without opening the form?

- A) Data Editor
- B) Edit Menu
- C) List Editor (Correct Answer)**
- D) Form Designer

Explanation

Correct Answer:

C

Community Discussion

C.- https://docs.servicenow.com/bundle/tokyo-platform-administration/page/administer/list-administration/reference/r_AdministeringTheListEditor.html

C is correct, Just double click on any field to edit.

correct

Selected Answer: C

C is correct

Question #49

Which three Variable Types can be added to a Service Catalog Item?

- A) True/False, Multiple Choice, and Ordered
- B) True/False, Checkbox, and Number List
- C) Number List, Single Line Text, and Reference
- D) Multiple Choice, Select Box, and Checkbox (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

The answer to this question may vary depending on the specific Service Catalog software being used. However, based on common practices, the three variable types that can be added to a Service Catalog Item are typically: D. Multiple Choice, Select Box, and Checkbox. These variable types allow users to select options from a predefined list and can be used for a variety of purposes, such as selecting a specific model or version of a product, choosing a department or location, or selecting a priority level. Other variable types that may also be supported by some Service Catalog software include text fields, date/time pickers, and attachments.

Selected Answer: D

D seems to be the correct answer <https://docs.servicenow.com/bundle/tokyo-application-development/page/administer/flow-designer/reference/supported-service-catalog-types.html>

D is correct

Correct

Selected Answer: D

D is correct.

Question #50

How are Workflows moved between instances?

A) Workflows are moved using Update Sets (Correct Answer)

- B) Workflows are moved using Transform Maps
- C) Workflows are moved using Application Sets
- D) Workflows cannot be moved between instances

Explanation

Correct Answer:

A

Community Discussion

A. Workflows are moved using Update Sets. Update Sets are used to move customizations and configurations from one ServiceNow instance to another. Workflows, being a type of customization, can be moved between instances using Update Sets. When you create an Update Set, you can add workflows to it, along with any related components such as tables, fields, business rules, and UI pages. Once you have created an Update Set, you can then export it from the source instance and import it into the target instance. This allows you to move workflows and other customizations between instances as needed.

correct

The system tracks workflows in update sets differently than other records because workflow information is stored across multiple tables. Changes made to a workflow version are not added to the update set until the workflow is published, at which point the entire workflow is added into the update set. Update sets store workflows as a single Workflow [wf_workflow] record and only retain the latest version with the update type of Workflow. https://docs.servicenow.com/bundle/tokyo-servicenow-platform/page/administer/workflow-administration/concept/c_WorkflowMovementWithUpdateSets.html

Selected Answer: A

A is correct

A is correct

Question #51

The baseline Service Catalog homepage contains links to which of the following components?

A) Record Producers, Order Guides, and Catalog Items (Correct Answer)

- B) Order Guides, Item Variables, and flows
- C) Order Guides, Catalog Items, and flows
- D) Record Producers, Order Guides, and Item Variables

Explanation

Correct Answer:

A

Community Discussion

The baseline Service Catalog homepage typically contains links to Order Guides, Catalog Items, and flows. Therefore, the correct answer is C. Order Guides, Catalog Items, and flows. Record Producers and Item Variables are also important components of the Service Catalog, but they are not typically listed on the homepage. Instead, they are usually accessed through links within Catalog Items or Order Guides.

Selected Answer: A

B is correct

correct

B is correct

Question #62

How do you make a list filter available to everyone?

- A) Make active, assign a name, and save
- B) Assign a group, set visibility, and save
- C) Assign a name, set visibility, and save (Correct Answer)**

D) Make active, set visibility, and save

Explanation

Correct Answer:

C

Community Discussion

C is Correct. 1. You need to give the filter a name "Save as". 2. Set the Visibility. 3. Save

correct

The correct answer is: D. Make active, set visibility, and save To make a list filter available to everyone in ServiceNow, you need to make it active, set the visibility to "Public," and save the changes. Here are the steps to follow: Navigate to the list that you want to create the filter for, and click the "Filter" button to open the filter editor. In the filter editor, select the fields and conditions that you want to use to define the filter, and then click the "Save" button. In the "Save As" dialog, enter a name for the filter, and then select the "Public" option in the "Visibility" field. Click the "Save" button to save the filter. Once you have saved the filter, it will be available to all users who have access to the list, regardless of their role or group membership. You can also use the "Shared" option in the "Visibility" field to make the filter available to specific groups or users, rather than to everyone.

Selected Answer: C

I agree, the answer has to be C. To Check that, go to any list, click on the funnel to see the filter, click on Save and this will become obvious.

Selected Answer: C

https://docs.servicenow.com/bundle/tokyo-platform-user-interface/page/use/using-lists/task/t_SavingFilters.html#t_SavingFilters

Question #63

What would NOT appear in the Application Navigator if `service` is typed into the filter field?

- A) Configuration > Business Services
- B) Self-Service > Knowledge
- C) Service Portal > Widgets
- D) Incident > Assigned to me (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

I just tested this and it's D

D is correct. Service Portfolio management > Business Services does show up. I just tried in an instance. Please check the functionality before posting misleading answers.

Selected Answer: D

D is correct: I have just tested this in my personal instance, Service Portfolio Management>Business Service DOES show up: <https://i.imgur.com/AvAWZEM.png>.

Selected Answer: D

D is the correct because 'Configuration > Business Services' DO appear when service is searched in the filter navigator.

This is a bad question as neither A or D appear exactly as worded in the question. If I were to choose one, it would be A...

Question #64

Which of the following is used to categorize, flag, and locate records?

- A) Search
- B) Favorites
- C) Tags (Correct Answer)**
- D) Bookmarks

Which one of the following is NOT a type of Visual Task Board?

- A) Flexible
- B) Freeform
- C) Feature (Correct Answer)**
- D) Guided boards

Explanation

Correct Answer:

C

Community Discussion

The VTB types in Tokyo are Freeform Board and Data Driven Board

Selected Answer: C

Yes, the answer is C. Check this video for more info: https://youtu.be/FzvUt_mClYc

Selected Answer: C

Types of Visual Task Boards include Flexible, Freeform, Guided. So that, featured is not a type of VTB

C is correct, as featured is not a type of VTB

Correct

Question #70

What is (are) best practice(s) regarding users/groups/roles? (Choose two.)

- A) You should never assign roles to groups.
- B) You should assign roles to users.
- C) You should add users to groups. (Correct Answer)**

D) You should assign roles to groups. (Correct Answer)**Explanation****Correct Answer:**

CD

Community Discussion

if the user gets promoted and has a ton of roles based off their position, its easier to change their group aka one thing rather than change all of the associated roles

if the user gets promoted and has a ton of roles based off their position, its easier to change their group aka one thing rather than change all of the associated roles

CD are correct

correct

why B is not correct

Question #71

What are two ways to generate an Event? (Choose two.)

A) Business Rule (Correct Answer)**B) Workflow (Correct Answer)**

C) Log entry

D) Knowledge article publication

Explanation**Correct Answer:**

AB

Community Discussion

This question has questionable wording, a event will be generated by publishing a KB doc but you can create an event using either business rules and workflows yes.

Is it true that an event is generated when a KA is published? Who is the event sent to, as part of what workflow?

Is it true that an event is generated when a KA is published? Who is the event sent to, as part of what workflow?

correct

Selected Answer: AB

AB Correct.

Question #72

Which core table in the ServiceNow platform provides a series of standard fields used on each of the tables that extend it, such as the Incident [incident] and Problem [problem] tables?

A) Task [task] (Correct Answer)

B) Assignment [assignment]

C) Service [service]

D) Workflow [workflow]

Explanation

Correct Answer:

A

Community Discussion

correct

A is correct

Selected Answer: A

A is correct.

A is correct but ambiguous for non-native speakers. As Incident and Problem are core tables themselves and task is a base table.

A is correct. Keyword here is core

Question #73

Which of the following statements describes how data is organized in a table?

- A) A column is a field in the database and a record is one user
- B) A column is one field and a record is one row (Correct Answer)**
- C) A column is one field and a record is one column
- D) A column contains data from one user and a record is one set of fields

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

What is up with all the websites giving the wrong answer to these questions. "A table is a collection of records in the database. Each record corresponds to a row in a table, and each field on a record corresponds to a column on that table." https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/table-administration/concept/c_TableAdministration.html

The correct answer is obviously B, I really can not understand why it is still wrong. We pay the contribution mainly for that... Can you correct it?

Selected Answer: B

The answer is B... please correct this question, so simple and yet wrong answer.

The answer should be "B"

my conspiracy theory is that secexams, itexams etc.. are all ServiceNow shell companies with incorrect answers intentionally scattered in their exam dumps, so that people fail and have to retake the exams for more \$\$ xd

Question #74

What is a sys_id?

A) Unique 32-character identifier that is assigned to every record (Correct Answer)

- B) A client-side Business Rule
- C) A server-side Business Rule
- D) Unique 64-character identifier that is assigned to every record

Explanation

Correct Answer:

A

Community Discussion

A unique 32-character GUID (Globally Unique ID), called a Sys ID (sys_id) identifies each record in an instance. https://docs.servicenow.com/bundle/sandiego-platform-administration/page/administer/table-administration/concept/c_UniqueRecordIdentifier.html

correct

Selected Answer: A

Every time i work with sys_id, it has length like this : jfodpskemchnfutincgeplacjrksuenc, not like this : jfodpskemchnfutincgeplacjrksuencjfodpskemchnfutincgeplacjrksuenc, so its A) :D

Manager, navigate to All > Configuration > CI Class Manager. The question is this: Is a "relationship" a "dependency" in the ServiceNow context?

Question #80

What is the difference between a UI Policy and Data Policy?

- A) Data Policies run when data is entered through the form, by an Import Set, or by web services, while UI Policies are set only by web services
- B) Data Policies can be converted into UI Policies, but UI Policies cannot be converted into Data Policies
- C) Data Policies run regardless of how data is entered into ServiceNow, while UI Policies are used for form interactions (Correct Answer)**
- D) Data Policies run only after UI Policies run successfully

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

Both B and C are correct.

C is correct

c - Data policies enable you to enforce data consistency by setting mandatory and read-only states for fields. Data policies are similar to UI policies, but UI policies only apply to data entered on a form through the standard browser. Data policies can apply rules to all data entered into the system, including data brought in through import sets or web services and data entered through the mobile UI.

C Data Policies run regardless of how data is entered into ServiceNow to enforce data consistency and integrity, while UI Policies are used for form interactions to control the visibility and behavior of form elements based on conditions.

Question #81

Which one of the following is an accurate list of changes that are captured in an Update Set?

- A) Changes made to: tables, forms, schedules, and client scripts
- B) Changes made to: tables, forms, Business Rules, and data records
- C) Changes made to: tables, forms, groups, and configuration items (CIs)
- D) Changes made to: table, forms, views, and fields (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

Configurations are automatically recorded in update sets. Things like client scripts, business rules, UI Actions, etc. Things that are considered data, like users, groups, group associates (records on sys_user_grmember) don't get saved automatically. You can manually add these records to your update set by clicking the UI action in the bottom left corner." https://community.servicenow.com/community?id=community_question&sys_id=b18c761cdb83b344414eeeb5ca96192f https://community.servicenow.com/community?id=community_question&sys_id=3e5e8feddb9cd9c01dcaf3231f9619e0 A is wrong because Schedule jobs are not included B. is wrong because transactional data records are not included C. is wrong because configuration items are not included D therefore is the most accurate

D is correct

I think is B, changes to table, form,business rule and data records .

Question #82

What are the steps to retrieve an Update Set?

- A) Verify Update Set is Complete, Retrieve, Preview, Apply
- B) Verify Update Set is Complete, Test Connection, Apply
- C) Verify Update Set is Complete, Test Connection, Commit
- D) Verify Update Set is Complete, Retrieve, Preview, Commit (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

Correct answer is D.

Selected Answer: D

D is correct. Check SN admin fundamental book pg 465. It is written in bold

Selected Answer: D

You retrieve a update set in 'Retrieved Update Sets' module, where you import a XML file, after that you should preview and Commit

From the training: To retrieve an update set from a remote instance, in the Production instance, navigate to All > System Update Sets > Update Sources and select the sub-production/development instance with the completed update set you want to commit. With remote instances, the update sets are already previewed during the retrieval. The platform does it for you! Click the Retrieve Completed Update Sets button or related link. Any update sets marked as Complete are transferred from the source (sub-production) instance to the target (production) instance. Select the Retrieved Update Sets Related list to access the Retrieved update set; you will see it was already previewed. Select the Update Set you want to commit and click the Commit Update Set button.

Selected Answer: C

https://docs.servicenow.com/en-US/bundle/rome-application-development/page/build/system-update-sets/task/t_RetrieveAnUpdateSet.html Test a connection is a step here.

Question #83

IntegrationHub enables execution of third-party APIs as a part of a flow. These integrations are referred to as

- A) an action
- B) a spoke (Correct Answer)**
- C) a connection
- D) an integration step

Explanation

Correct Answer:

B

Community Discussion

Correct: <https://docs.servicenow.com/bundle/sandiego-servicenow-platform/page/administer/integrationhub/concept/integrationhub.html> 'Integration Hub enables execution of third-party APIs as a part of a flow when a specific event occurs in ServiceNow. These integrations, referred to as spokes'

The correct answer is D. an integration step. Integration steps are the building blocks of IntegrationHub flows. They allow you to execute third-party APIs, call other flows, or perform other actions as part of a flow. Here are some examples of integration steps: API Call: Executes a third-party API. Flow Call: Calls another flow. Script: Runs a custom script. Integration steps are referred to as "spokes" in the IntegrationHub documentation. However, the more widely used term is "integration step." The other options are incorrect: Option A: Actions are tasks that can be performed in a flow, such as sending an email or creating a record. They are not used to execute third-party APIs. Option B: Spokes are a type of integration step that allows you to call other flows. However, they are not the only type of integration step. Option C: Connections are used to connect to third-party APIs. However, they are not used to execute the APIs.

Selected Answer: B

Spoke is it

Selected Answer: B

B is correct

Nope it is spoke, don't fool people

Question #84

Which of the following protects applications by identifying and restricting access to available files and data?

- A) Application Configuration
- B) Verbose Log
- C) Access Control Rules
- D) Application Scope (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

Nope, ACL is to help for tables and fields

Nope, ACL is to help for tables and fields

corect: D "Application scoping protects applications by identifying and restricting access to application files and data." https://docs.servicenow.com/en-US/bundle/sandiego-application-development/page/build/applications/concept/c_ApplicationScope.html

Application scoping protects applications by identifying and restricting access to application files and data. D is correct.

D is correct

Question #85

Which one statement correctly describes Access Control rule evaluation?

- A) Table access rules are evaluated from the general to the specific
- B) If more than one rule applies to a record, the older rule is evaluated first
- C) If a row level rule and a field level rule exist, both rules must be true before an operation is allowed (Correct Answer)**
- D) The role with the most permissions evaluates the rules first.

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

A is wrong, the rules are evaluated: specific to general so it can't be A. C is correct

It's C. Page 319 in Utah SNAF eBook near the bottom of the page. Also throws A out the door right off bat by saying "Specific to General" is how ACLs are evaluated.

what is the correct answer?

A is outdated now it from specific to general C is the right answer

You can actually look in the eBook provided for the CSA Exam at page 429. It says that at Table Level: Most specific to most general, Field Level: Most specific to most general.

Question #86

ServiceNow contains a resource which provides the following:

- A standard and shared set of service related definitions across ServiceNow products and platform that will enable and support true service level reporting.
- A CMDB framework across our products and platform that will enable and support multiple configuration strategies.

What resource do these statements describe?

A) Common Services Data Model (CSDM) (Correct Answer)

- B) Information Technology Service Management (ITSM)
- C) Configuration Management Database (CMDB)
- D) Information Technology Infrastructure Library (ITIL)

Explanation

Correct Answer:

A

Reference:

<https://www.servicenow.com/content/dam/servicenow-assets/public/en-us/doc-type/resource-center/solution-brief/sbr-servicenow-common-service-data-model.pdf>

Community Discussion

Selected Answer: A

Csdm is correct

A, the correct answer is CSDM.

Question #87

An IT manager is responsible for the Network and Hardware assignment groups, each group contains 5 team members. These team members are working on many tasks, but the manager cannot see any tasks on the Service Desk > My Groups Work list. What could explain this?

A) The Service Desk > My Groups Work list shows active work tasks that are not yet assigned. (Correct Answer)

- B) The manager does not have the itil role.
- C) The manager is not a member of the Service Desk group.
- D) The manager is not a member of the Network and Hardware groups.
- E) The Assignment Group manager field is empty.

Explanation

Correct Answer: A [?](#)

Community Discussion

B is wrong. The manager clearly has ITIL role if he can see "Service Desk > My Groups Work list." The correct answer is D> Once he is a member of the groups, he can see the work assigned to the group that is unassigned

Exactly, it's D. I work as a SD operator in SN.

Exactly, it's D. I work as a SD operator in SN.

Selected Answer: A

Can the moderator delete or reject my previous comment? Upon more consideration I've changed my answer. A) Correct. Only unassigned work shows so, if all work for the group is assigned, My Groups Work will have nothing to display. See my answer to D for why the filter doesn't matter. B) Incorrect. User has to have the ITIL role to get to this part of ServiceNow. C) Incorrect. D) Incorrect. My Groups Work will show any record the user has

read permissions for (ITIL defaults to read all tasks), even if the user is not part of that group and cannot view the contents. I've tested this by modifying the filter to an Assignment Group that I'm not a part of and can see the task details but not access the contents. E) Incorrect. My Groups Work is available even if a user isn't the Manager so this is irrelevant.

I tested it in my instance just now. If the user has the itil role, the tasks assigned to the group appear, regardless if the task is assigned or if the manager is the member of the group. If the user does not have the itil role, the menu "My Groups Work" does not appear at all. So, D is not correct, because the group membership isn't needed, the itil role does the trick. B is not correct, because without the itil role, the list is not accessible at all. A is not correct, because with the itil role, all tasks appear.

Question #88

What do you need to do before you can use an Application-based trigger in your flow?

- A) Activate application trigger spoke
- B) Activate trigger security rules
- C) Activate application spoke, and plug-ins as needed (Correct Answer)**
- D) Assign Application trigger role [sn_app_trigger_write] to SME
- E) Activate application plugins only

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

Extract from Admin course in Service Now: Application-based triggers are added when the associated application spoke* is activated. For example, these types of triggers allow you trigger a flow when an item is requested from the Service Catalog. In some instances, a plug-in might need to be activated as well (e.g. Flow Designer Support for Service Catalog). *A spoke contains Flow Designer triggers and actions dedicated to a particular application. For example, the ITSM Spoke contains actions for managing Task records

such as the Create Task action. Spokes are activated when their parent application is activated.

Selected Answer: C

https://developer.servicenow.com/dev.do#!/learn/courses/quebec/app_store_learnv2_flowdesigner_quebec_flow_designer/app_store_learnv2_flowdesigner_quebec_using_flow_designer/app_store_learnv2_flowdesigner_quebec_triggering_flows

Is there a source for this? Never heard of anything like that

in Flow Designer OOB we have ready to use: Application Triggers: SLA Task Inbound Email Service Catalog No need to set anything. But I don't understand the answer. This is not a good question.

Selected Answer: C

Correct answer

SecExams

Question #89

The ServiceNow platform includes which types of interfaces? (Choose three.)

A) Now Mobile Apps (Correct Answer)

B) Agent Control Center

C) Back Office Dashboard

D) Service Portals (Correct Answer)

E) Now Platform® User Interfaces (Correct Answer)

F) Field Service Taskboard

Explanation

Correct Answer: ADE ?

Community Discussion

Selected Answer: ADE

A. <https://docs.servicenow.com/bundle/rome-mobile/page/administer/tablet-mobile-ui/concept/mobile-config-navigation.html> D and E. <https://www.servicenow.com/products/service-portal.html> It is almost like ServiceNow is deliberately flooding these websites with wrong correct-answers so people fail the test.

Selected Answer: ADE

Vote for this too.

Selected Answer: ADE

A D and E are interfaces

A D E is correct

Selected Answer: ADE

why are they providing wrong answers ?? just to confuse us. :-\

Question #90

Which of the following are not included in an Update Set, by default? (Choose four.)

- A) Homepages (Correct Answer)**
- B) Data (Correct Answer)**
- C) Published Workflows
- D) Business Rules
- E) Schedules (Correct Answer)**
- F) Database changes
- G) Related Lists
- H) Report Definitions
- I) Scheduled Jobs (Correct Answer)**
- J) Client Scripts K. Views

Explanation

Correct Answer: ABEI ?

Community Discussion

5 options are correct Homepages, Data, Schedules, Database changes and Scheduled jobs.

Selected Answer: BEFI

What is NOT captured in an update set: -Data -New Data -Records -Modified Data
-Records -Tasks -Modified Cls -New Users and Groups -Schedules -Scheduled Jobs
-Dashboards*

Selected Answer: BEFI

Erp88 is correct. Plus "Homepage" is deprecated. Dashboard replaces it.

answer - BEFI <https://docs.servicenow.com/bundle/sandiego-application-development/page/build/system-update-sets/reference/customizations-tracked-update-sets.html>

ABEI is the correct answer

Question #91

You are showing your customer a new form that you have created for their new application. They would like to add a field to the form. Where could you do that?

(Choose two.)

A) Select Fields and Columns module

B) Right click on form header, select Configure > Form Layout (Correct Answer)

C) Click on context menu, select Configure > Form Designer (Correct Answer)

D) Select Field Class Manager module

Explanation

Correct Answer: BC [?](#)

Community Discussion

I don't know if you are some kind of SN employee trying to massacre the answers. 1. The context menu appears by default on a form, so you can actually click on it and select configure -> form layout 2. You can also right click on the form header to access configura -> form layout.

I don't know if you are some kind of SN employee trying to massacre the answers. 1. The context menu appears by default on a form, so you can actually click on it and select configure -> form layout 2. You can also right click on the form header to access configura -> form layout.

we don't have a module called "Fields & Columns". In ServiceNow, we have a module called "Tables & Columns". So option A is not correct. Correct options are B and C.

Selected Answer: AB

The correct options are: A. Select Fields and Columns module B. Right click on form header, select Configure > Form Layout Explanation: Select Fields and Columns module (A): This module allows you to manage fields and columns on forms. You can add, modify, or remove fields from a table using this module. Right click on form header, select Configure > Form Layout (B): This option provides access to the form layout configuration, where you can customize the arrangement and properties of form fields.

Selected Answer: BC

The answer should be B and C

Question #92

Which ServiceNow resource is a framework that ensures the data your ServiceNow application requires maps correctly to the appropriate CMDB tables?

A) Common Service Data Model (CSDM) (Correct Answer)

- B) Service Mapping Utility (SMU)
- C) Service Schema Map (SSM)
- D) CMDB Class Manager (CMDBCM)
- E) CI Class Manager (CICM)

Explanation

Correct Answer:

A

Reference:

<https://docs.servicenow.com/bundle/paris-servicenow-platform/page/product/csdm-implementation/concept/csdm-basics.html>

About the CSDM

The CSDM terms and definitions enable service reporting, and provide prescriptive guidelines for service modeling within the ServiceNow® Configuration Management Database (CMDB).

The CSDM data model is a CMDB framework that supports multiple configuration strategies. The data model includes guidelines for using base system tables and relationships. Many ServiceNow products depend on data within this data model.

Community Discussion

Selected Answer: A

CSDM framework map to the physical model objects (tables and CI classes) in the CMDB.

Selected Answer: A

A is the correct answer. Check the "Benefits of using the CSDM" section from the below link: <https://docs.servicenow.com/bundle/tokyo-servicenow-platform/page/product/csdm-implementation/concept/csdm-basics.html>

Question #93

What do you activate when you want to add applications or functionality within your development instance?

- A) App Package
- B) Updated Pack
- C) Patch

D) Plugin (Correct Answer)

- E) App Updated Set

Explanation

Correct Answer:

D

Reference:

https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/plugins/concept/c_ServiceNowPlugins.html

Note: After a plugin is activated, you cannot disable or deactivate it. If needed, you can hide the functionality. You should thoroughly test, in a non-production instance, the specific features and functionalities that are installed when you activate the plugin before using them in a production instance.

Community Discussion

D is correct

Selected Answer: D

D Plugin

Question #94

What field contains a record's 32-character, unique identifier?

- A) sn_rec_id
- B) rec_id
- C) u_id
- D) sys_id (Correct Answer)**
- E) sn_gu_id
- F) sn_sys_id
- G) id

Explanation

Correct Answer:

D

Reference:

<https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/>

table-administration/concept/c_UniqueRecordIdentifier.html

Get the sys_id from a script

Users can locate the sys_id of a record using a script.

- The sys_id value of a record can be found in a business rule (or any other server-side JavaScript) by dot-walking from the GlideRecord.

```
var id = current.sys_id;
```

- The sys_id of a record can be found in client-side JavaScript using g_form.getUniqueValue() as shown in the following example.

```
function onLoad() {
    var incSysid = g_form.getUniqueValue();
    alert(incSysid);
}
```

Community Discussion

Selected Answer: D

correct

Question #95

Your company is giving all first line workers a special T-shirt as a recognition for their hard work. Management team wants a way for employees to order the T-shirt, with the ability to specify the preferred size and color. How would you ensure that only first line workers (non-managers) can submit the order?

- A) Create Record Producer and use the Available For list to specify First Line [sn_first_line] role
- B) Create Catalog Item and use the Not Available list to specify the Manager Group (Correct Answer)**
- C) Create Catalog Item and use the Available For list to specify ITIL [itil] role
- D) Create Order Guide and use the User Criteria list to specify First Line [sn_first_line] role

Explanation

Correct Answer:

B

Reference:

<https://docs.servicenow.com/bundle/orlando-it-service-management/page/product/>

service-catalog-management/task/t_AppUserCriteriaItemsCat.html

Note:

- When a change is made to the end-user profile, such as location, and it affects their ability to view items, those changes do not take effect until the end user has relaunched the session.
- The user criteria restrictions of a category do not automatically apply to the catalog items within the category. If required, you should apply the user criteria restrictions to the individual catalog items.

Community Discussion

Selected Answer: B

Not Order guide, as it is used to order multiple items. Not record producer, as it is used for incidents and cases in most cases. We only left with catalogue items. which is B and C. and C does not exclude managers. so answer is B.

Selected Answer: B

Procedure Navigate to All > Service Catalog > Maintain Items or Service Catalog > Maintain Categories. Open the relevant catalog item or category. Configure the form to add the appropriate Available or Not available lists.

Selected Answer: D

This isn't a record producer issue this is an order they want to allow. I believe it is D. You create an order guide that only those in that criteria can buy.

Selected Answer: B

B is the only one correct, by excluding the others.

Selected Answer: A

Available for First Line [sn_first_line] role.

Question #96

What is used frequently to move customizations from one instance to another?

A) Update Sets (Correct Answer)

- B) Code Sets
- C) Update Packs

- D) Configuration Logs
- E) Remote Sets
- F) Local Sets
- G) Code Packs

Explanation

Correct Answer:

A

Reference:

<https://docs.servicenow.com/bundle/rome-it-operations-management/page/product/service-mapping/task/export-patterns.html>

Export patterns

This option creates an update set containing the modified patterns and the related items necessary for the patterns to work. The related items include

- Extension sections
- Tracked files
- Related CI types
- Classification records
- Associated scripts

Note: Update sets do not include changes in script includes used in patterns.

Community Discussion

Selected Answer: A

A Update sets

A is the correct ans

Question #97

What icon do you use to change the label on a Favorite?

- A) Clock
- B) Hamburger
- C) Pencil (Correct Answer)**
- D) Three dots
- E) Triangle.

F) Star

Explanation

Correct Answer:

C

Reference:

https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0781451

Steps to Reproduce

1. As an admin, point to the "Assessments" application in the application navigator and click the star icon that appears to add all the modules to your favorites.
2. Click the favorites tab of the application navigator and click "Edit Favorites" or the pencil icon (depending on your release).
3. Click the "Assessments" favorite group.
4. Select a different color. Notice only the icons for the modules up to the first separator, "Metric Definition", change to the new color.

Community Discussion

This is correct. The answer would be C only, Pencil icon, because the Question says, what icon is used for editing the label.

Selected Answer: C

It says which Icon for EDIT bit confusing one '

Selected Answer: C

Accurate correct answer is a pencil within square with round corners

It should be a star icon for favorites.

That's correct. But the question says "Change the label" means "edit" hence the pencil icon is correct answer for this question.

Question #98

What needs to be specified, when creating a Business Rule? (Choose four.)

A) UI action

B) Table (Correct Answer)

C) Fields to update

D) Who can run

E) Script to run (Correct Answer)

F) Application scope

G) Update set

H) Timing (Correct Answer)

I) Condition to evaluate (Correct Answer)

Explanation

Correct Answer: BEHI ?

Community Discussion

Selected Answer: BCDH

A. UI action - not applicable B. Table - mandatory C. Fields to update - important settings under ACTION tab. This is the purpose we creating business rule D. Who can run - optional - WHEN-TO-RUN tab -> role conditions E. Script to run - optional - advanced scenarios only - script box F. Application scope - auto fill G. Update set - not applicable H. Timing - WHEN-TO-RUN tab I. Condition to evaluate - optional - advanced scenarios only - script box A, G - not applicable B, C, D, H - required E, I - advanced scenarios F - auto fill except A, G, all is valid B,C,D,H is generally required

Answer is "BEHI" according to the updated San Diego ServiceNow Learning platform

Page 438. from the ServiceNow Administration Fundamentals - Tokyo training booklet. States Table, Timing, Conditions, and script.

Page 438. from the ServiceNow Administration Fundamentals - Tokyo training booklet. States Table, Timing, Conditions, and script.

Page 438. from the ServiceNow Administration Fundamentals - Tokyo training booklet. States Table, Timing, Conditions, and script.

Question #99

What feature can track the amount of time that a task has been open, to ensure that tasks are completed within an allotted time?

A) Task Escalation Clock

B) Service Level Agreements (Correct Answer)

C) Inactivity Monitor

D) Response Time Clock

E) Business Time Remaining

Explanation

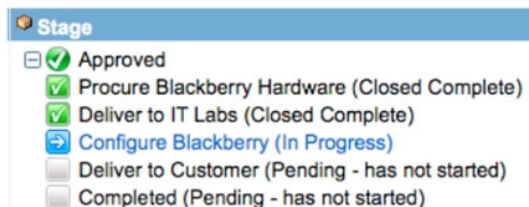

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/task-table/reference/r_ToolsForDrivingTasks.html#:~:text=Service%20level%20agreements%20can%20track,completed%20within%20an%20allotted%20time.&text=Inactivity%20predefined%20period%20of%20time

Workflow field

Workflows are not specific to the tasks, but there are task-specific Workflow Activities (such as Task Activities and Approval Activities). For more information, see Workflow Overview.

Community Discussion

Selected Answer: B

B is correct

Selected Answer: B

Only SLAs can track metrics

Selected Answer: B

It's B: https://docs.servicenow.com/ja-JP/bundle/vancouver-application-development/page/administer/task-table/reference/r_ToolsForDrivingTasks.html : Service levels
Service level agreements can track the amount of time that a task has been open, to ensure that tasks are completed within an allotted time.

Selected Answer: C

Sorry.. I meant C

Selected Answer: B

The correct answer imo is B. You can set an inactivity monitor that triggers an event for a task record when the task has been inactive for a certain amount of time. https://docs.servicenow.com/bundle/vancouver-platform-administration/page/administer/time/task/t_SetAnInactivityMonitor.html

Question #100

What is a quick way to create a report from a list view?

- A) Click on filter breadcrumb, drag and drop on the Report > Create New module
- B) Click Funnel, define filter conditions, click Create Report
- C) Click Context Menu, select Create Report
- D) Apply filter, right click on column header, select Bar Chart (Correct Answer)**
- E) Apply filter, right click on column header, select Create Report

Explanation

Correct Answer:

D

Reference:

https://ut.service-now.com/sp?id=kb_article&number=KB0014148

To Run a Report from List View:

1. Open the list view of the items you would like to report on (Incidents, Requests, Knowledge Articles, etc.)
2. Use the gear on the top left corner of the list to set your desired column headers
3. Use the blue filter icon to further refine your list view using "and/or" logic
4. Once the list is labeled and filtered to meet your needs, right click on any column header
5. Select **Bar Chart** or **Pie Chart** to generate a visual report; use the icon on the top right corner of the chart to export as an image file
6. Select **Export** and click on the file type you prefer to download (i.e., Excel, CSV or PDF)

Community Discussion

Shouldn't this answer be D then?

D but can be Pie Chart too

Selected Answer: D

D is correct

Selected Answer: D

There is no out-of-the-box UI Action called "Create Report" on a list

D is correct

Question #101

What import utility do you use when the field names on the import set match the name of the fields on the Target table?

- A) Schema Mapping
- B) Automatic Mapping (Correct Answer)**
- C) Mapping Assist
- D) Mapping Dashboard

Explanation

Correct Answer:

B

Reference:

<https://docs.servicenow.com/bundle/rome-platform-administration/page/script/server->

scripting/concept/c_MappingOptions.html

Mapping assist

Mapping Assist

Callouts:

- This column contains fields in the source table you can map to fields in the target table.
- Each row maps a source field to a target field. Add a field from the source column and a corresponding field from the target column.
- This column contains fields in the target table you can map to fields in the source table.
- The Data Viewer lets you preview mappings from source table fields to target table fields. The left column displays values from the source table. The right column displays values from the target table.

Community Discussion

Automatic Mapping Utility The simplest mapping method is where all of the field names of the import sets match the names of the fields on the production tables onto which the data will be transformed. In this case, simply click Auto map matching fields in the related list in the Table Transform Map form and confirm proper matching. If there are any discrepancies in terms of how fields were automatically matched, use the mapping assist utility to correct them. When all fields are matched properly, click the Transform related link to begin transforming data onto the destination table.

Selected Answer: B

Sorry the correct answer is B, because the assist utility is using it when the fields are not related correctly.

Selected Answer: B

B is correct

Selected Answer: C

Related Links Auto Map Matching Fields Mapping Assist Validate Coalesce Fields Transform Index Coalesce Fields Run Point Scan

Selected Answer: B

Yes, B is right : Automatic Mapping Utility The simplest mapping method is where all of the field names of the import sets match the names of the fields on the production tables onto which the data will be transformed. In this case, simply click Auto map matching fields in the related list in the Table Transform Map form and confirm proper matching. If there are any discrepancies in terms of how fields were automatically matched, use the mapping assist utility to correct them. When all fields are matched properly, click the Transform related link to begin transforming data onto the destination table.

Question #102

As an IT employee what interface would you use, if you wanted to browse internal IT documentation, like troubleshooting scripts and FAQs?

A) Knowledge (Correct Answer)

- B) ServiceNow Wiki
- C) Knowledge Now
- D) SharePoint
- E) Stack Overflow

Explanation

Correct Answer:

A

Reference:

https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0547260

Community Discussion

Selected Answer: A

In many IT environments, Knowledge Management systems or platforms, like Knowledge in ServiceNow, are used to store and organize internal documentation, scripts, and FAQs for easy access by IT employees. ServiceNow Wiki (option B) is also a plausible choice, as it is often used for documentation within the ServiceNow platform. However, without specific details about your organization's setup, "Knowledge" is a general term for this type of documentation repository.

Selected Answer: A

Knowledge A.

Selected Answer: A

"Knowledge" is correct.

Question #103

A new Service Desk employee in Latin America complains that the create dates and times are incorrect on their Incident list. What would you suggest to fix this issue?

- A) Have them clear their cache.
- B) Have them use the gear icon to set the employee's time zone. (Correct Answer)**
- C) Recommend they use Chrome, instead of Explorer.
- D) Use the system properties to correct the instance's time zone.
- E) Have them correct the time zone on their computer.

Explanation

Correct Answer:

B

Reference:

https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0659171

Steps to Reproduce

1. Login any Instance with List v3 plugin active.
2. Set the user session time zone to Europe/Dublin.
3. Create a field on the incident form of type Date (Not Date/Time).
4. Select a value in this field and save the incident form.
5. Go to problem and under the related list of problem attach this incident.
6. Personalize the related list (make sure it is V3) to display this newly created field.
7. Edit the date values for example to 26 April 2018.
8. Notice that in the Summer time from last Sunday of March till Last Sunday of October the date is not in sync with what chosen.
9. The issue is happening in Time Zones which are UTC+0.

Community Discussion

D option

the gear icon means the preferences menu under profile, not the gear icon from the list view

the gear icon means the preferences menu under profile, not the gear icon from the list view

Selected Answer: B

B is correct

B is the answer, for UI15 it's the gear icon, when you click the gear icon in the banner frame, in the general section you'll see there, time zone. For UI16, I think it's the Profile icon in the banner frame, then click profile again, you'll see timezone there.

Question #104

What are three security modules often used by the System Administrator?
(Choose three.)

A) System Properties > Security (Correct Answer)

B) Utilities > Migrate Security

C) System Security > Security

D) Self-Service > My Access

E) System Security > Access Control (ACL) (Correct Answer)

F) Password Management > Security Questions

G) System Security > High Security Settings (Correct Answer)

Explanation

Correct Answer:

AEG

Reference:

https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/security/reference/r_GeneralSecuritySettings.html

com.glide.attachment.max_size

Sets the maximum file attachment size in megabytes.

glide.attachment.role

Lists the roles (comma-separated) that can create attachments.

glide.attachment.extensions

Lists the file extensions (comma-separated) that can be attached to documents via the attachment dialog. Extensions should not include the dot (.). For example, xls, xlsx, doc, docx. Leave blank to allow all extensions.

Selected Answer: B

juhukjkb

Selected Answer: AEG

A E G are correct

Question #105

When testing a catalog item, having a manager approval flows, which of these best practices would you follow? (Choose three.)

A) Make sure the latest flows are activated. (Correct Answer)

B) Use the instance Incognito setting to quickly toggle between requester and approver.

C) Impersonate the requester to ensure the form works. (Correct Answer)

D) Make sure the requester's user record has a manager specified. (Correct Answer)

E) Create and select your Testing Update Set, before starting the test cases.

F) Use your Admin account, so you can approve the items quickly.

Explanation

Correct Answer: ACD ?

Community Discussion

Selected Answer: CDF

The correct answers are C, D and F FYI -- Answer E is wrong. I don't think there is something called a Testing Update set, and if there is, there is no need to use it when testing a catalog item.

A is for sure one of the correct answers. Can't test the flow without Activating it. Just follow the steps in the lab 4.3 of SN Administration Fundamentals course e-book. Also C, is correct based on the steps in the LAB. D makes sense since there is Manager approval involved. B - there is no such thing as Instance Incognito Mode, E - there is no Testing Update Set

A, C, D are correct option. Make sure latest flows are activated. Impersonate the requester to ensure the form works. Make sure the requester's user record has a manager specified:

Selected Answer: ACD

ACD is correct base on SN ebook

ACD. F is wrong because there isn't an "Admin account" role.

Question #106

What is a no-code approach to control the mandatory or read-only state of a form field?

- A) UI Action
- B) Client Script
- C) UI Script
- D) UI Rule

E) UI Policy (Correct Answer)

Explanation

Correct Answer:

E

Reference:

<https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/>

field-administration/concept/c_DataPolicy.html

By default, data policies are applied to all GlideRecord operations including those used in Scripted REST APIs, and the REST Table API. You can opt out of applying the data policy to:

- Target records of SOAP web services
- Import sets
- Client-side UI policies

The admin role is required to edit data policies.

Note: Defining a data policy enforces the policy when a record is submitted from the UI. This behavior cannot be changed.

Community Discussion

Selected Answer: E

UI Actions: Purpose: UI Actions are used to define custom buttons, links, or context menu items that perform a specific action when clicked. Scope: They can be applied to forms, lists, and other UI elements. Triggers: UI Actions are triggered by user interaction, such as clicking a button or selecting a context menu item. Use Cases: UI Actions are often used to trigger server-side scripts, client-side scripts, or other operations when a user needs to perform a specific action, like opening a new record, updating fields, or running a script. UI Policies: Purpose: UI Policies are used to dynamically change the visibility and behavior of form elements based on predefined conditions. Scope: They are applied at the form level and are used to control the visibility, mandatory status, and read-only state of form fields. Triggers: UI Policies are evaluated when a form is loaded, and their conditions determine whether certain fields should be shown, hidden, made mandatory, or set to read-only. Use Cases: UI Policies are commonly used to simplify and streamline the user interface by showing or hiding fields based on the values of other fields, making forms more context-aware and user-friendly.

E is correct

Selected Answer: E

E is correct

Question #107

When moving multiple update sets at one time, what might you do to facilitate the move?

A) Batch (Correct Answer)

- B) Verify
- C) Test
- D) Preview

Explanation

Correct Answer:

A

Reference:

<https://www.servicenowelite.com/blog/2016/8/7/update-sets>

Development Instance

1. Create an update set on the development instance.
2. Make customizations and changes on the development instance.
3. Mark the update set as Complete.

Test Instance

1. Log in to the test instance and retrieve the completed update set from the development instance.
2. Commit the update set on the test instance, and test customizations thoroughly.
3. If the update set has problems in the test instance, repeat the steps with development instance with another update set.

Community Discussion

Selected Answer: A

A is correct

A is correct ("Batch update sets enable you to group update sets together so you can preview and commit them in bulk.") another think confirming 'A' is correct ("o Batch update sets enable you to group update sets together so you can preview and commit them in bulk. Dealing with multiple update sets can lead to problems, including committing update sets in the wrong order or inadvertently leaving out one or more sets.

You can avoid these problems by grouping completed update sets into a batch. The system organizes update set batches into a hierarchy. One update set can act as the parent for multiple child update sets. A given set can be both a child and parent, enabling multiple-level hierarchies. One update set at the top level of the hierarchy acts as the base update set. When you preview or commit the base update set, you preview or commit the entire batch. The system determines the processing order, and checks for collisions, based on the dates the changes were recorded, and on their sequential ancestry. Their ancestries are the specific instances in which the changes in the update sets took place.")

Batch is correct. https://community.servicenow.com/community?id=community_article&sys_id=90d4eccadb61f010f77799ead3961953

A - batch ("Batch update sets enable you to group update sets together so you can preview and commit them in bulk.")

Selected Answer: A

A is correct. <https://docs.servicenow.com/bundle/vancouver-application-development/page/build/system-update-sets/hier-update-sets/concept/us-hier-overview.html>

Question #108

What is specified in an Access Control rule?

- A) Groups, Conditional Expressions and Workflows
- B) Table Schema, CRUD, and User Authentication
- C) Object and Operation being secured; Permissions required to access the object (Correct Answer)**
- D) security_admin

Explanation

Correct Answer:

C

Reference:

<https://www.servicenowelite.com/blog/2019/10/2/access-controls#:~:text=An%20instance%20uses%20access%20control,object%20and%20operation>

%20being%20secured

An ACL can effect data security:

- A field visible/not visable
- A field is readonly/not readonly
- A record can be deleted/not deleted
- A user can/can't create a record
- Etc

Community Discussion

Selected Answer: C

WHAT IS AN ACCESS CONTROL (ACL)? An instance uses access control list (ACL) rules, also called access control rules, to control what data users can access and how they can access it. ACL rules require users to pass a set of requirements in order to gain access to particular data. Each ACL rule specifies: The object and operation being secured The permissions required to access the object

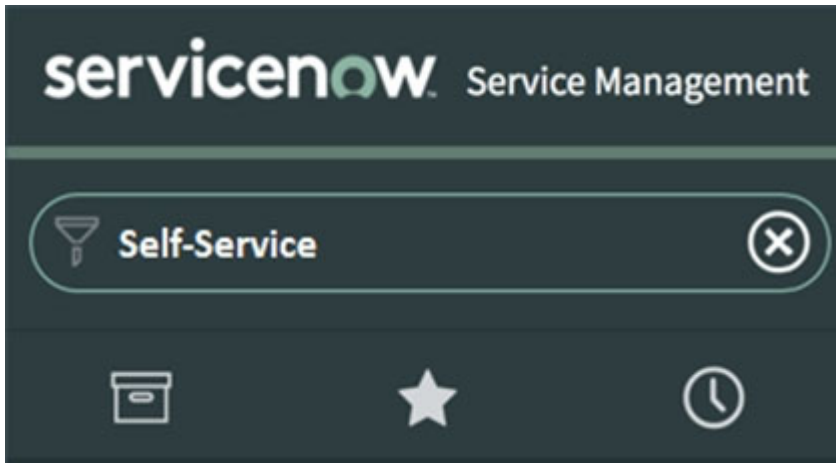

It is very ambiguous when you use Access control rule instead of Access control list (ACL) and you think ACL, but you say Access control rule anyway

Selected Answer: C

correct

Question #109

Which icon would you double click, to expand and collapse the list of all Applications and Modules?

- A) Star
- B) Clock
- C) Application (Correct Answer)**
- D) Funnel

Explanation

Correct Answer:

C

Reference:

<https://docs.servicenow.com/bundle/rome-platform-user-interface/page/administer/navigation-and-ui/task/ui16-navigator-tasks.html>

Community Discussion

Selected Answer: D

I thought the answer was D, as clicking the funnel expands all of the applications in the menu.

I don't believe this is correct for the new San Diego NEXT UI.

What did the update say in relation to this

What did the update say in relation to this

C is the answer

Question #110

What do you call any component that needs to be managed in order to deliver services?

- A) CSDM Items
- B) CMDB
- C) Configuration item (Correct Answer)**
- D) Service Offerings
- E) Asset

Explanation

Correct Answer:

C

Reference:

<https://infocenter.io/servicenow-cmdb-implementation/>

Configuration Management Process Owner

This role is filled by our client and is the Single Point of Contact for **Infocenter** for all Configuration Management issues. The Configuration Management Process Owner's primary objective is to own and maintain the Configuration Management process. The role of the Process Owner is usually a senior manager with the ability and authority to ensure the process is rolled out, adhered to and used by all stakeholders.

Community Discussion

Correct

Selected Answer: C

C configuration item

Question #111

A new service catalog item is being developed, but should only be visible to managers inside the HR Department. What method would you use to fulfill this requirement?

- A) Specify the Dept_Mgr role on the catalog content block
- B) Add the Department Manager group to the catalog item's user criteria (Correct Answer)**
- C) Add the Department Manager group to the catalog item's ACL
- D) Only publish the item in the HR service catalog
- E) Use a Dept_Mgr ACL on the HR service catalog

Explanation

Correct Answer:

B

Community Discussion

Am totally confused, is this the real answers for the exam? Can some one pls correct it if its a wrong answer given by verifying snow documents

Selected Answer: B

User Criteria is used for catalog items

Selected Answer: B

Add the Department Manager group to the catalog item's user criteria

Selected Answer: B

What's with all the wrong answers. It's B

Selected Answer: B

B is the correct answer

Question #112

A user wants to create a set of filter conditions, where they want to show records which satisfy two conditions:

- Incidents where the state is Closed
- Incidents where Assignment Group is Network

After clicking the Funnel icon, what should the user do?

A) Define the first condition; click AND button; define second condition; click Run (Correct Answer)

- B) Define the first condition; click AND button; define second condition; press enter
- C) Define the first condition; click OR button; define second condition; press enter
- D) Define the first condition; click > icon on breadcrumb, define second condition; click Run
- E) Define the first condition; click > icon on breadcrumb, define second condition; press enter

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

AND is for satisfying both

Selected Answer: A

"AND" is correct, is used coz u need to meet both conditions

Question #113

Access Control rules are applied to a specific table, like the Incident table. What is the object name for a rule that is specific to the Incident table and the Major Incident field?

- A) Incident.Major_Incident
- B) incident=>major_incident

C) incident<=>major_incident

D) incident||major_incident

E) incident.major_incident (Correct Answer)

Explanation

Correct Answer:

E

Reference:

<https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/contextual-security/concept/acl-rule-types.html>

Field ACL rules

After a user passes a table ACL rule, field ACL rules are processed in the following order:

1. Match the table and field name. For example, incident.number.
2. Match the parent table and field name. For example, task.number.
3. Match any table (*) and field name. For example, *.number.
4. Match the table and any field (*). For example, incident.*.
5. Match the parent table and any field (*). For example, task.*.
6. Match any table (*) and any field (*). For example, *.*.

Community Discussion

Sys names are not capitalized

Sys names are not capitalized

what's the difference between A and E ??? looks same/

Selected Answer: E

E is correct

<https://docs.servicenow.com/bundle/sandiego-platform-security/page/administer/contextual-security/concept/access-control-rules.html>

Question #114

Two departments (HR Onboarding and Facilities) have come to you, asking for a way for employees to request event room set up services. The requirements are the same for the form and the task routing to the Facilities' assignment group.

➤ For HR, the item will be used primarily for the Onboarding coordinators, for employee orientation sessions.

➤ For Facilities, the item will be used for anyone in the company who needs room set up services.

However, both departments have their own service catalogs. What do you do, to support these requirements?

A) Create one Catalog Item for HR Event Room Set Up and one for Facilities Event Room Set Up; then publish each to the appropriate Catalog.

B) Create one Catalog Item for Event Room Set Up; then publish to both Catalogs. (Correct Answer)

C) Create one Catalog Item for Event Room Set Up; then publish to the Parent Catalog, which is accessible to both HR and Facilities.

D) Create one Catalog Item for Event Room Set Up; then use ACLs to control access.

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

I don't get it, why the answer C is, why should be a parent-child relationship established? I've tested it, the catalog item can be added to both catalogs.

Selected Answer: B

Correct

I agree with you are saying, what is the point in creating parent catalog? When the two individual catalogs might have other purposes than this one situation.

I agree with you are saying, what is the point in creating parent catalog? When the two individual catalogs might have other purposes than this one situation.

Selected Answer: B

In Tokyo, the catalog item can be associated with more than one catalog. Open a catalog item, scroll to the bottom reference list, select Catalog tab, add multiple catalog references. Maybe the design changed since this question was added?

Question #115

After finishing your work on High Security Settings, what do you do to return to normal admin security levels?

- A) Select Normal role
- B) Log out and back in (Correct Answer)**
- C) Use System Administration > Normal Security module
- D) Select Global Update Set
- E) End Impersonation

Explanation

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/security/concept/c_HighSecuritySettings.html

Security Warning notification

 Security Warning

Your submission token does not match your session token. This occurs when:

- You are performing an action
- Your session has expired
- High security plugin is enabled (with CSRF protection)

Click "Continue" to proceed with your action

Continue

Community Discussion

In Tokyo, you select Elevate Role under the user menu then uncheck security_admin and click update. So, while the terminology is wrong, A is (now) the most correct answer

Could this question be outdated? At least in Utah I would go User Menu -> Elevate Role and switch on/off security_admin

Log out and in. https://docs.servicenow.com/bundle/sandiego-platform-security/page/administer/security/concept/c_ElevatedPrivilege.html

B is correct. Impersonation you end. Elevated roles requires a log out.

B is one way. E is incorrect.

Question #116

What type of field allows you to look up values from one other table?

A) Reference (Correct Answer)

- B) Verity
- C) Options
- D) Selections
- E) Dot walk
- F) Lookup

Explanation

Correct Answer:

A

Reference:

<https://support.microsoft.com/en-us/office/create-or-delete-a-lookup-field-87e84cbd-d60c-4473-8a98-3e391c42f239#:~:text=A%20lookup%20field%20can%20display,order%20in%20the%20Orders%20table>

Selected Answer: A

Answer is A https://docs.servicenow.com/bundle/paris-platform-administration/page/administer/field-administration/concept/c_ReferenceField.html

Selected Answer: A

Why is a Microsoft document linked as the solution? The quiz is about ServiceNow terminology, not Microsoft's.

the answer is A

Selected Answer: A

There's no Lookup type fields in SN

SecExams

Question #117

Which module would you use to create a new automation of business logic such as approvals, tasks, and notifications?

A) Process Automation > Flow Designer (Correct Answer)

- B) Process Automation > Flow Administration
- C) Process Automation > Workflow Editor
- D) Process Automation > Process Flow
- E) Process Automation > Active Flows

Explanation

Correct Answer:

A

Reference:

<https://docs.servicenow.com/bundle/rome-servicenow-platform/page/administer/>

process-automation-designer/concept/getting-started-process-automation.html

ServiceNow Process Automation applications help you digitize, visualize, and manage the cross-enterprise workflows for your business. Digitizing your business processes with Process Automation applications gives you these benefits:

- Management of process compliance
- Ownership of continual process improvement
- Collaboration across divisions and departments
- Visibility into process outcomes

Community Discussion

Workflow editor is also an option but it does not comes under Process automation application.

Selected Answer: A

A is the correct answer.

Selected Answer: A

A is correct

Question #118

A department manager asks an analyst to build some reports. Where do you recommend the analyst start?

- A) Report Dashboard > Create New
- B) Reports > Getting Started
- C) Performance Analytics > Reports
- D) Self-Service > Reports

E) Reports > Create New (Correct Answer)

Explanation

Correct Answer:

E

Reference:

https://kstate.service-now.com/kb_view.do?sysparm_article=KB12492

Select a table

Some of the most common tables to create a report on are:

- Change Request (change_request)
- Enhancement (rm_enhancement)
- Incident (incident)
- Project (pm_project)
- Request (sc_request)
- Requested Item (sc_req_item)
- Task (task)

Community Discussion

Selected Answer: E

Create a report Users may create new reports in a few ways: - Navigate to Reports > Create New - Navigate to Reports > View / Run and click Create a report - From a list click the down arrow next to any column header and select either Bar Chart or Pie Chart - From an existing report click the down arrow next to Save and select Insert and Stay. This is like a Save As feature that inserts a copy of the report into the database with any changes that have been made. If you do not save the existing report before doing insert, any changes will only be saved to the new copy of the report.

Selected Answer: B

If the analyst is new they probably should read the documentation to learn how to create reports, otherwise, why is that link useful? Once the analyst knows how to create a new report there is no reason for the manager to have the analyst review the documentation.

Selected Answer: B

If you have to tell an analyst to click "Report > Create New" then the analyst has no idea how to create a report. Send the person to "B", documentation, first.

E. https://docs.servicenow.com/bundle/washingtondc-now-intelligence/page/use/reporting/task/t_CreateYourOwnReport.html

Selected Answer: E

This seems to be logical

Question #119

What are the steps for applying an update set to an instance?

A) Retrieve, Preview, Commit (Correct Answer)

B) Specify, Transform, Apply

C) Retrieve, Assess, Apply

D) Get, Test, Push

E) Pull, Review, Push

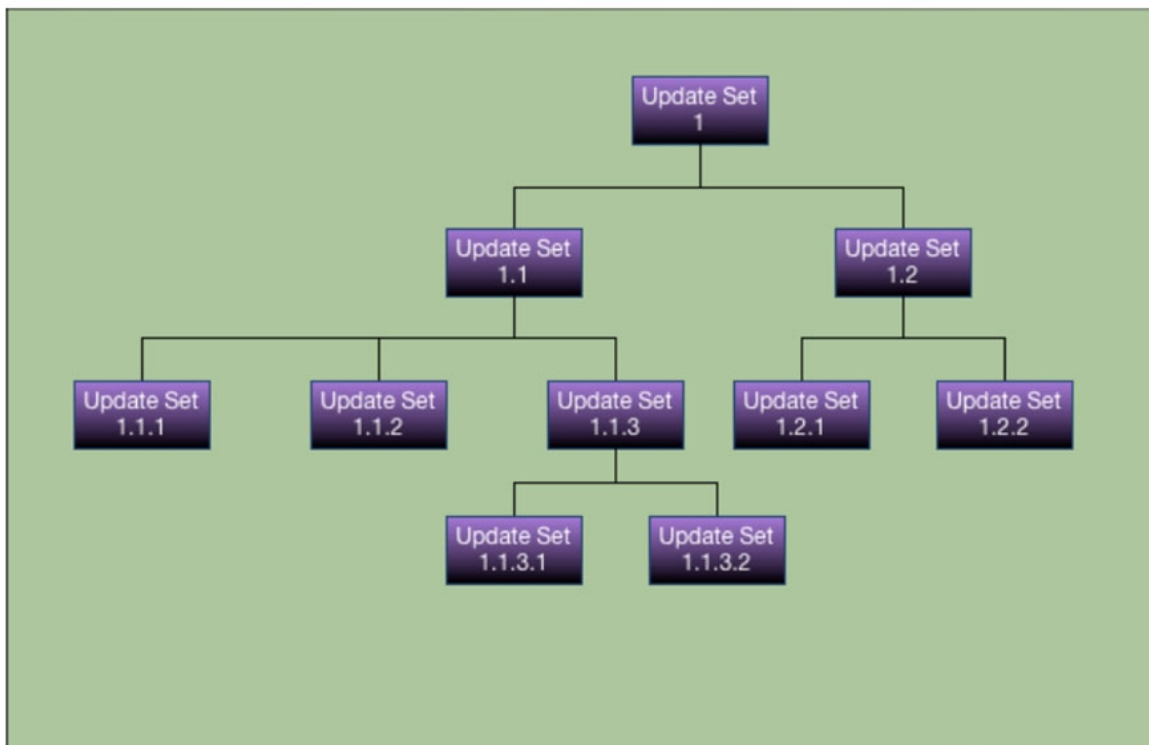

Explanation

Correct Answer:

A

Reference:

<https://docs.servicenow.com/bundle/rome-application-development/page/build/system-update-sets/hier-update-sets/concept/us-hier-overview.html#us-hier-overview>

Community Discussion

A note the other previous question was about 'retrieved', and this question 119 is about 'applying'.

Selected Answer: A

Import the Update Set in the Target Instance: In the target instance, navigate to "System Update Sets" and click on "Retrieved Update Sets." Click on "Import Update Set from XML," choose the XML file you transferred, and import it. Preview and Commit the Update Set: Once imported, preview the Update Set to see the changes that will be applied. If everything looks correct, commit the Update Set to apply the changes to the target instance. Verify the Changes: After committing the Update Set, verify that the changes have been applied as expected in the target instance.

Selected Answer: A

A is correct

A for sure

<https://docs.servicenow.com/bundle/rome-application-development/page/build/system-update-sets/hier-update-sets/concept/us-hier-overview.html#us-%20hier-overview> does in fact state that A is the correct answer

SecExams

Question #120

When importing spreadsheet data into ServiceNow, in which step does the data get written to the receiving table?

A) Run Transform (Correct Answer)

- B) Run Import
- C) Import Dataset
- D) Execute Transform
- E) Schedule Transform

Explanation

Correct Answer:

A

Reference:

<https://docs.servicenow.com/bundle/paris-platform-administration/page/script/server->

scripting/task/t_CreatingAFieldMap.html

Field	Description
Map	Transform map that uses this field mapping (populated automatically).
Source table	Table from which the raw import set data is loaded (the source for the transformation). Populated automatically from the transform map.
Source field	Field on the source table to be transformed. Can be blank if the Source table contains only raw data.

Community Discussion

It is B, see <https://docs.servicenow.com/bundle/utah-application-development/page/build/app-engine-studio/task/import-map-data-existing-table.html>

Selected Answer: A

A run Transform

A is correct. https://docs.servicenow.com/bundle/tokyo-service-management-for-the-enterprise/page/product/facilities-service-management/task/t_RunTransform.html

B. Import the file or schedule the data import Choose what to do with your data import you just created and mapped. To import the data set you uploaded now, select Run Import. To set up a future import of the data, select Schedule an import. <https://docs.servicenow.com/bundle/utah-application-development/page/build/app-engine-studio/task/import-map-data-existing-table.html>

A. https://developer.servicenow.com/dev.do#!/learn/learning-plans/utah/new_to_servicenow/app_store_learnv2_importingdata_utah_run_a_transform_map

Question #121

What would you do, on a list, if you wanted to show the records in groups, based on the column category? (Choose two.)

A) On list Context Menu, select Group By > Category (Correct Answer)

B) On the Filter Menu, select Group By > Category

C) Click Group On icon, select Category

D) On Navigator Filter, type tablename.group.category and press enter

E) On the Category column title, click Context menu > Group By Category (Correct Answer)

Explanation

Correct Answer:

AE

Reference:

https://docs.servicenow.com/bundle/rome-platform-user-interface/page/use/using-lists/concept/c_GroupedLists.html

Option	Description
To expand or collapse a group	Click the arrow (▸) next to the group name.
To expand or collapse all groups	Click the arrow at the top of the list.
To open the full list for a group	Click the group name.
To see all records for a given group	Open the full list.

Community Discussion

the answer is E and NOT A. you have to chose the column on which to group by where it will say "Group by <column name>". There is no generic context menu that just says group by where then later you can select the column.

AE correct

Selected Answer: AE

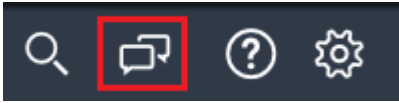

A and E

Selected Answer: AE

A, E are correct

Question #122

Which collaboration tool is available from the banner, using the bubble icon?

- A) Now Messenger
- B) Agent Chat
- C) Connect Chat (Correct Answer)**
- D) Collaborate Now
- E) Live Feed

Explanation

Correct Answer:

C

Community Discussion

Important: Connect is not supported in Next Experience. If you turn on Next Experience, Connect functionality will no longer work. See Next Experience. https://docs.servicenow.com/en-US/bundle/sandiego-servicenow-platform/page/use/collaboration/concept/c_Connect.html

its called sidebar in Utah release

In Next Experience it is now called sidebar discussions. But on older versions, yeah, it would be connect chat

Question #123

On the knowledge base record, which tab would you use to define which users are not able to write articles to the knowledge base?

- A) Can Contribute
- B) Cannot Author
- C) Cannot Contribute (Correct Answer)**

- D) Cannot Write
- E) Read Only

Explanation

Correct Answer:

C

Reference:

https://docs.servicenow.com/bundle/rome-servicenow-platform/page/product/knowledge-management/task/t_SelectUserCriteria.html

Community Discussion

Selected Answer: C

This explains why the answer is C <https://docs.servicenow.com/bundle/utah-servicenow-platform/page/product/knowledge-management/concept/user-access-knowledge.html>

The correct answer is A. Just verified this in two different developer instances.

for some reason in both work and personal development instances i have only can contribute and can read tabs... is there any way to reveal the other options or they are not available since tokyo version ?

Selected Answer: C

User criteria definitions User criteria Result Cannot Contribute Cannot contribute (that is can't create, modify, or retire) knowledge articles within a knowledge base. The Cannot Contribute user criteria is available only for knowledge bases. Can Contribute Can contribute (that is can view, create, modify, or retire) knowledge articles within a knowledge base. The Can Contribute user criteria is available only for knowledge bases. Cannot Read At the knowledge base level, cannot view knowledge articles within a knowledge base. At the knowledge article level, cannot view a knowledge article. Can Read At the knowledge base level, can view knowledge articles within a knowledge base. At the knowledge article level, can view a knowledge article.

Selected Answer: D

https://docs.servicenow.com/bundle/tokyo-customer-service-management/page/product/customer-service-management/task/t_LimitKBAccessToInternalUsers.html

Question #124

Which features allow you to update multiple records at one time? (Choose two.)

A) List Editor (Correct Answer)

B) Field Update Action

C) Bulk Record Update

D) Data Remediation Dashboard

E) Update Selected Action (Correct Answer)

Explanation

Correct Answer: AE ?

Community Discussion

Isn't answer AE?

Selected Answer: AE

I'm voting AE

Selected Answer: AE

A and E

Answer is AE

Selected Answer: AE

A: https://docs.servicenow.com/en-US/bundle/utah-platform-user-interface/page/use/using-lists/task/t_EditMultRecUsingListEditor.html E: https://docs.servicenow.com/bundle/utah-platform-user-interface/page/use/using-lists/task/t_EditMultiRecUsingEditingForm.html

Question #125

Categories in the knowledge base, by default, can be created and edited by which knowledge workers? (Choose two.)

- A) Knowledge Authors
- B) Knowledge Contributors (Correct Answer)**
- C) Knowledge Controller
- D) Knowledge Managers (Correct Answer)**
- E) Knowledge Category Managers
- F) Knowledge Submitters
- G) Knowledge Owners
- H) Knowledge Taxonomy Owner

Explanation

PLEASE DELETE MY ANSWER. ITS NOT CORRECT. PASTED BY MISTAKE

PLEASE DELETE MY ANSWER. ITS NOT CORRECT. PASTED BY MISTAKE

Selected Answer: BD

Knowledge contributors can create and edit knowledge articles within a knowledge base to share information across your organization. <https://docs.servicenow.com/bundle/sandiego-servicenow-platform/page/product/knowledge-management/task/create-knowledge-article.html> As a knowledge manager, you can assign other managers, define category structures, configure which users can read and contribute articles, move and pin articles, and modify most fields on the Knowledge Base form. You can also approve the publishing or retiring of knowledge articles in those knowledge bases. https://docs.servicenow.com/bundle/sandiego-servicenow-platform/page/product/knowledge-management/concept/c_KnowledgeManager.html

Correct Answer is B,D

I think this question is incorrect. There's really only one correct answer and it's D. In the SN Administration Fundamentals - Vancouver, page 224 there's a Knowledge Management RACI Chart at the bottom of the page. In there the Action called Modify Knowledge Base: Categories, article validity, icon, workflow, etc - This action can be performed only by the admin, knowledge_admin and knowledge_manager. Knowledge Author, Knowledge Controller, Knowledge Category Manager, Knowledge Submitters, Knowledge Owners and Knowledge Taxonomy Owner, are not SN knowledge roles at all, based on the RACI. They're not mentioned there. Knowledge Contributor - as per the RACI - can create, update, modify, and view knowledge ARTICLES, but has NO permissions to modify Knowledge Categories as the question here asks. Hence really only Admin, Knowledge Admin and Knowledge Manager can modify a knowledge Category, and of the 3 only Knowledge Manager exists in the answer choices.

Question #126

Which collaboration tool opens a sidebar and allows you to create new conversations with other ServiceNow users?

- A) Skype Now
- B) Collaborate Now
- C) Agent Messenger
- D) Agent Chat

E) Connect Chat (Correct Answer)

Explanation

Correct Answer:

E

Reference:

<https://itsm.ucsf.edu/servicenow-connect-chat>

Community Discussion

Outdated. Replaced by Sidebar chat.

This is outdated. Connect Chat is going away and can't be used with the Next Experience Unified Navigation starting with SanDiego

it is E

Selected Answer: D

D is correct: The ServiceNow® Conversational Interfaces features enable you to install, manage, and monitor your virtual and live agents to support your users through chat. Agent Chat enables live agents to interact directly with end users through chat and Sidebar enhances the ability for agents and subject matter experts to collaborate. Agent Chat and Sidebar were enhanced and updated in the Utah release.

Outdated

Question #127

What module would you use if you wanted to view a list of all of the fields on the Incident table? (Choose two.)

A) Tables & Columns (Correct Answer)

B) Dictionary (Correct Answer)

C) Data Class Manager

D) Dictionary Dashboard

E) Database View

F) Schema

Explanation

Correct Answer: AB [?](#)

Community Discussion

Selected Answer: AB

Schema is not a module

A and B are correct

No "Schema" module in ServiceNow --> A B

Selected Answer: AB

The details for fields are viewed using "Tables and Columns" or Dictionary modules.

Administrators can use these tools for viewing and modifying the database structure:
Tables module: Provides a list of all tables in the database. Tables & Columns module: Provides a list of all existing tables, with columns, column attributes, and indexes.
Schema map: Provides a graphical representation of the relationships between tables.
Data dictionary tables: Contains additional information that defines database elements.

Question #128

What component causes a flow to run after a record has been created or updated?

- A) Date-based trigger
- B) On-change trigger
- C) Record-based trigger (Correct Answer)**
- D) Application-based trigger
- E) Updated-date trigger

Explanation

Correct Answer:

C

Reference:

<https://docs.servicenow.com/bundle/rome-servicenow-platform/page/administer/flow-designer/reference/flow-triggers.html>

Community Discussion

Selected Answer: C

I think it is "Record-based Trigger", at the beginning of the article: <https://docs.servicenow.com/bundle/rome-servicenow-platform/page/administer/flow-designer/reference/flow-triggers.html> it is mentioned the following: "Use record triggers to start a flow when a record is created or updated".

Selected Answer: C

We have 3 types of triggers, record (created or updated); date, and application Based triggers

Selected Answer: C

Even the linked article in the "correct" answer states: "Use record triggers to start a flow when a record is created or updated."

Selected Answer: C

The correct answer is C: <https://docs.servicenow.com/bundle/utah-build-workflows/page/administer/flow-designer/reference/flow-triggers.html>

C is the correct answer [Table Label] Record An object containing the triggering record.
Changed Fields An array of objects containing the field values that changed. This data pill is only available for the Updated or Created or Updated trigger types. Note: To process the Changed Fields array data pill, you will need to use For Each flow logic. For more information on working with array data pills, see Complex data.

Question #129

What type of field is Boolean and appears as a check box?

- A) Yes/No
- B) True/False (Correct Answer)**
- C) On/Off
- D) Binary
- E) 0/1

Explanation

Correct Answer:

B

Reference:

https://community.servicenow.com/community?id=community_question&sys_id=d195d21adbd6d414a08a1ea668961993

Community Discussion

Selected Answer: B

TRUE/FALSE

Selected Answer: B

TRUE/FALSE

Selected Answer: B

B is the right answer

Question #130

Which module is used to access the knowledge bases which are available to you?

- A) Knowledge > Home
- B) Self Service > Knowledge (Correct Answer)**
- C) Knowledge > All
- D) Knowledge > Knowledge Bases
- E) Knowledge > Overview

Explanation

Correct Answer:

B

Reference:

<https://docs.servicenow.com/bundle/rome-servicenow-platform/page/product/knowledge-management/concept/user-access-knowledge.html>

Community Discussion

Selected Answer: B

I vote for B! I have checked on my Developer Instance, answer D is not correct, because Knowledge > Knowledge Base doesn't exist, like OtterSpace has mentioned, available is Knowledge > Administration > Knowledge Bases (yes, plural)

Selected Answer: B

As an admin, wouldn't you have access to all knowledge bases? I think this question is asked from the perspective of a non-admin user. In that case, the answer would be B.

Self service > Knowledge is the correct answer.

Correct answer is B

Selected Answer: B

B is correct

Question #131

A customer requests the following data quality measures be added:

- Incident numbers should be read only, on all lists and forms, for all users.
- Short Description field should be mandatory, on all records, across all applications, on Insert.

Which type of policy would you use to meet this requirement?

- A) Data Quality Policy
- B) Dictionary Design Policy
- C) UI Data Policy
- D) UI Policy
- E) Field Criteria Policy
- F) Data Policy (Correct Answer)**

Explanation

Correct Answer:

F

Reference:

https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0813271

Community Discussion

D, UI Policy since the question is talking about lists and forms. Data Policy is used on import sets to enforce Data Policy rules on import set fields, making them mandatory or read only.

Data policies enable you to enforce data consistency by setting mandatory and read-only states for fields. Data policies are similar to UI policies, but UI policies only apply to data entered on a form through the standard browser. Data policies can apply rules to all data entered into the system, including data brought in through import sets or web services and data entered through the mobile UI.

Its UI Policy. Read the question carefully. Making fields to Read-only and mandatory comes under UI Policy

Selected Answer: F

https://docs.servicenow.com/bundle/sandiego-platform-administration/page/administer/field-administration/concept/c_DataPolicy.html

Selected Answer: D

Data Policies run regardless of how data is entered into ServiceNow, while UI Policies are used for form interactions. That's why the correct answer is D.

Question #132

What type of user (persona) has clearly defined paths and workflows in the platform and have one or more roles (ie itil and approver_user)?

- A) Workflow User
- B) Request Fulfiller

- C) ITSM User
- D) Approving Manager
- E) Service Desk User
- F) Process User (Correct Answer)**

Explanation

Correct Answer: F ?

Community Discussion

Answer is F. Fulfiller/Process Users have random paths and workflows in the platform and have one or more roles, including itil and approver_user roles. They can access all functionality based on assigned roles.

Selected Answer: F

F is corrent

Selected Answer: F

F is correct according to SN Fundamentals Doc

Selected Answer: F

F according to SNAF Tokyo doc - page 74

Selected Answer: F

F is correct

Question #133

Which module would you use to customize your instances banner image, text and colors?

- A) System UI > UI Pages > Branding
- B) Service Portal > Portals > Branding
- C) System Properties > Basic Configuration UI16 (Correct Answer)**
- D) System Properties > Branding

E) Homepage Admin > Pages > Branding

Explanation

Correct Answer:

C

Reference:

<https://docs.servicenow.com/bundle/rome-platform-user-interface/page/administer/navigation-and-ui/reference/customizing-instance-appearance.html>

Community Discussion

Selected Answer: C

U16!! C

Selected Answer: C

I agree that "System Properties > Basic Configuration UI16" is correct

Correct

Question #134

Which database provides a logical model of your company infrastructure by identifying, controlling, maintaining and verifying CIs that exist?

- A) IMDB
- B) ITSM
- C) CSDM
- D) CMDB (Correct Answer)**
- E) LDAP

Explanation

Correct Answer:

D

Reference:

<https://qualiti7.com/wp-content/uploads/2018/11/D2-1D-HGC-TECHNOLOGIES-DESIGN-YOUR-CMDB.pdf>

Community Discussion

Selected Answer: D

<https://www.servicenow.com/products/it-operations-management/what-is-cmdb.html>

Selected Answer: D

D is correct

Question #135

Which module is used as the first step for importing data?

- A) Coalesce Data
- B) Transform Data
- C) Import Data
- D) Load Data (Correct Answer)**

Explanation

Correct Answer:

D

Reference:

https://docs.servicenow.com/bundle/paris-platform-administration/page/administer/import-sets/concept/c_ImportDataUsingImportSets.html

Community Discussion

Selected Answer: D

Type "Import Data" in the All menu. Nothing. Type "Load Data" in the All menu, bingo!

I love how clear you are!

I love how clear you are!

Selected Answer: D

at least in Utah the menu item is All -> System Import Sets -> Load Data

Selected Answer: D

Load data is correct

Question #136

When you need to orchestrate business processes across services with little technical user knowledge, which utility would you use?

- A) Flow Manager
- B) Flow Designer (Correct Answer)**
- C) Flow Editor
- D) Workflow Editor
- E) Workflow Designer

Explanation

Correct Answer:

B

Reference:

<https://docs.servicenow.com/bundle/rome-servicenow-platform/page/product/orchestration/reference/r-orchestration-introduction.html>

Community Discussion

Sorry for asking, but wondering why the rate of wrong answers are so high? It's pretty confusing showing totally wrong answers.

Selected Answer: B

Flow designer

I believe this is due to the updates between versions, but I would also like a better explanation

I believe this is due to the updates between versions, but I would also like a better explanation

Selected Answer: B

The correct answer is: B. Flow Designer

Question #137

When a user reports that they are not able to see modules on the application navigator, what can you do, to see what modules are visible to them?

- A) Look up their password, so you can login with their account
- B) Initiate a Connect Chat session
- C) Install the Bomgar plug-in
- D) Impersonate the user (Correct Answer)**
- E) Launch a NowChat window

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

Someone is joking right?

Wow the amount of questions that are wrong is amazing. Starting to not trust this website at all.

Selected Answer: D

Ha! I laughed at this one. Clearly the answer is "D". I think whoever wrote the questions and answers is having a little fun with us.

Selected Answer: D

D only

Selected Answer: D

Correct ans is D

Question #138

What is a key difference between Reporting and Performance Analytics?

A) Performance Analytics contains snapshots of data taken over time; Reporting shows only the data as it is, at the moment the report is run. (Correct Answer)

B) Performance Analytics can show trends; Reports cannot.

C) Reports can be run on a scheduled basis; Performance Analytics cannot.

D) Performance Analytics data can be published to Dashboards; Reports cannot.

E) Performance Analytics shows KPIs; Reporting does not.

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

Correct is A <https://docs.servicenow.com/bundle/rome-now-intelligence/page/use/performance-analytics/concept/pa-vs-reporting-pa.html>

Selected Answer: A

Reports can show trends I would think

Selected Answer: A

I also think it is A.

But that link says 'Performance Analytics is able to generate accurate historical TRENDS by capturing continuous snapshots on a regular schedule!' so wouldn't B also be correct?

It says that PA can show trends but the option B also says that Reports cannot show trends which can be depending on the data selected

Question #139

While showing a customer their incident form, they ask to change the Priority values to display their internal terminology P1, P2, P3, P4. They want it to be consistent across all Tasks. How would you do that?

Right click on Priority and select what?

- A) Configure Lists
- B) Show Options
- C) Configure Task
- D) Show Choices

E) Show Choice List (Correct Answer)

- F) Configure Options

Explanation

Correct Answer:

E

Community Discussion

Selected Answer: E

I tested and it is "Show choice list".

Correct is E

E See https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/field-administration/task/t_ViewChoiceListDefinitions.html

The answer seems to be E) Show Choice List. There is no "configure options" vocabulary, but configure choices. https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/field-administration/task/t_ViewChoiceListDefinitions.html

Selected Answer: E

The key to this question is the 2nd part "Right click on Priority and select what?" When right clicking priority (from a form) options are "Configure Label, Configure Dictionary, Configure Styles, Configure Choices, Show Choice List, Show - 'priority'" .. so .. Show Choice List can be the only correct answer.

Question #140

Your customer would like to create a new template to notify users who are affected by network outages at their site. Which module would you use to create a new notification?

A) System Notification > Email > Notifications (Correct Answer)

- B) Administration > Notification Overview
- C) System Properties > Email > Settings
- D) User Preferences > Email > Notifications
- E) Click Gear > Notifications > New

Explanation

Correct Answer:

A

Reference:

https://docs.servicenow.com/bundle/rome-servicenow-platform/page/administer/notification/task/t_CreateANotification.html

Community Discussion

Selected Answer: A

A: https://docs.servicenow.com/bundle/utah-platform-administration/page/administer/notification/task/t_CreateANotification.html

Selected Answer: A

I use different path and always remove filter set on the list , but yeah it is A.

Selected Answer: A

I agree that "System Notification > Email > Notifications" is correct.

Question #141

When designing a flow, how do you reference data from a record, in that flow?

- A) Drag the table icon onto the flow definition
- B) Use the condition builder to specify the desired values
- C) Specify the source table on the data pill related list
- D) Drag the data pill onto the flow definition (Correct Answer)**
- E) Add the table reference using the slush bucket

Explanation

Correct Answer:

D

Reference:

https://developer.servicenow.com/dev.do#!/learn/learning-plans/paris/citizen_developer/app_store_learnv2_flowdesigner_paris_using_flow_variables

Community Discussion

Selected Answer: D

D DATA PILL

D is the correct answer

Question #142

On the Reports page, what sections allow you to see which reports are visible to different audiences? (Choose four.)

A) Group (Correct Answer)

B) Department

C) My reports (Correct Answer)

D) Team

E) Dashboards

F) Global (Correct Answer)

G) Admin

H) Analytics

I) All (Correct Answer)

J) Company

Explanation

Correct Answer: ACFI ?

Community Discussion

Selected Answer: ACFI

There are only 4 categories in the View/run module my reports, group, global, and all

Selected Answer: ACFI

ACFI correct

A, C, F, I

Selected Answer: ACFI

Check the View/Run module

Selected Answer: ACFI

check on title bar of reports > view/run

Question #143

Which tool is used to define relationships between fields in an import set table and a target table?

- A) Transform Schema
- B) Schema Map
- C) Dictionary Map
- D) Transform Map (Correct Answer)**
- E) Field Transformer
- F) Import Designer

Explanation

Correct Answer:

D

Reference:

https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/import-sets/concept/c_ImportSetsKeyConcepts.html

Community Discussion

D is correct. Page 391 of the ServiceNow Administration Fundamentals - Tokyo Edition.

D is the right answer.

Question #144

Which ServiceNow capability provides assistance to help users obtain information, make decisions, and perform common work tasks via a messaging interface?

- A) Agent Workspace
- B) Chat bot
- C) Virtual Agent (Correct Answer)**
- D) Knowledge Chat

E) Now Support

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

C is correct

C is correct. page 259 of the ServiceNow Administration Fundamentals - Tokyo Edition.

C is correct.

Question #145

Which feature allows you to automate business logic for a particular application or process such as approvals, tasks notifications, and record operations?

A) Flows (Correct Answer)

- B) Action Sequences
- C) Action Sets
- D) Task Flows
- E) Flow Diagrams

Explanation

Correct Answer:

A

Reference:

<https://docs.servicenow.com/bundle/rome-servicenow-platform/page/administer/flow-designer/concept/flow-designer.html#:~:text=the%20following%20components%3A-,Flows,a%20particular%20application%20or%20process>

Community Discussion

Selected Answer: A

A FLOws

Selected Answer: A

Flows is the correct answer.

Selected Answer: A

Workflow

SecExams

Question #146

From a form, what would you click to add additional fields to the form? (Choose two.)

- A) Context Menu > Form > Layout
- B) Context Menu > Configure > Form Layout (Correct Answer)**
- C) Context Menu > Configure > Form Design (Correct Answer)**
- D) Right click on header > Add > Field
- E) Context Menu > Form > Designer
- F) Right click on header > Configure > UX Dashboard

Explanation

Correct Answer: BC [?](#)

Community Discussion

Selected Answer: BC

BC correct here

Why are there not more incorrect answers? Boring.

Selected Answer: BC

I just confirmed this on the test dev instance. These are the only options to available to complete the task as described in the question specifically.

Selected Answer: BC

Maybe in Rome the answers are "B, D", but in Tokyo, "B, C".

B & C are correct

Question #147

What is the name of the table relationship, where two or more tables are related in a bi-directional relationship, so that the related records are visible from both tables in a related list?

- A) Database View
- B) Many to Many (Correct Answer)**
- C) One to Many
- D) Extended

Explanation

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/managing-data/concept/c_DataManagement.html

Community Discussion

B is the right answer

B correct

B is correct

Selected Answer: B

Question #148

On a Form header, what is the three bar icon called?

- A) Pancake icon
- B) Additional Actions or Context Menu (Correct Answer)**
- C) Hamburger icon
- D) Cake icon

Explanation

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/rome-platform-user-interface/page/use/using-forms/concept/c_FormContextMenu.html

Community Discussion

B, but using using the icon we all know to be the hamburger.

Selected Answer: B

Check here: https://docs.servicenow.com/bundle/utah-platform-user-interface/page/use/using-forms/concept/c_FormContextMenu.html

C is the correct answer. In ServiceNow, the three-bar icon on a Form header is commonly referred to as the "hamburger menu" icon.

C is the correct answer.

B is the correct answer.

Question #149

Group records are stored in which table?

- A) Group [sn_user_group]
- B) Group [sys_user_group] (Correct Answer)**
- C) Group [s_sys_group]
- D) Group [u_sys_group]

Explanation

Correct Answer:

B

Reference:

https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0832548

Community Discussion

Selected Answer: B

B is correct.

Selected Answer: B

Group [sys_user_group] is correct answer

B is the right answer

Question #150

What function do you use to add buttons, links, and context menu items on forms and lists?

- A) UI Policies
- B) UI Settings
- C) UI Actions (Correct Answer)**
- D) UI Config

Explanation

Correct Answer:

C

Reference:

https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/list-administration/concept/c_UIActions.html

Community Discussion

Selected Answer: C

UI Actions is right

Selected Answer: C

C is correct

Question #151

On a Business Rule, the When setting determines at what point the rule executes. What are the options for specifying that timing?

A) Before, After, Async, Display (Correct Answer)

- B) Prior to, Synchronous, on Update
- C) Insert, Update, Delete, Query
- D) Before, Synchronous, Scheduled Job, View

Explanation

Correct Answer:

A

Reference:

https://docs.servicenow.com/bundle/rome-application-development/page/script/business-rules/reference/r_HowBusinessRulesWork.html

Community Discussion

A is correct

The answer is A. Scroll down to the section title "Time the business rule should run" the answers will be there https://docs.servicenow.com/bundle/tokyo-application-development/page/script/business-rules/concept/c_BusinessRules.html

https://docs.servicenow.com/bundle/tokyo-application-development/page/script/business-rules/concept/c_BusinessRules.html

The ones who gave C as answer: https://docs.servicenow.com/bundle/tokyo-application-development/page/script/business-rules/concept/c_BusinessRules.html Read again the section 'Time the business rule should run'.

A is the correct answer.

Question #152

What are different types of Data Sources, which may be imported into ServiceNow? (Choose four.)

A) Local Sources (i.e. XML, CSV, Excel) (Correct Answer)

B) Implementation Spoke

C) DataHub

D) JDBC Connection (Correct Answer)

E) Network Server (Correct Answer)

F) LDAP Connection (Correct Answer)

Explanation

Correct Answer: ADEF ?

Community Discussion

Local source, network server, LDAP, JDBC

Selected Answer: ADEF

From the ServiceNow Administration Fundamentals - Tokyo, page 389, it states Local source, Network server, LDAP, and Java (JDBC)

Selected Answer: ADEF

Taken from the training: An Import Set is used to import data from various data sources and then map that data into ServiceNow tables. You can import data from: • A local source file (i.e. XML, CSV, Excel) • A network server by providing a path and authentication information • An LDAP connection • A JDBC connection

ADEF - Page 389 of the ServiceNow Administration Fundamentals - Tokyo Edition.

ACDF A. Local Sources (i.e. XML, CSV, Excel): ServiceNow allows data to be imported from files in various formats, including XML, CSV, and Excel files. These files can be stored locally on the user's computer or on a network drive. D. JDBC Connection: ServiceNow also supports the import of data from databases using JDBC (Java Database Connectivity) connections. This enables data to be imported from a wide range of database types, such as Oracle, MySQL, and SQL Server. F. LDAP Connection: ServiceNow can also import data from LDAP (Lightweight Directory Access Protocol) directories, which are commonly used to store user and organizational data. This allows user and group data to be imported into ServiceNow from an LDAP directory. C. DataHub: ServiceNow's DataHub allows data to be imported from external sources, such as cloud-based applications, third-party databases, and other enterprise systems. This enables ServiceNow to act as a central hub for data integration across an organization.

Question #153

What are the components that make up a filter condition? (Choose three.)

A) Operator (Correct Answer)

B) Match Criteria

C) Value (Correct Answer)

D) Column

E) Field (Correct Answer)

Explanation

Correct Answer:

ACE

Community Discussion

Selected Answer: ACE

https://docs.servicenow.com/en-US/bundle/tokyo-platform-user-interface/page/use/using-lists/concept/c_Filters.html

A C E https://docs.servicenow.com/bundle/utah-platform-user-interface/page/use/common-ui-elements/concept/c_ConditionBuilder.html

Question #154

When impersonating a user for testing purposes, what is the best way to return the instance, logged in with your user account?

- A) Turn your computer off and on again
- B) Clear browser cache
- C) End Impersonation (Correct Answer)**
- D) Log out and back in

Explanation

Correct Answer:

C

Reference:

https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/users-and-groups/concept/c_ImpersonateAUser.html

Community Discussion

Got this at the exam today and actually wrote a comment at the end of the exam when I was given the opportunity. I have difficulties figuring out the question itself: - The question does indeed state "...Return the instance...", to the letter. - What on Earth is

"Return the instance" ? Is it a typo for "Return TO the instance" (the original one) ? -
 "Return TO the instance" to me would definitely mean answering "End Impersonation" -
 "Return THE instance" could mean anything (unless it's a specific technical term). And it could, in this case, be answer D. I did choose "End Impersonation", but I was really hesitating. I passed the exam, but am not sure at all what the correct answer was to this question. Speaking of which - this exam was way easier than the first one which I failed. I failed on Nov 17, not sure what happened then but I got questions that I have never seen or thought of.

C. You only have to logout and back in if your using Elevated role such as security_admin

Selected Answer: C

End impersonation

Selected Answer: C

It's end impersonation

Selected Answer: C

C is correct

SecExams

Question #155

What controls the publishing and retiring process for knowledge articles?

- A) Approval Policies
- B) Approval Definitions
- C) Workflow Designer
- D) Workflows (Correct Answer)**
- E) State Lifecycle

Explanation

Correct Answer:

D

Reference:

https://docs.servicenow.com/bundle/rome-servicenow-platform/page/product/knowledge-management/reference/r_KnowledgeWorkflows.html

Community Discussion

"The publishing and retirement processes for a knowledge article are controlled by workflows defined for the knowledge base that the article belongs to."

Selected Answer: D

https://docs.servicenow.com/bundle/utah-servicenow-platform/page/product/knowledge-management/reference/r_KnowledgeWorkflows.html

D is correct answer

Question #156

What type of query allows you to filter list data using normal words, instead of the condition builder?

A) Natural Language Query (Correct Answer)

- B) Alexa Query
- C) Machine Learning Query
- D) Predictive Intelligence Query
- E) Auto-suggest Query

Explanation

Correct Answer:

A

Community Discussion

Natural Language Query only exists in Utah release

Question #157

Tables may have a One to Many relationships. From the Service Catalog, what are examples of tables having a one to many relationships? (Choose three.)

- A) One Approval can have many Requests
- B) One Request can have many Requested Items (Correct Answer)**
- C) One Requested Item can have many Approvals (Correct Answer)**
- D) One Requested Item can have many Catalog Tasks (Correct Answer)**
- E) One Cart can have many Requests

Explanation

Correct Answer: BCD ?

Community Discussion

Selected Answer: BCD

I think B, C, D is the correct answer

Selected Answer: BCD

I think B, C, D is the correct answer

Selected Answer: BCD

BCD is correct

Selected Answer: BCD

BCD are the correct choice.

Selected Answer: BCD

should be BCD

Question #158

On a filter condition, which component is always a choice list?

A) Operator (Correct Answer)

- B) Filter Criteria
- C) Operation
- D) Match Criteria

Explanation

Correct Answer:

A

Reference:

https://docs.servicenow.com/bundle/rome-platform-user-interface/page/use/common-ui-elements/concept/c_ConditionBuilder.html

Community Discussion

Answer is A. Operator is a choice list based on the field type. For example: is, is not, is one of, greater than, is different, is empty string, on, after, starts with etc

Selected Answer: A

https://docs.servicenow.com/bundle/tokyo-platform-user-interface/page/use/using-lists/concept/c_Filters.html

Selected Answer: A

List filter are 1. Field 2. Operator 3. Value

Selected Answer: A

Answer is "A". Even the "correct" answer linked document states Operator (not Operation). Operator: a choice list based on the field type. For example, in the Incident [incident] table, the greater than operator does not apply to the Active field but it does apply to the Priority field.

The incorrect answers are frustrating. This is just blatant.

Question #159

A Role is defined as what?

A) A collection of permissions (Correct Answer)

- B) A set of user access policies
- C) A Persona in a workflow
- D) A set of access control rules

Explanation

Correct Answer:

A

Reference:

https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/roles/concept/c_Roles.html

Community Discussion

Selected Answer: A

A - is the correct answer according to SN fundamentals training. "A role is a collection of permissions in the Now platform".

Answer is A. A Role is a collection of permissions in the now platform to grant access to applications and other parts of the platform.

Selected Answer: A

SNAF - page 76 "A role is a collection of permissions."

Selected Answer: A

A Role is defined as what? A. A collection of permissions The response is A , update the questionnaire please

A is correct

Question #160

A user is complaining that they are seeing a blank page, when they click Create New, from your custom Inventory application. You have confirmed that they can see the Inventory application, and the Create New module on the application navigator. What could be the cause of this issue?

- A) Create New module has a broken link
- B) Known intermittent issue with UI15
- C) User should be using Chrome instead of Explorer for their browser
- D) User has read role, but not the write role on the Inventory table (Correct Answer)**
- E) User session has timed out

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: E

I would prefer to vote for none of the above but I have to vote for E as it is not quite accurate anymore but the wording is ok. Some other CSA answers are incorrect because the wording uses the wrong terms and D says "write" instead of "create", which makes this question literally incorrect.

Selected Answer: D

D is correct. As the user session has timed out, then a window will appear to prompt the user to login again with username and password.

Selected Answer: E

Is there a "none of the above" choice? "E" isn't correct anymore. And "D" is not quite accurate. The user would need the ability to "create", not "write". Not sure why ServiceNow decided to stray from CRUD. Maybe they like CRWD better?

Correct answer is D

D is correct

Question #161

What resource can you use to view details of the tables and configuration items (CIs) associated with a particular use case?

- A) Scenario Dashboard
- B) CI Use Case Modeler
- C) CMDB Use Case Modeler

D) Common Service Data Model (CSDM) product view (Correct Answer)

Explanation

Correct Answer:

D

Reference:

<https://docs.servicenow.com/bundle/quebec-servicenow-platform/page/product/csdm-implementation/reference/cmdm-use-case.html>

Community Discussion

Selected Answer: D

Common Service Data Model (CSDM) product view is the resource used to view details of the tables and configuration items (CIs) associated with a particular use case in ServiceNow. The CSDM provides a framework for organizing, defining, and visualizing an organization's services and related data. It helps to provide a common language and structure to facilitate communication between IT and business stakeholders, as well as to ensure that data is consistent and accurate across the organization.

Question #162

A manager wants to view a snapshot of month-end Sales performance data, as compared to Sales targets. In addition, the manager wants to be able to see those monthly numbers trended over time, and forecasted into the future. What capability do you suggest for this manager?

- A) Scheduled Reports, a custom snapshot table, and a Trend report
- B) Scheduled Reports and Excel
- C) Scheduled Reports, a custom snapshot table, and a Projection report
- D) Performance Analytics (Correct Answer)**
- E) Key Performance Indicators

Explanation

Correct Answer:

D

Reference:

https://docs.servicenow.com/bundle/rome-now-intelligence/page/use/performance-analytics/concept/c_ForecastingData.html

Community Discussion

Selected Answer: D

D is correct <https://docs.servicenow.com/en-US/bundle/vancouver-now-intelligence/page/use/performance-analytics/concept/pa-snapshots.html>

Selected Answer: B

What is the correct answer? Shouldn't be "B"?

Snapshot - isn't this part of reporting functionality? Not sure why the Answer is D

Question #163

What are advantages of using Flow Designer? (Choose three.)

- A) Supports advanced developers
- B) Enables complicated scripting
- C) Reduces technical debt (Correct Answer)**
- D) Less manual scripting (Correct Answer)**
- E) Smooth integration with 3rd party systems (Correct Answer)**

Explanation

Correct Answer: CDE [?](#)

Community Discussion

Correct answer is C, D & E

Selected Answer: CDE

The answer is C, D, and E

I agree with C, D and E - <https://www.servicenow.com/products/platform-flow-designer.html?state=seamless>

I think the answer given is correct A,D & E. The impact on technical debt will vary on a case by case basis hence it is possible for Flow Designer to have a positive or negative impact on technical debt depending on what is being developed and what compromises are being conceded when opting for a Flow Designer solution.

CDE correct

Question #164

Your customer requires that they be able to monitor which users are performing impersonations in their instance. What would you do to meet that requirement?

- A) Add the role Log Write [sn_log_write] to the Impersonator Group
- B) Create user update set for impersonation tracking
- C) Activate the glide.sys.log_impersonation prop (Correct Answer)**
- D) From User icon, select Elevate Roles
- E) On the Impersonator role record, right click and select Create Log

Explanation

Correct Answer:

C

Reference -

https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0717055

Community Discussion

Selected Answer: C

Read the ServiceNow Administration Fundamentals - Tokyo booklet, page 12. States, the sys_property glide.sys.log_impersonation needs to be added and set to true in order to see events

Selected Answer: C

C is correct

Selected Answer: C

Impersonation logging for interactive sessions Interactive sessions are performed through the user interface (UI). Enable or disable impersonation logging for interactive sessions using the glide.sys.log_impersonation property. If you enable impersonation logging for interactive sessions by setting glide.sys.log_impersonation to true, all interactive sessions are recorded in the impersonate log.

Question #165

When a flow runs an action, it generates a runtime value, which stays the same for the duration of the flow. What is the name of this runtime value?

- A) Trigger runtime value
- B) Sequence runtime value
- C) Starting runtime value
- D) Data pill runtime value (Correct Answer)**
- E) Input runtime value

Explanation

Correct Answer:

D

Reference:

<https://docs.servicenow.com/bundle/rome-servicenow-platform/page/administer/flow-designer/concept/data-population.html>

Community Discussion

Flow designers use action result data pills to provide input for other flows, actions, or subflows. Flow designers can use the sequence value in the data pill name to ensure that they select the correct data pill as an input value. When a flow runs an action, it generates the data pill runtime value, which remains the same for the duration of the flow. For example, if a data pill for [Trigger->Incident record] gets populated with incident record values at the start of a flow, the data pill preserves these values for the rest of the flow.

D is correct. Page 235 of the ServiceNow Administration Fundamentals - Tokyo Edition.

D is the correct answer

Question #166

The wait time for end users is based on the round-trip between the client and the server. What activities are included in the round-trips?

A) Request + Response (Correct Answer)

- B) Save + Update
- C) Write + Read
- D) Submit + Query
- E) Insert + Verify

Explanation

Correct Answer:

A

Reference:

<https://docs.servicenow.com/bundle/rome-application-development/page/script/client-scripts/concept/client-script-best-practices.html>

Community Discussion

A is correct. Page 433 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Selected Answer: A

I agree that "Request + Response" is correct.

Question #167

When importing data, what happens to imported rows, if no coalesce field is specified?

- A) All rows are rejected from the import, as coalesce field is required.
- B) All rows are treated as new records. No existing records are updated. (Correct Answer)**
- C) Duplicate rows are rejected from the import.
- D) All rows are treated as new records, but errors will be flagged in the import log.

Explanation

Correct Answer:

B

Reference:

https://developer.servicenow.com/dev.do#!/learn/learning-plans/quebec/new_to_servicenow/app_store_learnv2_importingdata_quebec_coalescing

Community Discussion

Correct answer is B. If no coalesce is defined, all imported rows are treated as new records. No existing records are updated.

Selected Answer: B

If no coalesce is defined, all imported rows are treated as new records. No existing records are updated.

Selected Answer: B

B is correct

B is correct. Page 392 of the ServiceNow Administration Fundamentals - Tokyo Edition.

B is correct

Question #168

What is the most common role that has access to almost all platform features, functions, and data?

- A) Security Admin [security_admin]
- B) Sys Admin [sys_admin]
- C) Admin [sn_admin]
- D) System Administrator [admin] (Correct Answer)**
- E) Base Admin [base_admin]

Explanation

Correct Answer:

D

Reference:

<https://developer.servicenow.com/dev.do#!/guides/quebec/now-platform/glossary/developer-glossary>

Community Discussion

Selected Answer: D

OOB there is no "sn_admin" role, but there is an "admin" role.

I think it should be D

I think it should be D

Selected Answer: D

D is correct The name of the role is 'admin' and the description for this role is "The System Administrator role. This role has access to all system features, functions, and data, regardless of security constraints. "Grant this privilege carefully." If you have sensitive information, such as HR records, that you need to protect, you must create a custom "admin" role for that area and train a person authorized to see those records to act as the administrator"

D is correct

Question #169

What feature do you use to specify which users are able to access a Service Catalog Item?

- A) Can Read Role
- B) Catalog User Role
- C) Can Order Tab

D) User Criteria (Correct Answer)

Explanation

Correct Answer:

D

Reference:

https://docs.servicenow.com/bundle/rome-servicenow-platform/page/product/service-catalog-management/task/t_AppUserCritItemsCat.html

Community Discussion

D is correct

Question #170

Which component of a table contains a piece of data for one record?

- A) Factor
- B) Field (Correct Answer)**
- C) Datapoint
- D) Element
- E) Item

Explanation

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/managing-data/concept/c_DataDictionaryTables.html

Community Discussion

B is correct. Page 343 of the ServiceNow Administration Fundamentals - Tokyo Edition.

B is correct

Question #171

What type of field has a drop down list, from which you can pick from pre-defined options?

- A) Choice (Correct Answer)**
- B) Picker
- C) Drop down
- D) Option

Explanation

Correct Answer:

A

Reference:

https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0538947

Community Discussion

a is correct. Page 163 of the ServiceNow Administration Fundamentals - Tokyo Edition.

A is the only one that is in the list of available options. https://docs.servicenow.com/bundle/vancouver-platform-administration/page/administer/reference-pages/reference/r_FieldTypes.html

A - Choice https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0538947#:~:text=Description,pre%2Ddefined%20set%20of%20option

A-choice is correct

All wrong? The answer is Select Box.

Question #172

User records are stored in which table?

A) User [sys_user] (Correct Answer)

B) User [sn_user]

C) User [u_sys_user]

D) User [s_user]

Explanation

Correct Answer:

A

Reference:

https://docs.servicenow.com/bundle/rome-platform-user-interface/page/administer/navigation-and-ui/concept/c_UserPreferences.html

Community Discussion

A. Its under section "Users & Groups"

sys_user - is correct

Question #173

What ServiceNow feature can be triggered by events, and is used to inform users about activities or updates in ServiceNow?

A) Notifications (Correct Answer)

- B) Alerts
- C) Texts
- D) Events
- E) Emails

Explanation

Correct Answer: A [?](#)

Community Discussion

Selected Answer: A

It's A

a is correct. Page 292 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Selected Answer: A

Notifications

Selected Answer: A

It should be Notification.

It's A

Question #174

Which ServiceNow capability allows you to provide knowledge articles, via a conversational messaging interface?

- A) Agent Assist
- B) Virtual Agent (Correct Answer)**
- C) Now Messenger
- D) Connect Agent

Explanation

Correct Answer:

B

Reference:

<https://docs.servicenow.com/bundle/rome-release-notes/page/release-notes/analytics-intelligence-reporting/virtual-agent-rn.html>

Community Discussion

Selected Answer: A

A is the correct answer: Page 48 of the ServiceNow Administration Fundamentals - Vancouver edition: Lab step 2: Select the Agent Assist Icon to display the Agent Assist panel, then select and read the "Mobile Event App for Staff- Error 555" article. Lab Step 3: Select attached to share this information with the Caller

I think the answer is B. Agent assist provides agents with automatic search results that show possible solutions for records they open. Configure Agent assist in Configurable Workspace by configuring a record page with a Glide form data source and a Contextual Sidebar. For more information, see Agent assist Overview on the ServiceNow Developer Site. Benefits of Virtual Agent Redefine your support experience Provide intelligent exchanges powered by generative AI and automated resolutions to common issues. Provide self-service anytime Let users get resolutions in seconds. No need to wait for an available live agent. See immediate business value Get instant ROI with guided setup, prebuilt conversations, integrations, and configuration tools. Increase deflections and

agent productivity Route issues to a chatbot automatically. Reduce call volumes and increase efficiency.

A is the correct answer: Page 48 of the ServiceNow Administration Fundamentals - Vancouver edition: Lab step 2: Select the Agent Assist Icon to display the Agent Assist panel, then select and read the "Mobile Event App for Staff- Error 555" article. Lab Step 3: Select attached to share this information with the Caller.

b is correct

Selected Answer: B

Question #175

Which role can manage multiple knowledge bases?

- A) knowledge_base_admin
- B) kb_admin
- C) sn_kb_admin

D) knowledge_admin (Correct Answer)

Explanation

Correct Answer:

D

Reference:

https://docs.servicenow.com/bundle/rome-servicenow-platform/page/product/knowledge-management/reference/r_KnowledgeRoles.html

Community Discussion

https://docs.servicenow.com/en-US/bundle/sandiego-servicenow-platform/page/product/knowledge-management/reference/r_KnowledgeRoles.html knowledge-admin

D. Answer is under "What is Knowledge Management" section

https://docs.servicenow.com/bundle/vancouver-servicenow-platform/page/product/knowledge-management/reference/r_KnowledgeRoles.html

Question #176

Which statement correctly describes the differences between a Client Script and a Business Rule?

- A) A Client Script executes before a record is loaded and a Business Rule executes after a record is loaded
- B) A Client Script executes on the server and a Business Rule executes on the client
- C) A Client Script executes on the client and a Business Rule executes on the server (Correct Answer)**
- D) A Client Script executes before a record is loaded and a Business Rule executes after a record is updated

Explanation

Correct Answer:

C

Reference:

https://community.servicenow.com/community?id=community_question&sys_id=77a80361db5cdb5c01dcaf3231f9619d9#:~:text=The%20major%20difference%20between%20of,deleted%2Fqueried%20from%20data%20base.&text=After%20that%2C%20t20work%20onSubmit

Community Discussion

C is correct. Pages 437 & 438 of the ServiceNow Administration Fundamentals - Tokyo Edition.

C. A Client Script executes on the client and a Business Rule executes on the server - is correct

Selected Answer: C

A Client Script executes on the client (the user's browser) and is primarily used for UI interactions and enhancements, while a Business Rule executes on the server and is

used to enforce business logic and data integrity, often triggering when a record is saved, updated, or deleted

Question #177

What are benefits of assigning work tasks to a group, rather than to an individual? (Choose four.)

A) Group members can choose their tasks from My Groups Work (Correct Answer)

B) Groups can assign tasks to users based on on-call schedules (Correct Answer)

C) Site support members can pick tasks, based on Location

D) Groups can assign tasks to users based on skills (Correct Answer)

E) Group members can avoid tasks, which are nearing SLA breach

F) Groups can assign tasks to users based on availability (Correct Answer)

Explanation

Correct Answer: ABDF [?](#)

Community Discussion

Correct answer is ABDF

Selected Answer: ABDF

C and E are also true but aren't realistic. The commonsense answers would be ABDF.

Selected Answer: ABDF

answer is ABDF

Selected Answer: ABDF

ABDF is correct!

Any thoughts about E?

Question #178

What ServiceNow feature allows you to include data from a secondary related table on a report?

- A) SQL
- B) Dot Walking (Correct Answer)**
- C) Outer Join
- D) Joins

Explanation

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/rome-now-intelligence/page/use/reporting/concept/c_HowToAccessRelatedTables.html

Community Discussion

B- is correct

Question #179

What attributes can you manage, using System Properties > Basic Configuration UI16? (Choose five.)

- A) Browser tab title (Correct Answer)**
- B) Module text color (Correct Answer)**
- C) Preferred browser
- D) Base theme (Correct Answer)**
- E) Font style
- F) Animation style
- G) Header background color (Correct Answer)**
- H) Banner Image (Correct Answer)**

Explanation

Correct Answer:

ABDGH

Reference:

https://docs.servicenow.com/bundle/rome-platform-user-interface/page/administer/navigation-and-ui/task/t_ConfigureLogoColorsSysDfltUI16.html

Community Discussion

Selected Answer: ABDGH

I agree that "Browser tab title", "Module text color", "Base theme", "Header background color", and "Banner image" are correct.

Selected Answer: ABDGH

correct

Selected Answer: ABDGH

this is correct

Question #180

Which field (or fields) is used as a unique key during imports?

A) Match Fields

B) Coalesce Fields (Correct Answer)

C) Key Fields

D) Sys IDs

Explanation

Correct Answer:

B

Reference:

https://developer.servicenow.com/dev.do#!/learn/learning-plans/quebec/new_to_servicenow/app_store_learnv2_importingdata_quebec_coalescing

Community Discussion

B is correct. Page 392 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Selected Answer: B

I agree that "Coalesce Fields" is correct.

Question #181

You are asked to create an option in the Service Catalog, which will allow a user to click Get Help and describe the issue they are having. These forms should create incident records, which are automatically routed to the Service Desk. Which method would you use?

A) Create Record Producer (Correct Answer)

- B) Create Catalog Item
- C) Create Order Guide
- D) Create Content Item

Explanation

Correct Answer: A [?](#)

Community Discussion

Selected Answer: A

Populate record producer data and redirect users You can enter data for all records created by the record producer, and redirect an end user to a particular page after the record producer is submitted.

Selected Answer: A

Sigh. It's A.

Selected Answer: A

A is correct. . Catalog Item will end up in opening a request and request item and attaches a workflow and catalog task, approvals Where as a Record producer simply insert a record in the selected table.

Selected Answer: A

A is correct here

Selected Answer: A

a is correct

Question #182

What is the result of the order in which access controls are evaluated?

- A) Ensures user has access to the fields in a table, before considering their access to the table
- B) Ensures user can get to work as quickly as possible
- C) Ensures user has access to the application, before evaluating access to a module within the application

D) Ensures user has access to a table, before evaluating access to a field in the table (Correct Answer)

Explanation

Correct Answer: D [?](#)

Community Discussion

Selected Answer: D

In ServiceNow, when a user tries to access a table or field, the access is evaluated first at the table level, and then at the field level. - chatgpt

It's A. As ServiceNow evaluates from specific to general. As seen in page 319 in the SNAF eBook.

Selected Answer: D

D is correct

D is correct. Page 429 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Selected Answer: A

Pretty sure it is field then table. You can see the diagram here: <https://www.servicenow.com/community/developer-forum/which-acl-rules-will-be-execute-either-field-level-or-table/m-p/1898751> Also, this link: https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0541355 was updated as of May 2023, which makes it the most current version under the Utah release. It also states field then table.

Question #183

Which tool graphically displays an infrastructure view for a configuration item (CI) and its relationship with other CIs?

- A) Schema Map
- B) Dependency View (Correct Answer)**
- C) Dependency Map
- D) Database View

Explanation

Correct Answer:

B

Reference:

https://docs.servicenow.com/bundle/rome-servicenow-platform/page/product/business-service-management-map-ng/concept/c_BusinessServiceManagementMaps.html

Community Discussion

Selected Answer: B

In ServiceNow, a "Dependency View" is a graphical representation of the dependencies between Configuration Items (CIs) in an IT infrastructure. A dependency view provides a visual representation of the relationships between CIs and the services they support,

enabling IT teams to quickly understand the impact of changes, troubleshoot issues, and plan for future improvements.- chatgpt

Selected Answer: B

The latest link is: https://docs.servicenow.com/bundle/vancouver-servicenow-platform/page/product/business-service-management-map-ng/concept/c_BusinessServiceManagementMaps.html

B is correct. Page 427 of the ServiceNow Administration Fundamentals - Tokyo Edition.

B is correct answer

Selected Answer: B

correct

Question #184

What are examples of Core tables in the ServiceNow platform?

- A) Configuration, Connect, Chat
- B) Team, Party, Awards
- C) User, Task, Incident (Correct Answer)**
- D) Work, Caller, Timecard

Explanation

Correct Answer: C [?](#)

Community Discussion

Shouldn't the answer be C?

Yeah it is C

Yeah it is C

Selected Answer: C

This is an ambiguous question and therefore should not be in the exam I believe. It looks like there are two definitions of the core table: 1.) tables, which are base tables and doesn't have a parent. In this case c) would be wrong as Incident is a child of task 2.) Core tables are tables that come with the base system. In this case c) is the correct answer

Selected Answer: C

C is the answer

Question #185

Which tab on the knowledge base record, would you use to identify the sets of users who are able to read articles in that knowledge base?

- A) Access List
- B) Can Access
- C) Accessible to
- D) Can Read (Correct Answer)**

Explanation

Correct Answer:

D

Reference:

https://docs.servicenow.com/bundle/rome-servicenow-platform/page/product/knowledge-management/task/t_SelectUserCriteria.html

Community Discussion

D. "knowledge bases use user criteria records to determine which sets of users can read or contribute..." its under "Knowledge Security and Visibility: User Criteria" section

D. is correct

Question #186

What are the main components of the Form Design interface? (Choose three.)

- A) Field Layout
- B) Page Header (Correct Answer)**
- C) Field Navigator (Correct Answer)**
- D) Field Picker
- E) Form Layout (Correct Answer)**

Explanation

Correct Answer:

BCE

Reference:

https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/form-administration/concept/c_FormDesign.html

Community Discussion

BCE is correct. Page 168 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Selected Answer: BCE

I agree that "Page Header", "Field Navigator", and "Form Layout" are correct.

Selected Answer: BCE

https://docs.servicenow.com/bundle/vancouver-platform-administration/page/administer/form-administration/concept/c_FormDesign.html

Question #187

What is used to determine user access to knowledge bases or a knowledge article?

- A) sn_kb_read, sn_article_read
- B) Privacy Settings

C) Read Access Flag

D) User Criteria (Correct Answer)

Explanation

Correct Answer:

D

Reference:

<https://docs.servicenow.com/bundle/rome-servicenow-platform/page/product/knowledge-management/concept/user-access-knowledge.html>

Community Discussion

Selected Answer: D

<https://docs.servicenow.com/bundle/sandiego-servicenow-platform/page/product/knowledge-management/concept/diagnose-knowledge-user-criteria.html>

D. is correct

Question #188

What are the three key tables in an enterprise CMDB? (Choose three.)

A) cmdb (Correct Answer)

B) sn_cmdb_bak

C) cmdb_rel_ci (Correct Answer)

D) sn_cmdb

E) cmdb_bak

F) cmdb_ci (Correct Answer)

G) sn_cmdb_ci

Explanation

Correct Answer:

ACF

Reference:

https://community.servicenow.com/community?id=community_question&sys_id=7ab22ad5dbf20498d82ffb2439961938

Community Discussion

Selected Answer: ACF

ACF is correct

ACF is correct. Page 407 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Question #189

What is the best practice related to using the Default Update Set for moving customizations between instances?

- A) Merge Default update sets before moving between instances
- B) Submit Default update set to application repository
- C) You should not use the Default Update sets for moving between instances (Correct Answer)**
- D) Keep Default update set to maximum of 20 records, for troubleshooting purposes

Explanation

Correct Answer: C [?](#)

Community Discussion

Selected Answer: C

admins should use named update sets for moving customizations between instances.

Selected Answer: C

C is correct

Selected Answer: C

C; the default update set is a catch all for admin only, not for migrating changes.

Maybe C instead?

C is correct. Page 454 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Question #190

On what part of the ServiceNow instance, would you find the option to Impersonate User?

- A) Module
- B) Content Frame
- C) Application Navigator
- D) Banner (Correct Answer)**

Explanation

Correct Answer:

D

Reference:

https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/users-and-groups/concept/c_ImpersonateAUser.html

Community Discussion

Q277 is a duplicate of Q190 but they have different answers. Q190 answer is Banner and Q277 answer is User Menu. Neither gives these options in the other question. Both answers are right, however. Open the User menu by clicking your user avatar in the ServiceNow banner. Select the Impersonate user menu item. In the Select a user to impersonate dialog, enter the name of the user to impersonate in the Search for a user field. Select the user from the list and click the Impersonate user button.

D. is correct

Question #191

Which application is used primarily to load data into ServiceNow?

- A) Import Hub
- B) System Import Sets (Correct Answer)**
- C) Data Import Configuration
- D) Import Management

Explanation

Correct Answer:

B

Reference:

<https://docs.servicenow.com/bundle/rome-platform-administration/page/administer/import-sets/reference/import-sets-landing-page.html>

Community Discussion

B. is correct

Question #192

If a knowledge base has no access details specified, what users are able to read articles in that knowledge base?

- A) itil users
- B) Any user with an article's permalink
- C) Any active user (Correct Answer)**
- D) No users
- E) Users with kb_user role

Explanation

Correct Answer:

C

Reference:

https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0623654

Community Discussion

Selected Answer: C

I agree that "Any active user" is correct.

Selected Answer: C

Any active user

Selected Answer: C

<https://docs.servicenow.com/bundle/tokyo-servicenow-platform/page/product/knowledge-management/concept/user-access-knowledge.html>

Question #193

How would you define an Access Control, to allow a user with itil role to have permission to create incident records?

A) Name: incident.None; Operation: create; Role: itil (Correct Answer)

B) Name: incident.Any; Operation: write; Permission: itil

C) Name: incident.*; Permission: write; Role: itil

D) Name: incident.None; Permission: create; Role: itil

E) Name: incident.*; Operation: write; Permission: itil

Explanation

Correct Answer:

A

Community Discussion

A is correct

Selected Answer: A

Option A is Correct. Operation only arrives not Permission.

Question #194

What Service Catalog feature do you use to organize items into logical groups?

A) Categories (Correct Answer)

B) Variable Sets

C) Sections

D) Catalog items

Explanation

Correct Answer:

A

Community Discussion

A is correct. Page 204 of the ServiceNow Administration Fundamentals - Tokyo Edition.

A is correct

Question #195

When creating a new notification, what must you define? (Choose three.)

A) The associated knowledge base

B) Settings for handling inactive user accounts

C) Under what conditions is the notification sent (Correct Answer)

D) Who receives the notification (Correct Answer)

E) What the content of the notification (Correct Answer)

Explanation

Correct Answer:

CDE

Community Discussion

Selected Answer: CDE

I agree that C,D,E are correct.

CDE Under 6.2 Creating Notifications

Question #196

The ServiceNow platform supports a wide variety of plug-and-play applications. You can choose from the included workflows of build your own workflow: Which of these workflows are included in the platform? (Choose three.)

- A) Federal Workflows
- B) Customer Workflows (Correct Answer)**
- C) Infrastructure Workflows
- D) Manufacturing Workflows
- E) Employee Workflows (Correct Answer)**
- F) IT Workflows (Correct Answer)**

Explanation

Correct Answer:

BEF

Community Discussion

Selected Answer: BEF

BEF is correct. The service now products are broadly categorized into these workflow

Selected Answer: BEF

correct

Question #197

An IT manager is responsible for the Network and Hardware assignment groups, each group contains 5 team members. These team members are working on many tasks, but the manager cannot see any tasks on the Service Desk > My Groups Work list. What could explain this?

- A) The Assignment Group manager field is empty.
- B) The manager does not have the itil role.
- C) The manager is not a member of the Service Desk group.
- D) The manager is not a member of the Network and Hardware groups. (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

There is the same question on secexams with a picture where you can see the filter, but there is one more answer which is not displayed in this questions. The same question you could find here (question 87): <https://www.secexams.com/discussions/servicenow/view/77737-exam-csa-topic-1-question-87-discussion/> There the most voted answer with 60% is "The Service Desk > My Groups Work list shows active work tasks that are not yet assigned." And this answer is not displayed here. So I would vote for D in this question.

Selected Answer: D

Looks like they rewrote the question as it was confusing. Definitely much easier to understand and answer now.

Selected Answer: D

Someone of you might choose for B ('The manager does not have the itil role', in my point of view B could not be correct, because, if you don't have the ITIL role, you would not see My Groups work, it will not appear.

B is wrong. The manager clearly has ITIL role if he can see "Service Desk > My Groups Work list." The correct answer is D> Once he is a member of the groups, he can see the work assigned to the group that is unassigned

D is correct answer

Question #198

You have been asked to configure a form so an employee could order tablet and select the standard accessory options to purchase with it. These standard options are: carrying case, screen cleaner, tablet stand, and screen protector. What approach would you take? (Choose three.)

A) Create Catalog Item for the Tablet, and add a variable set to the form, for the accessory options. (Correct Answer)

B) Create a Record producer, and on the form, add a check box variable for each accessory option.

C) On Shopping Cart configuration, select option to show the Add Accessories button.

D) Create one Catalog item for each: tablet, carrying case, screen cleaner, tablet stand, and screen protector. (Correct Answer)

E) Create Catalog Item for the tablet, and on the form, add a check box variable for each accessory option. (Correct Answer)

Explanation

Correct Answer: ADE ?

Community Discussion

Selected Answer: ADE

Record producer should not be used for ordering catalog items, so I think the correct answer is: A, D, E

What in the world. You would create an order guide. All answers are wrong

Selected Answer: ADE

ADE for moisture

Selected Answer: ADE

Option B should not be chosen in any case, because a 'Record Producer' is defined as following: 'A record producer is a specific type of catalog item that allows end users to create task-based records, such as incident records, from the service catalog. The look and feel of a record producer is similar to that of a catalog item. But the record producer generates a task record such as incident, instead of a requested item.' So I would vote for ADE

Are you sure? I think it is A,B,E

Question #199

Which ServiceNow utility provides a modern interactive graphical interface to visualize configuration items and their relationships?

A) Dependency View (Correct Answer)

- B) CI Class Map
- C) Business Service Map
- D) CSDM Schema

Explanation

Correct Answer:

A

Community Discussion

A is correct

Question #200

What is the definition of a group?

- A) A collection of subject matter experts
- B) A team of users
- C) An escalation pod
- D) A collection of users (Correct Answer)**
- E) A department

Explanation

Correct Answer:

D

Selected Answer: D

D is correct

D. is correct

Question #203

You have been asked to create a way for users to order a new iPhone, but only if they get two levels of approval. The approvers and users should be automatically notified at each approval level. What feature would you use to manage the approvals and notifications?

- A) Approval Chains
- B) Flows (Correct Answer)**
- C) Approver Delegates
- D) Parent-Child Approvers
- E) Approval Criteria

Explanation

Correct Answer:

B

Community Discussion

B is correct: Resolution Creating the Knowledge simple approval workflow 1. In the Application Navigator filter text, type workflow to find the Workflow application menu. 2. Select the Workflow Editor module. The Workflow Editor always opens in an adjacent browser tab. 3. Click the New button. https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0538552

B. is correct

Question #204

Groups are stored in what table?

- A) User Group [user_groups]
- B) Groups [sys_user_groups]
- C) Group [sn_sys_user_group]
- D) Group [sys_user_group] (Correct Answer)**
- E) User Groups [sn_user_groups]

Explanation

Correct Answer:

D

Community Discussion

D is correct. Page 75 of the ServiceNow Administration Fundamentals - Tokyo Edition.

D. is correct

Question #205

When managing tags, you can adjust who is able to see it. What are the visibility options? (Choose three.)

- A) Groups and Users (Correct Answer)**
- B) Me (Correct Answer)**
- C) Roles and Permissions
- D) Everyone (Correct Answer)**
- E) Admins

Explanation

Correct Answer:

ABD

Community Discussion

Selected Answer: ABD

Yeah the Answer is A,B,D.

ABD are correct

Selected Answer: ABD

I agree that "Groups and Users", "Me", and "Everyone" are correct.

Question #206

What module enables an administrator to define destinations for imported data on any ServiceNow table?

- A) Field Transform
- B) Schema Map
- C) Transform Map (Correct Answer)**
- D) Import Map

Explanation

Correct Answer:

C

Community Discussion

C is correct <https://docs.servicenow.com/bundle/utah-employee-service-management/page/product/human-resources/reference/transform-maps-navex.html>

Selected Answer: C

c is correct

Question #207

On the Form header, which icon do you use to access form templates?

- A) Stamp
- B) Pages
- C) More Options (...) (Correct Answer)**
- D) Paperclip

Explanation

Correct Answer:

C

Community Discussion

YOU WRONG. CAN'T EVEN FIND A STAMP ICON

YOU WRONG. CAN'T EVEN FIND A STAMP ICON

Selected Answer: C

Check out page 33 in the Bonus section 5.2, of the ServiceNow Administration Fundamentals - Tokyo. It states, "Click the More options icon (...) from the form header, then Toggle Template Bar to work with templates."

Answer is C https://docs.servicenow.com/bundle/tokyo-platform-user-interface/page/use/using-forms/concept/c_UI16FormHeader.html

C, user the More Options button then "Toggle Templates Bar", have you ever seriously used SNOW before or just trolling?

Question #208

When using the Data Pill Picker, use which keys to dot-walk to fields in other tables?

- A) Plus, Minus
- B) Ctrl <, Ctrl >
- C) Arrows (Correct Answer)**
- D) Ctrl C, Ctrl V
- E) Shift F4, Shift F5

Explanation

Correct Answer:

C

Community Discussion

C. is correct

C is correct. Page 235 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Question #209

In what order are Access Controls evaluated?

- A) Field-level - most specific to most general; then Table-level - most specific to most general
- B) Field-level - most general to most specific; then Row-level - most specific to most general
- C) Table-level - most specific to most general; then Field-level - most specific to most general (Correct Answer)**
- D) Table-level - most specific to most general, then Row-level - most specific to most general

Answer is C

C is correct. Page 429 of the ServiceNow Administration Fundamentals - Tokyo Edition.

c is correct

C is the right answer

Question #210

What instance resource allows you to access guided tours, information about actions, and instructions on how to use inputs and outputs in your flow?

- A) Docs
- B) Community
- C) Help Panel (question mark icon) (Correct Answer)**
- D) Wiki

Explanation

Correct Answer:

C

Community Discussion

C. Section "Flow Components: Data"

C. is correct

Question #211

The Report Designer contains different sections for configuring your report. Which section is used to specify grouping and calculations to be run against the data?

- A) Style
- B) Group by
- C) Configure (Correct Answer)**
- D) Format
- E) Data

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

Based on SN ebook pg 267

Answer is C. https://developer.servicenow.com/dev.do#!/learn/courses/tokyo/app_store_learnv2_reportanalytics_tokyo_reporting_and_analytics/app_store_learnv2_reportanalytics_tokyo_data_visualization/app_store_learnv2_reportanalytics_tokyo_configuring_reports

Answer is C. Configure. <https://docs.servicenow.com/bundle/tokyo-now-intelligence/page/use/reporting/reference/aggregation-reporting.html>

There are only 4 sections and they are DATA, TYPE, CONFIGURE, and STYLE. And Group by do not include calculations Aggregation does. Both Group by and Aggregation are both under the Configure section therefore making C. Configure the answer.

The answer is the Configure section. The data section does not provide any of what the question is asking. Group by is not a section its a subsection under Configure.

Question #212

What icon do you use to change the icon and color on a Favorite?

- A) Clock
- B) Pencil (Correct Answer)**
- C) Triangle
- D) Star

Explanation

Correct Answer:

B

Community Discussion

B is correct

Question #213

You have heard about a new application released by ServiceNow. You want to try it out, to see if it might be useful for your company's ServiceNow implementation. What would be the best way to get hands-on experience with the new application?

- A) Search the wiki for the sales demo request form
- B) Check the latest release notes at docs.servicenow.com
- C) Activate the application plug in, on your personal dev instance (Correct Answer)**
- D) Activate the application plug in, on your company's production instance.

Explanation

Correct Answer:

C

Community Discussion

I think that "get hands-on experience" are the main key words in this question, so answer "C" should be ok :)

I think that "get hands-on experience" are the main key words in this question, so answer "C" should be ok :)

I think it A

Answer is B: Check the latest release notes at docs.servicenow.com

C is correct

Question #214

When looking at a long list of records, you want to quickly filter, to show only those which have Category of Hardware. How might you do that?

- A) On the Category column header, right click and select Show > Hardware
- B) Right click on magnifier, type Hardware and click enter
- C) On the list, locate and right click on the value Hardware, select Show Matching (Correct Answer)**
- D) On Breadcrumb, click > icon, type Hardware and click enter
- E) Click Funnel icon, type Hardware and click enter

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

Answer is C

C is correct

Question #215

When looking at a long list of records, you want to quickly filter, to show only those which have Short Description containing email. How might you do that?

A) Click List Magnifier to expand column search, on Short Description, type email, click enter

B) On Search box, select text, type email, click enter

C) Click List Magnifier to expand column search, on Short Description, type *email, click enter (Correct Answer)

D) Click List Magnifier to expand column search, on Short Description, type %email, click enter

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

It's C. With the short description you can't do "show matching" as in the previous question, you need to search for records that have the word "e-mail" in the short description. and this is done by searching "*e-mail" (wildcard e-mail) in the Short Description column.

C is correct

Question #216

When importing spreadsheet data into ServiceNow, what is the first step in the process?

- A) Run Data Scrubber
- B) Set Coalesce
- C) Select Import Set
- D) Load Data (Correct Answer)**
- E) Define Data Source

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: C

I would go with C here. The Module you use to load data is indeed called "Load Data" module, but once you open it, the first thing it asks you to do is select (or create a new) Import Set table, then you need to choose a data source, and only after you do these 2 things you can click "Submit" which Loads the data....

Selected Answer: C

You have to create or select an Import Set prior to selecting the Data Source. Once the Import set is defined you update or add the data source.

Selected Answer: D

D is correct

Selected Answer: D

D is correct

D is correct

Question #217

Tables may be set up with Many to Many relationships. What is a classic example of a scenario where the tables would have many to many relationships?

A) Vendors can sell multiple products; and products can be sold by multiple vendors. (Correct Answer)

B) A Task can trigger many Workflows; and a Workflow can trigger many Tasks.

C) Requests can contain many Items; and Items can be any item from the catalog.

D) A Configuration Item can belong to multiple Classes, and Classes can contain multiple Configuration Items.

Explanation

Correct Answer: A [?](#)

Community Discussion

Selected Answer: A

option A is the example used in the Data schema overview lesson under Additional SN fundamentals content for Sys Admins & Developers.

Selected Answer: A

A should be the correct answer

Selected Answer: A

A should be the correct answer. Workflows and tasks are not two-way (i.e. a task can trigger a workflow, but this workflow will not trigger the same task - otherwise you have a loop...)

Selected Answer: A

Can't be B as this would 1) cause a loop but also 2) it would be the workflow generating the task that triggers another (sub)flow, not the task itself. Workflow-to-task is one-to-many.

Question #218

What section on a task record would you use to see the most recent update made to a record?

- A) Audit Log
- B) Timeline
- C) Activity (Correct Answer)**
- D) Journal

Explanation

Correct Answer:

C

Community Discussion

C is correct

Question #219

The Employee On-boarding team has asked for a way for managers to order computers, monitors, business cards, and cell phones for new employees. How would you proceed to meet this requirement?

- A) Create Requested Item
- B) Create Record Producer
- C) Create On-boarding Bot
- D) Create Order Guide (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

D. is correct

Question #220

On the CI Dependency View, what enables you to trace from an infrastructure item, like a Server, to the Services that are dependent on that Server?

A) Automapping Utility

B) Relationships (Correct Answer)

C) Service Tracer

D) Transform Map

Explanation

Correct Answer:

B

Community Discussion

B is correct

Question #221

From a related list, what would a user click to personalize the layout of the columns?

A) Gear (Correct Answer)

B) Context Menu

C) Pencil

D) Magnifier

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

A is correct

A is the correct answer

Selected Answer: A

Correct answer is A

Question #222

What is the language used for scripting in ServiceNow?

A) C++

B) JavaScript (Correct Answer)

C) PHP

D) Python

Explanation

Correct Answer:

B

Community Discussion

B is the correct answer

Selected Answer: B

B IS CORRECT

Question #223

What are examples of UI Actions, relating to Lists? (Choose four.)

- A) List Links (Correct Answer)
- B) List Choices (Correct Answer)
- C) List Buttons (Correct Answer)
- D) List Override
- E) List Context Menu (Correct Answer)
- F) List Control

Explanation

Correct Answer: ABCE ?

Community Discussion

Selected Answer: ABCE

ABCE are the right answers, check page 436 of the ebook to confirm

Selected Answer: ABCE

List links - List Choice - List button - List Style - List Context menus

Selected Answer: ABCE

Confusing question as it uses plurals which are not part of the UI action > New record.

ABCE UI action controls You can create a UI action to provide any of these controls: A button on a form. A context menu item on a form that appears when you open the form context menu or right-click the form header. A related link in a form. A button in the banner on top of a list. A button at the bottom of a list. A context menu item on a list that appears when you open the list context menu or right-click the list header. A menu item for the action choice list at the bottom of a list. A related link at the bottom of a list. https://docs.servicenow.com/en-US/bundle/tokyo-platform-administration/page/administer/list-administration/concept/c_UIActions.html

ABCE is correct links buttons context menu

Question #224

A Service Catalog project will involve building 80 catalog items. For each of the catalog items, the following fields will be mandatory on the forms:

- Requested for
- Requested by
- Approving manager
- Delivery instructions

All of the other variables will be specific to the individual catalog item. What features would you use when designing the catalog item form?

- A) Create a Variable Set Template, then apply to all of the catalog items.
- B) Create one Variable Set for the four variables, then add that variable set to each of the 80 catalog items. (Correct Answer)**
- C) Create a Record Producer that contains the four fields; then add to the record producer related list on the Catalog Items.
- D) Create a Flow Designer Action, with Variable Set Data Pill, then apply flow to all of the 80 catalog items.
- E) Create an Order Guide, which includes all variables; then copy and hide variables as needed.

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

Variable set is correct.

Selected Answer: B

B is correct based on the definition of variable set

Question #225

A task worker asks how they can monitor any updates occurring to records assigned to him, like responses from customers. What do you suggest?

A) On My Work list, select the Activity Stream icon to show a frame with live updates (Correct Answer)

- B) Click on the eyeglass icon to expand the Monitor frame
- C) Open an Agent workspace tab for each record he wants to monitor
- D) Select Service Desk > My Work Dashboard

Explanation

Correct Answer:

A

Community Discussion

A is the correct answer

A is correct

Question #226

What access does a user need to be able to import articles to a knowledge base?

- A) sn_knowledge_import
- B) sn_knowledge_contribute
- C) Can contribute (Correct Answer)**
- D) Can import

Explanation

Correct Answer:

C

Community Discussion

C is correct

Selected Answer: C

To import articles into a ServiceNow knowledge base, users typically need the "Can contribute" access, often granted through the sn_knowledge_contribute role. This role allows users to create, edit, and import articles into the knowledge base. Additionally, users might need specific roles or configurations depending on the method used for importing, such as "Knowledge" role for basic creation or "Knowledge Manager" for managing the base

Question #227

When importing data from a spreadsheet, which step defines where the incoming data columns will be written in the receiving table?

- A) Schedule Transform
- B) Field Matching
- C) Select Data Source
- D) Create Transform Map (Correct Answer)**
- E) Load Data

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: B

Answer is B. Field Matching is the step that defines where the incoming data columns will be written in the receiving table when importing data from a spreadsheet. During the field matching step, you map the columns in the source file to the fields in the target

table. This allows you to specify which columns in the source file correspond to which fields in the target table, ensuring that the data is imported correctly.

Selected Answer: D

Answer should be Field Mapping. But we dont have that option. So its D because Transform Map is a set of field maps.

D. is correct https://developer.servicenow.com/dev.do#!/learn/learning-plans/tokyo/new_to_servicenow/app_store_learnv2_importingdata_tokyo_create_a_transform_map

Can I say NONE of the above? In reality you can create a transform map record by just specifying the source and target tables and clicking submit. You need to do the field mapping before you transform. But it's Field MAPPING not Field Matching and it's done in the Transform Map (so it has to be there) through Auto Field Map Matching or Mapping Assist links. Very confusing question...

Selected Answer: D

D - Create Transform Map is the correct answer. B - Field Matching: For Event Management, when creating Event Rule to bind non-host CI using CI field matching, if there are multiple CI records having same name.

Question #228

To apply a UI Policy to all views, which field should be set to true in its definition record?

A) Global (Correct Answer)

- B) Reverse if false
- C) On load
- D) Inherit

Explanation

Correct Answer: A [?](#)

Community Discussion

Selected Answer: A

Global

Selected Answer: A

Per my PDI, "if the 'Global' checkbox is selected, the UI Policy applies to all form views; otherwise the UI Policy is view-specific".

Answer is A. If UI policy applies to extended table then answer is D. So here answer is A.

Answer is A. Global [Advanced view] Option for specifying whether the UI policy applies to all form views. If this check box is cleared, the UI policy is view-specific. By default, the Global UI policy applies to all form views. However, a UI policy can be specific to a view. For example, you can define a UI policy for only the itil view of a form. Use the View field to accomplish this.

Selected Answer: A

Answer is A

Question #229

What are the steps for importing data using an import set?

- A) Select source file; Run automap; Transform data; Clean up target table
- B) Identity source; Import transform map; Run transformer, Verify import
- C) Setup LDAP; Test map; Create update set; Run import; Apply update set

D) Load the data; Create transform map; Transform data; Clean up import table (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

D. https://docs.servicenow.com/bundle/tokyo-platform-administration/page/administer/import-sets/concept/c_ImportDataUsingImportSets.html

To import data into ServiceNow using import sets, the key steps involve loading data into a staging table, creating a transform map to connect the staging data to the target table, and then running the transform to move the data

Question #230

Which type of scripts run in the browser?

- A) Script Include Scripts
- B) Access Control Scripts
- C) Business Rule Scripts

D) UI Policies and Client Scripts (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

Correct answer is D

Question #231

Which modules can you use to create a new table? (Choose two.)

- A) Dictionary
- B) Schema Map

C) Tables (Correct Answer)

D) Tables & Columns (Correct Answer)

Explanation

Correct Answer:

CD

Community Discussion

CD is correct

I just hopped in my instance and tested. Tables Tables & Columns Dictionary Are all valid ways to find the button to create a new table (Utah)

Selected Answer: CD

CD is the answer

AC table creation

Question #232

Which one of the following describes the primary operations performed against tables in the ServiceNow platform?

- A) Create, Read, Upload, Delete
- B) Capture, Rate, Write, Develop
- C) Create, Rate, Update, Delete
- D) Create, Read, Write, Delete (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

Please read page 367 from the ServiceNow Administration Fundamentals - Tokyo booklet. It states Create, Delete, Read, Write. There is no Upload. There is an update, as stated in answer "C" but "C" also contains "Rate" which is also incorrect. Trick question!

in ServiceNow, its CRWD. Do not confuse everyone please

in ServiceNow, its CRWD. Do not confuse everyone please

Well apologies it is not C because it should be Create, Read, Update and Delete

Well apologies it is not C because it should be Create, Read, Update and Delete

Question #233

How is a user defined in ServiceNow?

- A) A user is a record stored in the Profile [sys_user_profile] table
- B) A user is a record stored in the User [sys_user] table (Correct Answer)**
- C) A user is a record stored in the User Preference [sys_user_preference] table
- D) A user is a field in the LDAP integration

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

B is the correct answer

did you already take the exam?

did you already take the exam?

Question #234

Which ServiceNow utility gives a Service Desk agent the ability to trace from a Service having an issue, to see which CIs supporting that service have active issues?

A) CI Dependency View (Correct Answer)

- B) Event Management Homepage
- C) Service Dashboard
- D) CI Health Dashboard

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

According to the ServiceNow Administration Fundamentals - Tokyo, page 427, it states, "Dependency Views indicate if a CI has any active, pending issues." I'd select A on the Exam

Answer is A per SN Fundamentals book p.361-362

It's D, according to SNOW docs: https://docs.servicenow.com/bundle/vancouver-servicenow-platform/page/product/configuration-management/task/t_ViewCIHealth.html

A is the correct answer

Selected Answer: D

The health dashboard provides a single view of the quality of data at the CMDB, CI class and CI levels using completeness, correctness and compliance scores

Question #235

Which feature enables business process owners to organize Flow Designer content into unified and digitized cross-enterprise processes via a digitized task board interface?

- A) Flow Designer
- B) Workflow Editor
- C) Process Workflow Designer
- D) Process Automation Designer (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

D is correct <https://docs.servicenow.com/bundle/utah-build-workflows/page/administer/process-automation-designer/concept/process-automation-designer.html>

D is correct. Page 237 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Question #236

An IT user calls the service desk because they need to work on task records. All they can see is Self Service on their homepage when they login to the ServiceNow instance. What issue could explain this? (Choose two.)

- A) Their user account does not have itil role (Correct Answer)**
- B) Their user account was not approved by their manager
- C) Their user account is not logged in properly
- D) Their user account failed LDAP authentication
- E) Their user account does not belong to any groups, which contain the itil role (Correct Answer)**

Explanation

Correct Answer:

AE

Community Discussion

AE are correct

Question #237

On a related list, which buttons are commonly used for managing the records on the list? (Choose three.)

A) Add (Correct Answer)**B) Edit (Correct Answer)**

C) Publish

D) Manage

E) New (Correct Answer)

Explanation

Correct Answer: ABE [?](#)

Selected Answer: A

Answer is A

Selected Answer: A

Answer should be A

Selected Answer: A

A is correct

Selected Answer: A

Answer is A

Selected Answer: A

The Self-Service is an application and this is why it's in the Application Navigator.

Question #240

What catalog tool would you use to create a catalog item or record producer?

A) Catalog Builder (Correct Answer)

- B) Workflow Designer
- C) Catalog Designer
- D) Catalog Formatter

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

A is the correct answer

Selected Answer: A

In ServiceNow, you would use Catalog Builder to create catalog items and record producers. Catalog Builder is a tool within the ServiceNow platform that allows users to manage the service catalog, including creating and configuring both catalog items and record producers. It provides a user-friendly interface for defining the properties of these catalog elements.

Question #241

On a form, which type of field has this icon which can be clicked, to see a preview of the associated record?

The screenshot shows a ServiceNow form for Incident INC0010112. The form has a header bar with a back arrow, a menu icon, the title 'Incident INC0010112', and a paperclip icon. Below the header, there are four fields: 'Number' with value 'INC0010112', '* Caller' with value 'survey user' and a search icon, 'Category' with value 'Inquiry / Help' and a dropdown arrow, and 'Subcategory' with value '-- None --' and a dropdown arrow. To the right of the 'Caller' field, there is a small icon of a document with a magnifying glass, and next to it is a red box containing an information icon (i).

- A) Lookup
- B) Preview
- C) Reference (Correct Answer)**
- D) Snapshot
- E) Quickview
- F) Drilldown

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

The icon is preview but the question is "what type of field > Reference field is the answer

Selected Answer: C

The answer is C. You can select the reference icon to preview the referenced record (on the target table). https://docs.servicenow.com/en-US/bundle/tokyo-platform-administration/page/administer/field-administration/concept/c_ReferenceIcon.html

Selected Answer: B

Answer is B.

C https://docs.servicenow.com/en-US/bundle/utah-platform-administration/page/administer/field-administration/concept/c_ReferenceIcon.html

I can confirm that B is the answer.

Question #242

While on an Incident record, how would you add a Tag for "Special Handling" to the record?

- A) Click on the Context menu, select Add Tag, type Special Handling, press enter
- B) Click on the More options (...) icon, click Add Tag, type Special Handling, press enter (Correct Answer)**
- C) On the Tag field, select Special Handling from the choice list
- D) On the Special Handling field, check the box

Explanation

Correct Answer:

B

Community Discussion

B is the right answer

Selected Answer: B

Just tested it in my instance - B is correct.

Selected Answer: B

B is the correct answer

I think option A will more fit here.

Question #243

What feature allows you to limit who is able to contribute or read knowledge within a knowledge base?

- A) Roles
- B) Groups
- C) User Criteria (Correct Answer)**
- D) Categories

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

C is the correct answer

C is correct <https://docs.servicenow.com/bundle/utah-servicenow-platform/page/product/knowledge-management/concept/diagnose-knowledge-user-criteria.html>

Selected Answer: C

In ServiceNow, User Criteria is the feature that allows you to limit who can contribute to or read knowledge within a knowledge base. This functionality enables you to define specific user groups, roles, or individuals who have access to specific knowledge bases and articles

Question #244

When moving a homepage or dashboard between instances, what must you remember?

A) Manually add them to the update set (Correct Answer)

- B) They cannot be moved via update set
- C) They are automatically added to the update set
- D) Create a separate update set for them

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

A is the correct answer

Selected Answer: A

When migrating a homepage or dashboard in ServiceNow, remember that they are not automatically included in update sets and must be manually added. Additionally, you may encounter errors related to missing canvas pages or broken dashboard tabs, requiring you to also move these components separately. Finally, validating the migrated dashboard on the target instance is crucial to ensure all components are correctly transferred and functional.

Question #245

What is the platform name for the Group table?

- A) sys_groups
- B) group
- C) sys_user_group (Correct Answer)**
- D) sys_group

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

C is the correct answer

Question #246

Many actions are included with flow designer, what are some frequently used core actions? (Choose four.)

- A) Look for Update
- B) Create Record (Correct Answer)**
- C) Ask for Approval (Correct Answer)**
- D) Look Up Record (Correct Answer)**
- E) Wait for Condition (Correct Answer)**
- F) Wait for Match

Explanation

Correct Answer:

BCDE

Community Discussion

Selected Answer: BCDE

BCDE is the correct answer

BCDE is correct <https://docs.servicenow.com/bundle/utah-build-workflows/page/administer/flow-designer/concept/flow-actions.html>

Selected Answer: BCDE

In ServiceNow Flow Designer, several core actions are frequently used to automate processes. These include: Ask for Approval, Create Record, Look Up Record, Send Email, and Update Record. These actions allow you to manage approvals, create and update records, find information, and send notifications within your automated workflows.

Question #247

What role enables someone to authorize a request, with no other permissions on the platform?

- A) Approval Group [approval_group]
- B) Authorize [authorize_user]
- C) Reviewer [reviewer_user]
- D) Verification [verify_user]
- E) Approver [approver_user] (Correct Answer)**

Explanation

Correct Answer:

E

Community Discussion

Selected Answer: E

E is the correct answer

Hi bro, can you pls share your Account Details with me? pls help me to study bro...

Hi bro, can you pls share your Account Details with me? pls help me to study bro...

E is correct

Hi bro, can you pls share your Account Details with me? pls help me to study bro...

Question #248

On the knowledge base record, which tab would you use to define which users are not able to write articles to the knowledge base?

- A) Can Contribute
- B) Cannot Author
- C) Can Read (Correct Answer)**
- D) Can Write
- E) Can Author

Explanation

Correct Answer:

C

Community Discussion

The question is confusing, it seems like the correct answer would be "cannot contribute" which is not an option. If you *only* select "can read" then inherently those users can only read and not contribute. So technically this may be the correct answer https://docs.servicenow.com/bundle/quebec-servicenow-platform/page/product/knowledge-management/task/t_SelectUserCriteria.html

answer should be 'cannot contribute'

A is correct https://docs.servicenow.com/bundle/utah-servicenow-platform/page/product/knowledge-management/task/t_SelectUserCriteria.html

Selected Answer: A

Should be can contribute. If the user is not on the list, then they cannot contribute

None of these are correct. As jjrrrrferere says correct answer is "Cannot Contribute". This is a duplicate of question 123 so you can ignore this question as 123 has the Cannot Contribute option

Question #249

What types of entities can receive task assignments, in ServiceNow? (Choose two.)

A) Users (Correct Answer)

B) Departments

C) Groups (Correct Answer)

D) Teams

Explanation

Correct Answer:

AC

Community Discussion

Selected Answer: AC

AC is the correct answer

AC is correct

Selected Answer: AC

In ServiceNow, tasks can be assigned to users and groups. These are the two primary entities that can receive task assignments

Question #250

The Report Designer contains different sections for configuring your report. Which section is used to adjust the look of your report, including colors, titles and legend layout?

A) Layout

B) Format

C) Configure

D) Style (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Style is the correct answer. You may change the Chart title and colors.

D is correct https://docs.servicenow.com/bundle/utah-now-intelligence/page/use/reporting/task/t_CreateYourOwnReport.html

D is correct. Page 267 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Selected Answer: D

D is the correct answer

This is not right, it should be C

Question #251

How would you distinguish between a Base Class table and a Parent Class table?

- A) Extended tables are always extended from Parent tables. Extended tables are usually extended from Base tables.
- B) Extended tables can be extended from Parent tables or Base tables; but they cannot be extended from both.
- C) Base Class tables always have tables extended from them. Parent tables do not have tables extended from them.

D) Base Class table is not extended from another table, Parent class tables may be extended from another table. (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

D is the correct answer

From the Table extensions and classes in Servicenow Product documentation "A table that extends another table is called a child class, and the table it extends is the parent class. A table can be both a parent and child class both extending and providing extensions for other tables. A parent class that is not an extension of another table is called a base class."

D is correct

Can you pls give me your account details... I need to study bro... Or Can you pls drop any comment in every question bro.... Please bro...

Can you pls give me your account details... I need to study bro... Or Can you pls drop any comment in every question bro.... Please bro...

Question #252

When a custom table is created, which access control rules are automatically created? (Choose four.)

A) create (Correct Answer)

B) delete (Correct Answer)

C) execute

D) update

E) read (Correct Answer)

F) write (Correct Answer)

Explanation

Correct Answer:

ABEF

Community Discussion

ABEF is correct. Page 367 of the ServiceNow Administration Fundamentals - Tokyo Edition.

I feel like this is a bit of a trick question. Write = allows users to update records in a table. The acronym CRUD uses update vs delete. I think update is also a correct answer.

No Confusion on that because it has mentioned clearly in the snaf vancouver book that when a table is created it automatically creates the acls that are CREATE, READ, WRITE, DELETE thats it and no update or anything else.

No Confusion on that because it has mentioned clearly in the snaf vancouver book that when a table is created it automatically creates the acls that are CREATE, READ, WRITE, DELETE thats it and no update or anything else.

Selected Answer: ABEF

<https://docs.servicenow.com/bundle/vancouver-platform-security/page/administer/contextual-security/concept/acl-rule-types.html>

Question #253

Which banner icon do you use to change your personal system settings, like your instance color scheme?

- A) Magnifier
- B) Question mark
- C) Gear (Correct Answer)**
- D) Chat bubbles

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

C is correct from the answers provided, but technically, in the latest versions of SN, the gear icon is no longer on the banner. It appears in the User Profile settings (when you click on the user profile pic)

Selected Answer: C

c is the correct answer

C is correct

Question #254

Which banner icon do you use to change your personal system settings, like your instance color scheme?

- A) Magnifier
- B) Question mark
- C) Gear (Correct Answer)**
- D) Chat bubbles

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

C is correct from the answers provided, but technically, in the latest versions of SN, the gear icon is no longer on the banner. It appears in the User Profile settings (when you click on the user profile pic)

Question is repeated / C is correct

Question #255

When building an extended table from a base table, which fields do you need to create? (Choose two.)

A) The fields that are not in the base table. (Correct Answer)

B) The mandatory fields for the base table.

C) The fields that are specific to the extended table. (Correct Answer)

D) The reference fields for the base table.

Explanation

Correct Answer: AC ?

Community Discussion

Selected Answer: AC

AC looks correct

Selected Answer: AC

You do not need to create a reference field for the parent table.

Selected Answer: AC

Only And C make sense

Selected Answer: AC

AC is the correct answer

Can you pls give me your account details... I need to study bro... Or Can you pls drop any comment in every question bro.... Please bro...

Question #256

While showing a customer their Incident form, they ask to change the Priority field title to display their internal terminology PValue. How would you do that? (Choose two.)

- A) Right click on Priority and select Configure Label (Correct Answer)**
- B) Right click on Priority and select Configure Dictionary (Correct Answer)**
- C) Right click on Priority and select Configure Display Settings
- D) Right click on Priority and select Configure Column

Explanation

E Activity Stream

Selected Answer: E

E is the correct answer

Question #259

How would you navigate to the Schema map for a table?

A) System Definition > Tables; Select Table; Go to Related links and click Show Schema Map (Correct Answer)

B) System Dictionary > Show Schema Map; Select Table

C) System Definition > Show Schema Map; Select Table

D) System Definition > Dictionary; Select Table; Go to Related links and click Show Schema Map

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

A is the correct answer

Most likely answer is A https://docs.servicenow.com/bundle/utah-application-development/page/administer/table-administration/task/t_GenerateASchemaMap.html

Question #260

Which is the base table of the configuration management database hierarchy?

- A) cmdb_ci
- B) cmdb (Correct Answer)**
- C) cmdb_rel_ci
- D) ucmbd

Explanation

Correct Answer:

B

Community Discussion

Sorry, but ChatGPT is not correct. A "Base" table has no parent, it is not an extension of another table. cmdb is a table without a parent. cmdb_ci is a child of cmdb, cmdb_ci is a "Core" table that is in the Base Instance.

Sorry, but ChatGPT is not correct. A "Base" table has no parent, it is not an extension of another table. cmdb is a table without a parent. cmdb_ci is a child of cmdb, cmdb_ci is a "Core" table that is in the Base Instance.

Selected Answer: B

CMDB is correct.

Selected Answer: B

It's B: From SNAF Vancouver Manual, page 192: Three key CMDB tables are Base Configuration Item [cmdb], Configuration Item [cmdb_ci] which contains CI data, and CI Relationship [cmdb_rel_ci] which contains CI relationship data.

Selected Answer: B

B - cmdb, has no parent.

Question #261

Which best describes a field in a ServiceNow table?

- A) A field is a table row.
- B) A field is an item that appears in a menu list.
- C) A field is a table cell that stores data. (Correct Answer)**
- D) A field is a record in a table.

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: D

Answer id D

C is the correct answer. D is correct if there is only one column.

Selected Answer: C

C is correct

Selected Answer: C

C is the correct answer. D would be a record is a row. A field is a column!!!!!!

Selected Answer: C

C is the correct answer. D would be a record!!!!!!

Question #262

What are examples of UI Actions relating to forms? (Choose three.)

- A) Form Columns

B) Form View

C) Form Buttons (Correct Answer)

D) Form Context Menu (Correct Answer)

E) Form Links (Correct Answer)

Explanation

Correct Answer:

D is the answer

Selected Answer: D

D is the correct answer

Question #266

What setting allows users to view a Knowledge Base article even if they are not logged in?

A) The Public setting (Correct Answer)

- B) The View All setting
- C) The ESS role
- D) The Allow All role

Explanation

Correct Answer:

A

Community Discussion

The setting that allows users to view a Knowledge Base article even if they are not logged in is called "Public Knowledge Base". This setting can be enabled or disabled by ServiceNow administrators in the Knowledge Base Service Portal application.

This Question is really confusing. I wonder if it's from an outdated version ServiceNow or I just don't understand it, but in the Vancouver CSA fundamentals book it's clearly stated that "If there's no user criteria specified in the "Can Read" related list then the Knowledge Base becomes open to the public." Same is the information in the ServiceNow forums: "To make a Knowledge base public navigate to Knowledge > Administration > Knowledge Bases. Select the knowledge base you want to make public. Go to the Can Read section or tab and remove any entries from the list. That way everyone gets read permission on all articles in that knowledge base." I could not find any information anywhere about a specific "Public setting". Nevertheless, I would probably have to go for answer A as the other ones are even more meaningless.

Selected Answer: A

A is the correct answer

Can you pls give me your account details... I need to study bro... My Reddit: Conscious_Can_2005 Or Can you pls drop any comment in every question bro.... Please bro...

Question #267

When adding a related list to a form, you choose the related list from the list collector. What is an example of a related list you might see on the list collector? (Choose three.)

- A) Problem==Parent
- B) HR Case->Parent (Correct Answer)**
- C) Catalog Task->Parent (Correct Answer)**
- D) Outage->Task number (Correct Answer)**
- E) Release Phase==Parent

Explanation

Correct Answer:

BCD

Community Discussion

Question #268

How is the ServiceNow platform set up so that Administrators can easily configure their instances to send an email at the end of an upgrade?

A) Administrators can update the email notification named "System Upgraded" in the System Logs module by adding the appropriate User to receive it.

B) Administrators can update the email notification named "System Upgraded" in the Notifications module by adding the appropriate User to receive it. (Correct Answer)

C) Administrators can write a Client Script to send out an email to the Administrator when an Update is complete.

D) Administrators can write a Business Rule to send out an email to the Administrator when an Update is complete.

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

checked in Notification module, when to send-> send when(event is fired)->event name(system.upgraded)

Selected Answer: B

There is a "System Upgraded" notification. Head to System Notification -> Notification and type "*upgrade" in the name, you will see the "System Upgraded" Notification. For the Exam I would choose A

Meant B Sorry

Meant B Sorry

Selected Answer: B

Even not knowing for sure if there's a "System Upgraded" notification out of the box, I would go with B - First of all notifications are available in System Notification -> E-mail -> Notifications (so that rules out A), second of all why would the administrator want to send a notification for a completed upgrade (through a Client Script or a Business Rule) to himself? That rules out C and D. So B is the only plausible one. But to confirm my logic I also went in and checked in my out of the box personal development instance and there is indeed a "System Upgraded" notification in System Notification -> E-mail -> Notifications

Question #269

A customer wants to be able to identify and track components of their infrastructure that support their eCommerce service. What ServiceNow products could support this requirement? (Choose three.)

- A) Asset Management
- B) Discovery (Correct Answer)**
- C) Configuration Management (CMDB) (Correct Answer)**
- D) Service Mapping (Correct Answer)**
- E) Performance Analytics

Explanation

Correct Answer: BCD ?

Community Discussion

Selected Answer: ABC

"Their infrastructure" is handled with "Asset Management" "Discovery" can collect the assets CMDB stores the asset information

Selected Answer: BCD

BCD seems more appropriate

Selected Answer: BCD

Asset Management is out of scope for CSA.

Selected Answer: ABC

A - Asset Management is the first Application in ServiceNow that I learned about prior to studying for CSA. That is where items are identified. B - Discovery is used to Track Components C - CMDB is the base for the entire system. D - Service Mapping - works hand in hand with Discovery. <https://www.servicenow.com/lpwhp/application-context-infastructure.html>

Selected Answer: BCD

BCD is Correct.

Question #270

For your implementation, the following tables are extended from each other:

- Incident table is extended from Task table.
- Super Incident table is extended from Incident table.

In this situation, which table(s) are Parent, Child and Base tables? (Choose five.)

- A) Super Incident table is a Parent table
- B) Incident table is a Child table (Correct Answer)**
- C) Super Incident table is a Base table
- D) Incident table is a Base table
- E) Task table is a Child table
- F) Incident table is a Parent table (Correct Answer)**
- G) Super Incident table is a Child table (Correct Answer)**
- H) Task table is a Parent table (Correct Answer)**
- I) Task table is a Base table (Correct Answer)**

Explanation

Correct Answer:

BGHFI

Community Discussion

Selected Answer: BFGHI

the answeur is BFGHI

Someone explain this one. Why is it choose 5 and not 3? Wouldn't it be : B. Incident Table is a Child Table C. Super Incident Table is a Base Table H. Task Table is a Parent Table ???

Nevermind my brain gets it now. B, F, G, H, I is correct.

Nevermind my brain gets it now. B, F, G, H, I is correct.

Question #271

What capability allows users to create dashboards with widgets to visualize data over time in order to identify areas of improvement?

A) Scheduled Reports

B) Performance Analytics (Correct Answer)

C) Analytics Reports

D) Reporting

Explanation

Correct Answer:

B

Community Discussion

B is correct <https://docs.servicenow.com/bundle/utah-now-intelligence/page/use/performance-analytics/concept/pa-overview.html>

Selected Answer: B

In ServiceNow, the Performance Analytics capability allows users to create dashboards with widgets to visualize data over time and identify areas for improvement, according to

ServiceNow. Performance Analytics provides the tools to track key performance indicators (KPIs) and trends, enabling users to make data-driven decisions

Question #272

Which type of ServiceNow script runs on the web browser?

- A) Server script
- B) Database script
- C) Client script (Correct Answer)**
- D) Local script

Explanation

Correct Answer:

C

Community Discussion

C is correct <https://docs.servicenow.com/bundle/utah-application-development/page/script/client-scripts/concept/client-scripts.html>

Selected Answer: C

C correct.

Question #273

When selecting the Target table for an import, which tables can you select?
(Choose three.)

- A) Tables outside of ServiceNow
- B) Tables within the global scope (Correct Answer)**
- C) Related tables, using Dot Walk
- D) Tables which allow write access to other applications (Correct Answer)**
- E) Tables within the existing application scope (Correct Answer)**

Explanation

Correct Answer:

BDE

Community Discussion

BDE is correct. Page 391 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Selected Answer: BDE

Yes, the answer is BDE, found on page 176 of the SA fundamentals - Vancouver edition

BDE I mean

BDE I mean

Question #274

On Access Control Definitions, what are ways you can set the permissions on a Table? (Choose three.)

A) Conditional Expressions (Correct Answer)

B) Roles (Correct Answer)

C) CRUD

D) Script that sets the answer variable to true or false (Correct Answer)

E) Groups

Explanation

Correct Answer:

ABD

Community Discussion

Documentation: <https://docs.servicenow.com/bundle/tokyo-platform-security/page/administer/contextual-security/concept/access-control-rules.html>

Update for the Utah release, basically same thing as what rittersportler post but the URL change <https://docs.servicenow.com/en-US/bundle/utah-platform-security/page/administer/contextual-security/concept/access-control-rules.html>

Selected Answer: ABD

In ServiceNow, permissions on a table are set through Access Control Lists (ACLs). ACLs define what data and functionality users can access, based on roles, conditions, or scripts. Requires roles: Specifies which roles are required to access the table or field
Conditions: Allows you to define specific conditions that must be met for access to be granted
Script: Allows you to define more complex logic using JavaScript to determine access

Question #275

What tool is used to import data from various data sources, and map that data into ServiceNow tables?

- A) Transform Set
- B) Data Pack
- C) Update Set
- D) Import Set (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

D is correct as per chatgpt.

D is correct. Page 389 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Selected Answer: D

In ServiceNow, Import Sets are the primary tool used to import data from various sources and map that data into ServiceNow tables. They act as a staging area for the imported data before it's transformed and moved into the target ServiceNow tables

Question #276

When you set a policy that is applied to all data entered into the platform (UI, Import Sets, or Web Services), where does this policy run by default?

- A) Client
- B) Network
- C) Browser
- D) Server (Correct Answer)**

Explanation

Correct Answer: D [?](#)

Community Discussion

Selected Answer: D

https://docs.servicenow.com/en-US/bundle/tokyo-platform-administration/page/administer/field-administration/concept/c_DataPolicy.html

Selected Answer: D

Server

Selected Answer: D

D. Server. When you set a policy that applies to all data entered into the platform, such as through the UI (User Interface), Import Sets, or Web Services, the policy is typically enforced on the server side. The server is responsible for processing and validating the data that is being entered into the platform. By running the policy on the server, the platform can ensure consistent enforcement of the policy rules regardless of the entry

point (UI, Import Sets, or Web Services) used to submit the data. This helps maintain data integrity and security across the platform.

Selected Answer: D

Server is correct

Selected Answer: D

A data policy is applied at the Server. Consider trying to create an Incident using REST API. The server would need to reject the HTTP request if a mandatory field is empty.

Question #277

On what part of the ServiceNow instance, would you find the option to Impersonate User?

A) User Menu (Correct Answer)

- B) Content Fame
- C) Application Navigator
- D) Module

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

A is correct

Q277 is a duplicate of Q190 but they have different answers. Q190 answer is Banner and Q277 answer is User Menu. Neither gives these options in the other question. Both answers are right, however. Open the User menu by clicking your user avatar in the ServiceNow banner. Select the Impersonate user menu item. In the Select a user to impersonate dialog, enter the name of the user to impersonate in the Search for a user field. Select the user from the list and click the Impersonate user button.

Selected Answer: A

The "Impersonate User" option in ServiceNow is found within the User menu, which is accessed by clicking your profile picture or avatar in the ServiceNow banner. After clicking on the profile picture, you will see the "Impersonate user" menu item, allowing you to select and impersonate another user

Question #278

How would you describe the relationship between the Incident and Task table?

- A) Incident table has a one to many relationship with the Task table
- B) Incident table is extended from Task table (Correct Answer)**
- C) Incident table is related to the Task table via the INC number
- D) Incident table has a many to many relationship with the Task table
- E) Incident table is a database view of the Task table

Explanation

Correct Answer:

B

Community Discussion

It's a easy to read over relationship. It's A

In question it clearly says - relationship between.. Option A describes relationship.

Selected Answer: A

Selected Answer: A

definitely A

Selected Answer: A

The correct answer is A. In ServiceNow, the relationship between the Incident and Task tables is established as a one-to-many relationship. This means that for each incident in the Incident table, there can be multiple associated tasks in the Task table.

Question #279

Which flow components allow you to specify when a flow should be run?

- A) Trigger and Condition Pill

- B) Condition and Table
- C) Trigger Criteria and Clock
- D) Trigger and Condition (Correct Answer)**
- E) Scope and Trigger Condition

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

D per chatgpt.

D is correct. Page 233 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Question #280

Which feature helps to automatically allocate a critical, high-priority, service request to the appropriate assignment group or team member?

- A) Assignment Rule (Correct Answer)**
- B) User Policy
- C) Predictive Intelligence
- D) UI Policy

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

In ServiceNow, Assignment Rules are used to automatically allocate tasks, incidents, or service requests to the appropriate assignment group or team member based on specified criteria. These rules help streamline the assignment process and ensure that critical or high-priority items are directed to the appropriate individuals or groups for prompt resolution.

A is the correct answer. The Assignment rules module allows you to automatically set a value in the assigned_to and assignment_group fields when a set of conditions occurs. An assignment rule must also meet these additional criteria to run: The task record has been created or updated. Assignment rules do not apply to unsaved changes on a form. The task record must be unassigned. The record cannot have an existing value for either the assigned_to or assignment_group fields. Assignment rules cannot overwrite existing assignments (including assignments set by a default value or a previously run assignment rule). The assignment rule is the first rule that matches the table and conditions. If more than one assignment rule matches the conditions, only the rule with the lowest order value runs.

Selected Answer: A

Since the criteria have been predefined as mentioned in the question, so it should be "Assignment Rule".

Selected Answer: A

A is correct

C is correct. Page 314 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Question #281

The Report Designer contains different sections for configuring your report. Which section is used to specify the name of the report, and the table or data source for the report?

- A) Type
- B) Properties
- C) Configure
- D) Sources

E) Data (Correct Answer)

Explanation

Correct Answer:

E

Community Discussion

E is correct - Page 267 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Selected Answer: E

E is the correct answer. The Report designer contains 4 sections: Data - where the name of the report is specified and the data source Type - Where you choose the report type (like pie chart, Bar chart, Pareto, etc) Configure - where you can configure the report like what each section of the pie chart would represent, what would the axis on the Bar chart be, etc. You can also group data by a specific field or run calculations against the data Style - This is where you make your report pretty. You can change the report labels and colours, etc.

Selected Answer: E

https://developer.servicenow.com/dev.do#!/learn/learning-plans/vancouver/new_to_servicenow/app_store_learnv2_reportanalytics_vancouver_report_designer
Report Designer has four tabs: Data: data source for the report <-- "Report Name" Type: visualization of the report such as bar, pie, or histogram Configure: report configuration based on report type Style: report appearance

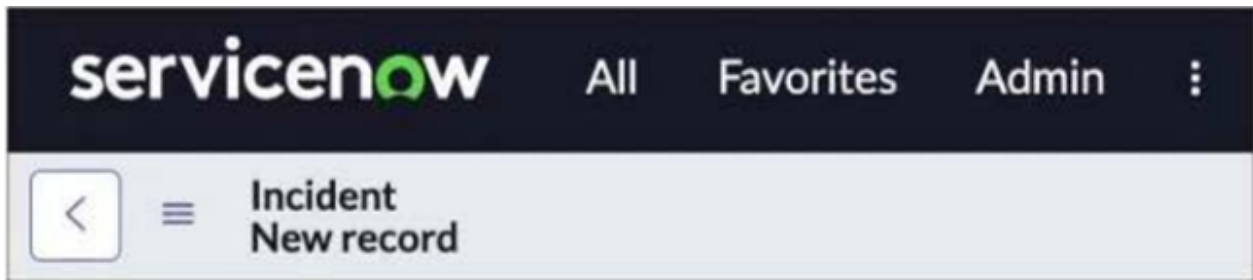

Selected Answer: E

Its E I checked

Selected Answer: D

Answer is Data Open your PDI, navigate to Reports > View/Run, click Create a report, "Report name" is the first mandatory field in the Data tab section.

Question #282

You are editing a new incident record and would like the "Save" button to be located on the Form header. Which action would need to be taken for that button to appear?

- A) Context Menu > Form Design > add the "Save" button.
- B) All > System Properties > UI Properties > Turn on the "glide.ui.advanced" property.
- C) All > System Properties > UI Properties > Turn on the "Save" button. (Correct Answer)**
- D) Context Meru > Form Layout > add the "Save" button.

Explanation

Correct Answer: C [?](#)

Community Discussion

Selected Answer: C

Correct answer is C: When you go to the User Interface properties at All -> System Properties -> UI Properties there is a check box "Show Save, Insert and Insert and Stay buttons on forms".

Selected Answer: C

just tested it

Selected Answer: D

B is correct, just tested in my PDI there must be ticked "Show Save, Inset and Insert & stay on forms" which property name is "glide.ui.advanced"

C is correct <https://docs.servicenow.com/bundle/utah-platform-user-interface/page/administer/navigation-and-ui/reference/customizing-instance-appearance.html#d17975e107>

Selected Answer: C

C is the correct answer.

Question #283

Which features ensures data consistency while importing data using import sets and web services?

- A) UI Policy
- B) Data Policy (Correct Answer)**
- C) Business Rule
- D) Client Script
- E) CSDM

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

Data Policies are applied to all data entered into the platform: form (UI), Import Sets or Web Services.

Selected Answer: B

B is correct

page 435, CSA Book (tokyo2022 version)

Selected Answer: B

In ServiceNow, Data Policies ensure data consistency when importing data using import sets and web services by enforcing data validation rules and controlling field values at the server-side. They apply to all data operations, including those through the UI, import sets, and web services, guaranteeing that data meets specified requirements before being saved to the database

Question #284

When using Flow Designer, what is the Flow Execution initiated by?

- A) A flow logic
- B) An existing subflow
- C) An execution data pill
- D) A trigger (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

D is correct.

Selected Answer: D

In ServiceNow's Flow Designer, the flow execution is initiated by a trigger. Triggers are events or conditions that start the execution of a flow. They define when a flow should be activated based on specific criteria, such as the creation of a record, a scheduled time, or an external event.

Question #285

What is the name of the string that displays filter criteria?

- A) Breadcrumb (Correct Answer)**

- B) Choice
- C) Menu
- D) Topic

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

In ServiceNow, the string that displays filter criteria is commonly referred to as the "Breadcrumb." It shows the current filter conditions applied to a list or a module, making it easy for users to understand the context of the displayed data.

Selected Answer: A

A is the right answer.

Question #286

Which system property is added and set to true in order to see impersonation events in the System Log?

- A) glide.sys.all_impersonation
- B) glide.user_setting
- C) glide.impersonation_setting
- D) glide.sys.log_impersonation (Correct Answer)**
- E) glide.sys.admin_login

Explanation

Correct Answer: D [?](#)

Community Discussion

Selected Answer: D

https://support.servicenow.com/kb?id=kb_article_view&sysparm_article=KB0717055

Correct is D. Impersonation logs Impersonations are logged in the system log. Log impersonations for either interactive (UI) or non-interactive sessions. Impersonation logging for interactive sessions Interactive sessions are performed through the user interface (UI). Enable or disable impersonation logging for interactive sessions using the glide.sys.log_impersonation property. If you enable impersonation logging for interactive sessions by setting glide.sys.log_impersonation to true, all interactive sessions are recorded in the log.

Selected Answer: D

D is Correct!

Selected Answer: D

D is correct

D is correct

Question #287

What process allows users to create, categorize, review, approve and browse important information in a centralized location that is shared by the entire organization?

- A) Self Service Management
- B) Knowledge Management (Correct Answer)**
- C) Business Information Management
- D) Information Portal Management
- E) Knowledge-Centered Management

Explanation

Correct Answer:

B

Community Discussion

B is correct

Selected Answer: B

Knowledge Management in ServiceNow allows users to create, categorize, review, approve, and browse important information in a centralized location that is shared by the entire organization. It involves creating a knowledge base where information, such as articles, FAQs, and other documentation, can be stored, managed, and accessed. This helps in sharing and leveraging collective knowledge within the organization.

Selected Answer: B

The question is what "process", only knowledge management is deemed as a process out of all the choices.

Question #288

A colleague wants to rearrange the columns on their My Work List. Once the user has navigated to the list, where should they navigate to select and arrange the columns?

- A) Right click on any column header, Context Menu > Configure > List Layout
- B) Click List Context Menu > Configure > List Layout
- C) Click List Context Menu > Personalize List

D) Click Personalize List (Correct Answer)

Explanation

Correct Answer: D [?](#)

Community Discussion

Selected Answer: D

"A" is correct if you wish to change the layout for all. "D" is correct (in Tokyo) if you want to personalize.

D should be correct. Configure - list layout would change it for all workers. And normal workers (ITIL User) don't even have the configure option

D is correct

I agree with Spiderman5000, Vshy123, smeagel. The wording is a bit confusing, but I am sure they mean the "gear icon" with "Personalize list". It becomes visible when you hover over it with the mouse.

A IS CORRECT ONLY

Question #289

You are looking at a list of Active Incidents. You want to exclude Incidents with the state of Resolved. How might you do that?

- A) On Search, select State, type not Resolved, press enter
- B) On State column title, right-click, select Filter Out > Resolved
- C) On the list of records, locate and right-click on the Resolved value, select Filter Out (Correct Answer)**
- D) On the list of records, locate and right-click on the Resolved value, select Exclude
- E) Click Funnel icon, click AND, Select Resolved, is Not, State, click Run

Explanation

Correct Answer: C ?

Community Discussion

Selected Answer: C

C is correct

Selected Answer: C

It is C

Selected Answer: C

I have tested on PDI, for me answer C and E works well, BUT the order of answer is not correct in my point of view. If it would be E, the order should be 'Click Funnel icon, enter State (in Field), is not, (select) Resolved, click Run'. It is annoying that questions and answers sometimes are not written precisely. For this question I would choose C.

sorry, i think C is correct answer

answer is c

Question #290

Roles can inherit permissions from other roles. Which role inherits all of the permissions of the catalog role, and the user_criteria_admin role, plus has permissions to create Items and Services?

- A) Sys Admin [sys_admin]
- B) Catalog Admin [catalog_admin] (Correct Answer)**
- C) Catalog Author [sn_catalog_write]
- D) Item Admin [sn_item_admin]

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

B is correct. The Admin role would have been correct as well if it was called admin, as the System administrator role is called in SN. There's no sys_admin role. The other 2 are incorrect

B is correct - Page 77 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Question #291

What component of the ServiceNow infrastructure defines every table and field in the system?

- A) Schema
- B) Field Map
- C) Table Class Manager
- D) Dictionary (Correct Answer)**
- E) Data Atlas

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

D is correct

D is correct

Selected Answer: D

In ServiceNow, the System Dictionary is the component that defines every table and field in the system. It contains the metadata for each table and field, including data types, lengths, default values, and other attributes. This dictionary is essentially the blueprint for the entire database structure within the platform, according to ServiceNow community forums

Question #292

Which data consistency settings can be achieved using UI Policy? (Choose three.)

- A) Setting fields to accept the data in an expected format
- B) Setting fields to accept the data with 'n' number of characters
- C) Setting fields hidden (Correct Answer)**
- D) Settings fields read-only (Correct Answer)**
- E) Setting fields mandatory (Correct Answer)**

Explanation

Correct Answer: CDE [?](#)

Community Discussion

Selected Answer: CDE

UI Policy does not control data format

Selected Answer: CDE

CDE is correct

Selected Answer: CDE

CDE is correct.

CDE is correct

I think C,D, E is the answer

Question #293

A customer wants to use a client script to validate things on a form in order to make sure the submission makes sense. What type of client script would you recommend to meet this requirement?

A) onSubmit() (Correct Answer)

B) onSubmission()

C) onUpdate()

D) onLoad()

Explanation

Correct Answer:

A

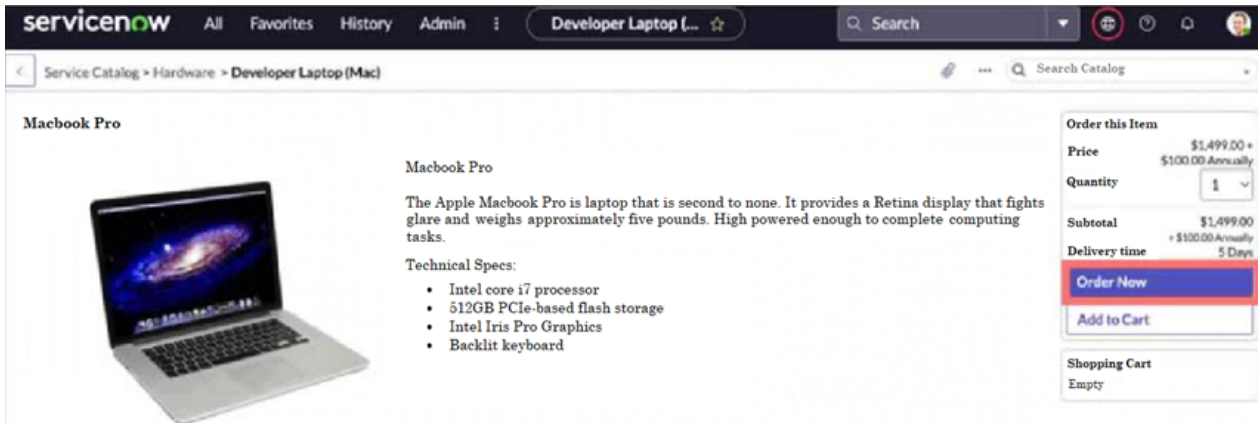

Community Discussion

A is absolutely correct

Selected Answer: A

For form validation in ServiceNow to ensure the submission makes sense, you should recommend an onSubmit() Client Script.

Question #294

An order from the Service Catalog has been placed. Two records in the Platform are created as a result. Which two records are associated with this newly ordered item? (Choose two.)

A) A record of sc_req_item table (Correct Answer)

B) A record of sc_task (Correct Answer)

C) An incident record

D) A change record

E) A problem record

Explanation

Correct Answer:

AB

Community Discussion

A and B

Question #295

What action will allow you to personalize layouts of columns in a list?

A) Context Menu > View > Personalize

B) Click Gear Icon > Personalize window options > Select the appropriate columns (Correct Answer)

C) Select the column to be personalized and right at the header > Choose the options to personalize

D) Select the column to be personalized > Click Edit icon (Pencil) > Choose the options to personalize

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

This question is the same as question #288, just the wording of the question and the correct answer is different. In Question 288 they referred to clicking on Personalize List and here they refer to clicking on the Gear icon, but it's the same thing. Personalize list is the label of the Gear icon (when you hover over the icon you can see it)

B is correct but would be better stated as Click Gear Icon > Select the appropriate columns > Ok

B is correct

Question #296

An order for new office equipment has been placed through the Service Catalog. How would you view the lists of requests after the orders have been placed?

A) All > Tables and Columns > Tasks

B) In the Navigation Filter, type "requests.list" and press the Enter key

C) All > Service Catalog > Requests

D) All > Service Catalog > Open Records > Items (Correct Answer)

Explanation

Correct Answer: D [?](#)

Community Discussion

there is no correct answer here. Should be Service Catalog -> open records -> requests

Selected Answer: C

The question is how would you view the lists of REQUESTS, not items. Therefore the answer is C.

Selected Answer: D

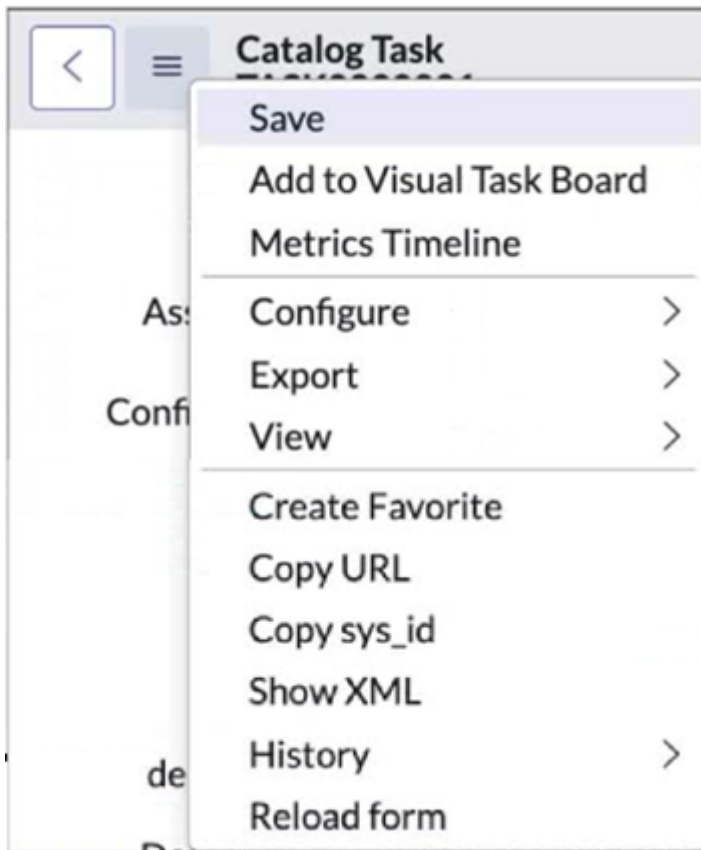

D is correct. Just tested it in my Dev instance.

Selected Answer: C

D views the list of requested items, while C views the list of requests, which is what the question is asking for, and therefore correct.

D is the correct answer

Question #297

Which path would you take to access the table configuration page from a form?

- A) The Form Context menu > View > Show Table
- B) The Form Context menu > View > Table
- C) The Form Context menu > Configure > Dictionary
- D) The Form Context menu > Configure > Table (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

D is correct.

Question #298

Which admin role is required to make changes to High Security Settings?

- A) high_sec_admin
- B) sn_acl_admin
- C) admin
- D) security_admin (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

D is correct

Selected Answer: D

To make changes to High Security Settings in ServiceNow, the security_admin role is required. This role is not automatically granted to users with the admin role. To activate the security_admin role, users must elevate their privileges by selecting the "Elevate Role" menu item in the User menu and then selecting the "security_admin" option

Question #299

What is the most common role that has access to almost all platform features, functions, and data?

- A) Super User [sn_super_user]
- B) Security Admin [securty_admin]
- C) System Administrator [admin] (Correct Answer)**
- D) Base Admin [base_admin]
- E) System Manager [sys_manager]

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

Answer is C

Question #300

When moving multiple update sets at one time, what might you do to facilitate the move?

A) Preview

B) Batch (Correct Answer)

C) List

D) Map

Explanation

Correct Answer: B [?](#)

Community Discussion

Selected Answer: B

Answer is B

B is the correct answer

Selected Answer: B

B is the correct answer

Selected Answer: B

B - Batch is the correct answer.

B is correct <https://docs.servicenow.com/bundle/utah-application-development/page/build/system-update-sets/hier-update-sets/concept/us-hier-overview.html>

Question #301

What do you click when you have made modifications to your report, and you want to see the results without saving?

- A) Preview
- B) Test
- C) Run (Correct Answer)**
- D) Try It
- E) Execute

Explanation

Correct Answer: [C ?](#)

Community Discussion

Selected Answer: C

Answer is C. Run

It is C

Selected Answer: C

The correct answer is C - Run

Selected Answer: C

The correct answer is C - Run

Preview won't come ah?

Question #302

Which framework can automatically populate values for the Priority and Category fields based on the Short description field value?

A) Predictive Intelligence (Correct Answer)

- B) Assignment Rule
- C) CSDM
- D) Action
- E) UI Policy

Explanation

Correct Answer: A [?](#)

Community Discussion

Selected Answer: A

Correct answer is A. For example, when an incident is created, ServiceNow will automatically assign the correct category, priority and assignment group based on the record's short description. Assignment rules: The instance can automatically assign a task to a user or group based on pre-defined conditions by using data lookup rules and assignment rules.

Selected Answer: A

A its the correct option, predictive intelligence do that on fields.

A is correct <https://docs.servicenow.com/bundle/utah-intelligent-experiences/page/administer/predictive-intelligence/concept/using-predictive-intelligence.html>

Correct answer is A: The Predictive Intelligence classification framework enables you to use machine-learning algorithms to set field values during record creation, such as setting the incident category based on the short description.

Selected Answer: A

<https://servicenow.read.inkling.com/a/b/27b45d8d82aa4679a2f9d05e3bb66423/p/f2c05c1f58174425b99cea4b0694b9f3>

Question #303

Which testing framework is used to test ServiceNow Applications?

- A) Test Driven Framework (TDF)
- B) Junit
- C) Selenium
- D) Automated Test Framework (ATF) (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

D is correct <https://docs.servicenow.com/bundle/sandiego-application-development/page/administer/auto-test-framework/concept/automated-test-framework.html>

Selected Answer: D

The primary testing framework used to test ServiceNow applications is the Automated Test Framework (ATF). ATF is a ServiceNow application designed to automate the testing of applications, customizations, and configurations within the platform. It allows users to create and run automated tests to verify that the ServiceNow instance is functioning as expected, especially after making changes

Question #304

Which allows the creation of a task-based record from Service Catalog?

- A) Assignment Rule
- B) Flow Designer
- C) UI Builder
- D) Record Producers (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

D is correct https://docs.servicenow.com/bundle/utah-servicenow-platform/page/product/service-catalog-management/concept/c_RecordProducer.html

Selected Answer: D

In ServiceNow, Record Producers are specifically designed to allow users to create task-based records, such as incidents or problems, directly from the Service Catalog. These are a type of catalog item that enable this functionality

Question #305

What module do you use to access the reports that are available to you?

- A) Self-Service > My Reports
- B) Self-Service > My Dashboards
- C) Reports > View / Run (Correct Answer)**
- D) Reports > Homepage
- E) Reports > Overview

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

I have just tested it, it is C

C is correct https://docs.servicenow.com/bundle/utah-now-intelligence/page/use/reporting/reference/r_ViewTheReportsList.html

Question #306

Security rules are defined to restrict the permissions of users from viewing and interacting with data. What are these security rules called?

- A) CRUD Rules
- B) Access Control Rules (Correct Answer)**
- C) Role Assignment Rules
- D) Scripted User Rules
- E) User Authentication Rules

Explanation

Correct Answer:

B

Community Discussion

B is correct <https://docs.servicenow.com/bundle/utah-platform-security/page/administer/contextual-security/concept/access-control-rules.html>

B is correct - Page 364 of the ServiceNow Administration Fundamentals - Tokyo Edition.

Selected Answer: B

In ServiceNow, security rules that restrict user access to data are called Access Control Rules (or Access Control Lists, abbreviated as ACLs). These rules define which users or roles have permission to perform actions like reading, writing, or deleting records on tables or fields

Question #307

A new employee joins the IT department and needs to perform work assigned to Network and Hardware groups. How would you set up their access? (Choose three.)

A) Add User Account to Hardware group (Correct Answer)

B) Add User Account to IT Knowledgebase

C) Create User Account (Correct Answer)

D) Add User Account to itil group

E) Add User Account to Network group (Correct Answer)

F) Add User Account to ACL

Explanation

Correct Answer:

ACE

Community Discussion

I agree, the question is about access....so the user account should already been created.

I agree, the question is about access....so the user account should already been created.

Selected Answer: ACE

C - NEW employee will need an account setting up otherwise they can't access anything ever. If your work Instance use LDAP or Azure Sync or some other method then good for you but these are not configured OOB and the question doesn't reference them. Either way, the very first step is account setup regardless of means. AE - best practice is to assign Role(s) to the Group (especially for dependencies) so ITIL should have been added to these already therefore adding the new user to either Group will allow them to inherit ITIL Role. Creating a Group specifically to assign the ITIL Role would not be best practice as it could be removed independently of other access that requires it to be in place. This means that adding to an ITIL Group would be incorrect (as would adding the Role directly).

A. Add User Account to Hardware group - CORRECT B. Add User Account to IT Knowledgebase - NOT RELATED C. Create User Account - NOT RELATED - Questions is

about access. Also, in most cases account will be created through a feed such as AD/LDAP but most often groups need to be manually added, either in ServiceNow or AD D. Add User Account to itil group - CORRECT - There can be a group with the ITIL Role E. Add User Account to Network group - CORRECT F. Add User Account to ACL - NOT RELATED
Correct Answer: A, D, E

I think it's ADE

Question #308

The customer has asked that you change the default layout of the Task list. They would like these columns, in this order:

- Number
- Task Type
- Parent
- Short Description
- Assignment Group
- Assignee
- Updated

After navigating to the list, where would you click, to meet this requirement?

- A) Click List Context Menu > Personalize List
- B) Click List Context Menu > Configure > Columns
- C) Right click List Gear icon > Configure > Columns

D) Right click on any column header, Context Menu > Configure > List Layout (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

D is correct https://docs.servicenow.com/bundle/utah-platform-administration/page/administer/list-administration/task/t_ConfigureTheListLayout.html

Selected Answer: D

D is correct

Question #309

Which ServiceNow capability allows you to provide knowledge articles, via a conversational messaging interface?

- A) Agent Assist
- B) Virtual Agent (Correct Answer)**
- C) Now Messenger
- D) Instance Chat

Explanation

Correct Answer:

B

Community Discussion

This is a duplicate of Q174, however, I think Q174 community vote is wrong and it is in fact Virtual Agent.

Question #310

On the Form header, which element you to access form templates?

- A) Stamp
- B) More Options (...) (Correct Answer)**
- C) Pages
- D) Paperclip

Explanation

Correct Answer:

B

Community Discussion

B is correct <https://docs.servicenow.com/bundle/utah-platform-user-interface/page/administer/workspace/task/use-more-form-options.html>

Question #311

What is the definition of a group?

- A) A collection of subject matter experts
- B) A department
- C) An escalation pod
- D) A collection of users (Correct Answer)**
- E) A collection of tasks

Explanation

Correct Answer:

D

Community Discussion

D is correct https://docs.servicenow.com/bundle/sandiego-platform-administration/page/administer/roles/concept/c_UserAdministration.html

Duplicate of Q200

Question #312

Which ServiceNow utility provides a modern interactive graphical interface to visualize configuration items and their relationships?

- A) Flow Design
- B) CI Class Map
- C) Dependency View (Correct Answer)**
- D) Business Service Map

Explanation

Correct Answer: C ?

Community Discussion

The answer is C, Dependency View. From ServiceNow documentation: The maps generated by Dependency Views are based on D3 and Angular technology, providing a modern interactive graphical interface to visualize configuration items and their relationships. https://docs.servicenow.com/bundle/tokyo-servicenow-platform/page/product/business-service-management-map-ng/task/t_AccessNGBSM.html

It is C for sure

Selected Answer: C

Dependency view is the correct answer.

Selected Answer: C

answer is C

C dependency view is the correct answer

Question #313

What icon do you use to change the label on a Favorite?

- A) Star
- B) Clock
- C) Triangle
- D) Pencil (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

D is correct

Selected Answer: D

Pencil is correct.

Question #314

Which tool is used to define relationships between fields in an import set table and a target table?

- A) Schema Map
- B) Field Transformer
- C) Transform Map (Correct Answer)**
- D) Transform Schema

Explanation

Correct Answer:

C

Community Discussion

C is correct <https://docs.servicenow.com/bundle/utah-employee-service-management/page/product/human-resources/reference/transform-maps-navex.html>

Selected Answer: C

C - Transform Map.

Question #315

When moving a homepage or dashboard between instances, what must you remember?

- A) Download both as PDF and XML files
- B) They cannot be moved via update set
- C) The Platform will automatically add them to the update set

D) Manually add them to the update set (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Possibly D https://docs.servicenow.com/bundle/utah-platform-user-interface/page/administer/homepage-administration/task/t_AddAHomepageToAnUpdateSetAndApp.html

Question #316

Which allows the creation of a task-based record from Service Catalog?

A) Record Producers (Correct Answer)

- B) UI Builder
- C) Assignment Rule
- D) UI Actions
- E) Flow Designer

Explanation

Correct Answer: A [?](#)

Community Discussion

Selected Answer: A

IT IS A

Selected Answer: A

UI Actions means nothing in this context. Answer is A.

Selected Answer: A

answer is A

Selected Answer: A

A is the correct answer

A is the answer

Question #317

On the knowledge base record, which tab would you use to define which users are able to write articles to the knowledge base?

A) Can Contribute (Correct Answer)

- B) Cannot Author
- C) Can Read
- D) Can Write
- E) Can Author

Explanation

Correct Answer: A [?](#)

Community Discussion

A is correct https://docs.servicenow.com/bundle/utah-servicenow-platform/page/product/knowledge-management/task/t_SelectUserCriteria.html

A is right

Selected Answer: A

answer is A

Selected Answer: A

Cn contribute is the correct answer

Selected Answer: A

answer is A

Question #318

Which type of scripts run in the browser?

A) UI Policies (Correct Answer)

- B) Script Include Scripts
- C) Access Control Scripts
- D) Business Rule Scripts

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

A- UI Policies are run on the client - SNAF page 434.

Question #319

What enables you to trace the connection from an infrastructure item, like a Server, to the Services that are dependent on that Server?

- A) Automapping Utility
- B) Relationships (Correct Answer)**
- C) Service Tracer
- D) Transform Map

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

B. Relationships ServiceNow allows you to establish relationships between different configuration items, such as servers and services. By defining relationships, you can create a map of dependencies, and this helps in understanding the impact of changes and tracing connections between various elements in your infrastructure.

Question #320

What section on a task record is used to see the most recent updates made to a record?

- A) Timeline
- B) Related List
- C) Activity Stream (Correct Answer)**
- D) Audit Log

Explanation

Correct Answer:

C

Community Discussion

Selected Answer: C

C is correct.

Question #321

While using the CMDB, what do you call the component that needs to be managed in order to deliver services?

- A) Configuration Item (Correct Answer)**
- B) Asset

- C) Catalog Items
- D) Data Flow
- E) Service Offerings

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

Answer is A Configuration item

Question #322

What is the first step in the process to import spreadsheet data into ServiceNow?

- A) Select Import Set
- B) Run Data Scrubber
- C) Define Data Source (Correct Answer)**
- D) Create import Set
- E) Set Coalesce

Explanation

Correct Answer:

C

Community Discussion

This is different than question 216. I guess if they give the option "define data source," then that takes priority over "load data"?

Selected Answer: C

Defining the data source is essential as it specifies where the data is coming from, which in this case would be the spreadsheet. This step sets the foundation for the data import process by identifying the source file or connection that will provide the data to be imported into ServiceNow.

Selected Answer: C

C. Define Data Source Defining the data source involves specifying the source from which you will be importing data. This is typically the first step before creating an Import Set or performing other import-related tasks.

Selected Answer: D

Create an Import Set: Define Import Set Table and Transform Map: Load Data into Import Set: Transform Data: Validate and Correct Errors: Preview Import Sets: Execute Transform: Review Target Table Records:

Question #323

What are the steps for importing data using an import set?

A) Create Import Set; Create transform map; Transform data; Clean up import table (Correct Answer)

B) Create a Transform Map, Load Data, Transform Data, Run Transform Map Script

C) Identify source; Import transform map; Run transformer; Verify import

D) Select source file; Run AutoMap; Transform data; Clean up target table

Explanation

Correct Answer:

A

Community Discussion

Selected Answer: A

A is the Way

Selected Answer: A

I agree with A, Create Import Set, then Transform map, then Transform data and lastly clean up.

Question #324

If users would like to locate and assign a task to themselves in the Platform, what action could they perform from the list view to make the assignment? (Choose two.)

- A) Select the record using the check box, then select the Person icon
- B) Select the record using the check box then select the Assign To Me UI action on the List Header
- C) Double click on the Assigned to value, type the name of the user, and select the green check (Correct Answer)**
- D) Right click on the Task number and select the Assign to me option in the menu (Correct Answer)**
- E) Select the Task number, and select the Assign to me UI action on the form

Explanation

Correct Answer: CD [?](#)

Community Discussion

Selected Answer: CD

C and D are the correct answers.

Is 323 and 325 answer correct?

Selected Answer: CD

C and D are correct

Question #325

What module enables an administrator to define destinations for imported data on any ServiceNow table?

- A) Load Data
- B) Field Transform
- C) Schema Map

D) Transform Map (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Duplicate of Q206

Selected Answer: D

I agree with D, Transform Map

Question #326

Which ServiceNow capability provides assistance to help users obtain information, make decisions, and perform common work tasks via a messaging interface?

- A) Now Support
- B) ServiceNow Messenger
- C) Agent Workspace

D) Virtual Agent (Correct Answer)

E) Knowledge Chat

Explanation

Correct Answer:

D

Community Discussion

Question #327

What instance resource allows you to access guided tours, information about actions, and instructions on how to use inputs and outputs in your flow?

- A) Now Support
- B) Community
- C) Docs

D) Help Panel (question mark icon) (Correct Answer)

Explanation

Correct Answer:

D

Community Discussion

Duplicate of 210

Question #328

When importing data from a spreadsheet, which step defines where the incoming data columns will be written in the receiving table?

- A) Select Data Source
- B) Schedule Transform
- C) Load Data

D) Create Transform Map (Correct Answer)

E) Field Alignment

Explanation**Correct Answer:**

D

Community Discussion

Duplicate of Q227. Answer should be Field Mapping. But we dont have that option. So its D because Transform Map is a set of field maps

SecExams**Question #329**

On a form header, what icon would you click to access Template features?

- A) Context Menu
- B) Paper clip
- C) Stamp

D) More options (...) (Correct Answer)**Explanation****Correct Answer:** D [?](#)**Community Discussion****Selected Answer: D**

correct answer is D

D is correct answer to Toggle Template Bar

Correct is D

D is the correct answer

D , is the correct answer

Question #330

Access Control rules are applied to a specific table, like the Incident table. What is the object name for a rule that applies to the entire Incident table (all rows and fields)?

- A) incident.*
- B) incident.all
- C) incident.!
- D) incident.None (Correct Answer)**

Explanation

Correct Answer: D [?](#)

Community Discussion

Selected Answer: D

incident.* rule applies to all fields on the table that are NOT controlled by a specific field rule. i.e. if there are no field rules on any of the field it can represent the whole table, but as long as there's even one specific field rule it will represent all the other fields in the table but NOT this one. Hence A cannot be the correct answer. incident.None rule represents access to the table as a whole. It's the correct answer.

D. incident.None The answer is D. As seen in SNAF Page 368

Answer: table.--None-- applies to the entire table - Pg 158 Vancouver SNAF Table. --*-- Represents all other fields in the table

MOD don't approve... I am not 100%

MOD don't approve... I am not 100%

Question #331

On a list, what does each row show?

- A) A filter
- B) A record (Correct Answer)**
- C) A table
- D) A field

Explanation

Correct Answer:

B

Question #332

Which action enables personalization in a form for the admin role, only?

- A) Navigate to `sys_form_properties.list` and set the property `glide.ui.enable_personalize_form.admin` to true.
- B) Navigate to Context Menu > Configure > Form Layout and select 'Enable Personalization' and Enter the 'admin' role.
- C) Navigate to Context Menu > Configure > Table and add the role 'Admin' in the 'Available User' list box.
- D) Navigate to `sys_properties.list` find the property `glide.ui.personalize_form.role` and set the Value to admin. (Correct Answer)**

Explanation

Correct Answer:

D

Community Discussion

Selected Answer: D

https://docs.servicenow.com/bundle/washingtondc-platform-administration/page/administer/form-administration/concept/c_FormPersonalizationAdmin.html

Question #333

Which element is used to track items not saved with a field, in a record?

- A) Sidebar
- B) List Editor
- C) Activity formatter (Correct Answer)**
- D) Dictionary

Explanation

Correct Answer:

C

Community Discussion

It is C https://docs.servicenow.com/bundle/washingtondc-platform-administration/page/administer/form-administration/concept/c_ActivityFormatter.html

Question #334

What does ServiceNow recommend as a best practice regarding data imports?

- A) Adjust your Transform maps, after the data is loaded into the target table.
- B) Use extremely large Import Sets, instead of multiple large Import Sets.
- C) Create a new Import set table for each new data load.
- D) Plan time before your import to remove obsolete or inaccurate data. (Correct Answer)**
- E) Monitor data quality and clean imported data, using the Data Scrub Workspace.

Explanation

Correct Answer:

D

https://developer.servicenow.com/dev.do#!/learn/learning-plans/utah/new_to_servicenow/app_store_learnv2_importingdata_utah_preparing_data_for_import

Question #335

When an administrator sets a policy that is applied to all data entered into the Platform (UI, Import Sets, or Web Services), where does this policy run by default?

- A) Network
- B) Server (Correct Answer)**
- C) Client
- D) Browser

Explanation

Correct Answer:

B

Community Discussion

Question #336

If a user is on an Incident form and is alerted when they change the value of the Priority field, which type of script executes in the Platform?

- A) A server script
- B) A client script (Correct Answer)**
- C) A fix script
- D) A business rule

Explanation

Correct Answer:

B

Community Discussion

Selected Answer: B

Client script

B, Client Script onChange

Selected Answer: A

Answer: A - Server Script.

Question #337

Which feature can be used to categorize a set of records from a list and make them visible to other users?

A) Tags (Correct Answer)

- B) History
- C) Favorites
- D) Activity Formatter

Explanation

Correct Answer:

A

Community Discussion

Question #338

The testing team needs to be able to perform activities in the test instance, as though they are a member of the Service Desk group. What role would they need to be able to switch between user accounts, without logging out and back in?

- A) service_desk
- B) impersonator (Correct Answer)**
- C) admin
- D) incognito

Explanation

Correct Answer:

B

Community Discussion

Question #339

What are the benefits of building flows using Flow Designer? (Choose three.)

- A) Provides IDE for complicated scripting
- B) Provides built-in libraries /API for complex coding
- C) Automatically populates SLA records
- D) Provides natural-language descriptions of flow logic (Correct Answer)**
- E) Supports No-Code application development (Correct Answer)**
- F) Supports easy integration with 3rd party systems (Correct Answer)**

Explanation

Correct Answer: DEF [?](#)

DEF are correct

Question #340

Which helps to visualize configuration items and their relationships?

- A) Tables
- B) Schema Map
- C) Flow Design
- D) Transform Map

E) Dependency View (Correct Answer)

Explanation

Correct Answer:

E

Community Discussion

Question #341

Which tables are children of the Task table and come with the base system?
(Choose three.)

- A) Config
- B) Problem (Correct Answer)**
- C) Dictionary
- D) cmdb
- E) Incident (Correct Answer)**
- F) Change Request (Correct Answer)**

Explanation

Correct Answer: BEF [?](#)

Community Discussion

Question #342

Which role(s) are required to impersonate a user? (Choose two.)

- A) security_admin
- B) sys_admin
- C) impersonator (Correct Answer)**
- D) sys_user
- E) admin (Correct Answer)**

Explanation

Correct Answer: CE [?](#)

Community Discussion

Question #343

Which set of steps is used to import spreadsheet data into a ServiceNow table?

- A) Select Data Source, Schedule Transform
- B) Load Data, Create Transform Map, Run Transform (Correct Answer)**
- C) Define Data Source, Select Transform Map, Run Transform
- D) Select Import Set, Select Transform Map, Run Transform

Explanation

Correct Answer: B [?](#)

Community Discussion

Selected Answer: B

The steps to import spreadsheet data into a ServiceNow table are: (1) Load Data, (2) Create Transform Map, and (3) Run Transform. First, you load the data from your spreadsheet into an Import Set, then you create a transform map to define how the data from the staging table should be moved to the target table, and finally, you run the transform to complete the import process

Selected Answer: B

Question #344

What contains the configuration changes made in an instance (i.e. changes in a form) and helps to implement the changes from the Dev environment to another environment?

- A) Transform maps
- B) Update sets (Correct Answer)**
- C) Import sets
- D) System dictionaries

Explanation

Correct Answer: B [?](#)

Community Discussion

Question #345

An administrator creates “customer_table_admin” and “customer_table_user” roles for the newly created “Customer Table”. Which ACL rule would grant access to all rows and all fields to both the customer_table_admin and customer_table_user roles?

A) customer.none (Correct Answer)

- B) customer.all
- C) customer.field
- D) customer.*

Explanation

Correct Answer: A [?](#)

Community Discussion

Completely agree with kanafuka225. The table.* is allowing access to both of these new roles to all rows and fields as specified. Conversely, table.none is restricting all row and field access to these two roles.

Selected Answer: A

.none is the table level which grants access to all fields and rows.

Selected Answer: A

Best Practice: - when creating .* Access Controls, also create a None Access Control, because only None grants access to records - when writing an ACL that mostly grants access, use only None - when writing an ACL that mostly denies access, use None and .*

Selected Answer: A

none will be used to grant all accesses to the record

Selected Answer: D

The customer .* ACL rule would grant access to all rows and all fields to both the customer_table_admin and customer_table_user roles because it uses a wildcard (*) to

match any operation on the customer table. The other options are either too restrictive or too broad. References1: Access control list rules - Product Documentation: Utah - ServiceNow4: Access Controls - ServiceNow Elite

Question #346

Which tables are available by default in a ServiceNow instance? (Choose three.)

A) User (Correct Answer)

B) Issue

C) Incident (Correct Answer)

D) Project

E) Task (Correct Answer)

F) Item

Explanation

Correct Answer: ACE [?](#)

Community Discussion

Selected Answer: ACE

Selected Answer: ACE

ACE

Question #347

In a Knowledge Base record, where can an administrator find the User Criteria for who can read the articles?

A) From the Accessible to tab

B) From the Available to tab

C) From the Can Access tab

D) From the Can Read tab (Correct Answer)

Explanation

Correct Answer: D [?](#)

Community Discussion

Question #348

What action helps to see which modules are visible to a user?

- A) Install the Bomgar plug-in
- B) Initiate a Connect Chat session
- C) Launch a NowChat window
- D) Impersonate the user (Correct Answer)**

Explanation

Correct Answer: D [?](#)

Selected Answer: BCE

I would go with BCE

Question #350

What are the steps to apply an update set retrieved from another instance?

- A) Load the Update Set > Import the Update Set > Install
- B) Verity Update Set is Complete, Retrieve, Preview, Commit (Correct Answer)**
- C) Verify Update Set is Complete, Test Connection, Apply
- D) Import the Update Set > Verify the Update Set is complete > Link the Update Set > Publish

Explanation

Correct Answer: B [?](#)

Community Discussion

Question #351

After finishing your work on High Security Settings, what is a possible way to return to normal admin security levels?

- A) Select Global Update Set
- B) Log out and back in (Correct Answer)**
- C) End Impersonation
- D) Select Normal role
- E) Use System Administration > Normal Security module

Explanation

Correct Answer: B [?](#)

Community Discussion

Selected Answer: B

By default, you do not have elevated privilege roles upon login. You must manually elevate to the privilege of the role. An elevated privilege role lasts only for the duration of your user session. Session timeout or logout removes the role.

Selected Answer: B

B: Login out and back in

B is the correct answer

Question #352

Which feature can be used to give users the choice to easily populate the most-used fields for a specific table?

- A) Tags
- B) Formatter
- C) Template (Correct Answer)**
- D) Reference type fields

Explanation

Correct Answer: C [?](#)

Community Discussion

Selected Answer: C

C: Template is correct

Question #353

What protects applications by restricting access to data in another application, in the same instance?

- A) Admin Center
- B) Access Control Rules
- C) Assignment Rules

D) Application Scope (Correct Answer)

Explanation

Correct Answer: D [?](#)

Community Discussion

Question #354

Which module in the Service Catalog application is used to create a new catalog item?

- A) Configuration Items
- B) Maintain Items (Correct Answer)**
- C) Content Items
- D) Catalog Items

Explanation

Correct Answer: B [?](#)

Community Discussion

Selected Answer: B

B - i checked it in my PDI

Question #355

What helps to define the structure of a catalog item form that is displayed to the customer?

A) Variables (Correct Answer)

B) Catalog Description

C) Catalog Definition

D) Order Guides

Explanation

Correct Answer: A [?](#)

Community Discussion

Question #356

Which displays the list of activities, or history, on a form?

A) Formatter (Correct Answer)

- B) Dictionary
- C) Sidebar
- D) History Menu

Explanation

Correct Answer: A [?](#)

Community Discussion

Selected Answer: A

In ServiceNow, the Activity formatter displays the list of activities, or history, on a form. This formatter is specifically designed to show a navigable list of activities related to a record, often used in conjunction with the Playbook for visualizing process stages

Question #357

Where should an administrator navigate to add the "Save" button in the form header?

- A) Context Menu > Form Design
- B) All > System Properties > UI Action Settings
- C) All > System Properties > UI Properties (Correct Answer)**
- D) Context Menu > Form Layout

Explanation

Correct Answer: C [?](#)

Community Discussion

Selected Answer: C

C is the correct answer. You need to go to System Properties > UI Properties to enable the save, update and insert and stay option (true/false box) from the glide.ui.advance property.

Selected Answer: C

C is correct, tried it in my PDI

C is the correct answer

Selected Answer: C

C is correct

Question #358

What are the options that can be set to determine when a Business Rule executes? (Choose four.)

A) Async (Correct Answer)

B) Load

C) Change

D) Display (Correct Answer)

E) After (Correct Answer)

F) Before (Correct Answer)

G) Submit

H) Click

Explanation

Correct Answer: ADEF ?

Community Discussion

According to the vancouver SNAF e-book, the answer is ADEF

Selected Answer: ADEF

In business rule definition the "when" field contains before, after, async and display options (ADEF)

answer should be - ADEF

Selected Answer: ADEF

I checked in my PDI and the correct answer is ADEF

Selected Answer: ADEF

ADEF are correct

Question #359

Which path is used on the Filter Navigator to display the list of records from the sys_user table?

- A) sys_user.display
- B) sys_user.do
- C) sys_user.list (Correct Answer)**
- D) sys_user.view

Explanation

Correct Answer: [C ?](#)

Question #360

Which access control rule applies to every field in the incident table?

- A) incident<=>*

B) incident.all

C) incident.* (Correct Answer)

D) incident||*

Explanation

Correct Answer: C ?

Community Discussion

Question #361

What is the purpose of an application scope?

A) Scope determines which parts of an application are available for use by other applications In ServiceNow (Correct Answer)

B) Scope prevents applications from changing their own tables and business logic

C) Scope determines the functionality of core services in the platform

D) Scope determines all applications access each other's tables and business logic

Explanation

Correct Answer: A ?

Community Discussion

Question #362

On a Catalog Task record, how would an administrator change the priority choice options?

A) In the Context menu of the form, select Configure Options

B) Right-click the Priority Label > select Configure Lists

C) Right-click the Priority Label > select Configure Choices (Correct Answer)

D) Open the Data Dictionary > select Values

Explanation

Correct Answer: C [?](#)

Community Discussion

Question #363

Which sequence of actions applies an update set to an instance?

- A) Preview, Save, Commit
- B) Preview, Retrieve, Commit
- C) Retrieve, Commit, Preview

D) Retrieve, Preview, Commit (Correct Answer)

Explanation

Correct Answer: D [?](#)

Community Discussion

Question #364

A customer asks you to make the following updates to a form:

1. When Caller field is populated, automatically look up caller location and load it in the Location field.
2. Add notice at the top of the page when the record is submitted.

What type of script would you use to meet this requirement?

- A) UI script

- B) Server script
- C) JavaScript
- D) Client script (Correct Answer)**

Explanation

Correct Answer: [D ?](#)

Community Discussion

Question #365

When does a Business Rule execute in ServiceNow?

- A) When a user downloads a report
- B) Before or after a user logs into the platform
- C) Before or after a record is saved to the database (Correct Answer)**
- D) Only when a record is deleted

Explanation

Correct Answer: [C ?](#)

Community Discussion

Question #366

Where do UI Policies run?

- A) Client-side (browser) (Correct Answer)**
- B) Knowledge Base
- C) Server-side (database)
- D) Within server-side scripts

Explanation

Correct Answer: A [?](#)

Question #375

If you want to manage your personal tasks through a visual, drag-and-drop interface, what application would you use?

- A) Service Desk
- B) Virtual Agent Homepage
- C) Visual Task Boards (Correct Answer)**

D) Personal Task Tracker

Explanation

Correct Answer: C [?](#)

Community Discussion

Question #376

Which action enables a user to view and specify date and time formats in their instance?

- A) Select the User menu > Preferences > Time Settings > Toggle display time zone
- B) Ask the user to adjust the time zone on their personal computer
- C) Use the system properties to correct the instance's time zone
- D) Select the User menu > Preferences > Language & Region > Set date and time format and time zone (Correct Answer)**
- E) Create a UI Script to set the default timezone

Explanation

Correct Answer: D [?](#)

Community Discussion

Question #377

A manager is complaining that they can't get the data they need on a report, because the data resides in two different tables. This data is used for many different reports in their department. You have checked to see if dot-walking will meet the requirement, and it is not possible. What else might you try to help this manager?

- A) Export the tables to spreadsheet

B) Create a Database View (Correct Answer)

- C) Create a Report Template
- D) Create a Report Source
- E) Create a custom table

Explanation

Correct Answer: B [?](#)

Community Discussion**Question #378**

Which script can run when a record is displayed, inserted, updated, deleted, or when a table is queried?

A) Business rule (Correct Answer)

- B) Cheat script
- C) Record rule
- D) UI script
- E) Scheduled job

Explanation

Correct Answer: A [?](#)

Community Discussion**Question #379**

When you are viewing a record, like an incident, how can you detect if someone else is also actively working on the Incident? (Choose two.)

- A) A notification appears asking the new user to collaborate
- B) A chat bubble automatically launches, so you can collaborate

C) The Work notes list contains names of the other users

D) User presence icon shows initials of users actively viewing the record (Correct Answer)

E) An icon appears to the left of fields that have been updated by other users (Correct Answer)

Explanation

Correct Answer: DE [?](#)
